

CONTENTS

	Page
Preface	
By L. Cesari, J. P. LaSalle and S. Lefschetz	v
I. The Time Optimal Control Problem	
By J. P. LaSalle	1
II. Continuous Dependence on a Parameter	
By J. Jarník and J. Kurzweil	25
III. Poincaré's Perturbation Method and Topological Degree	
By Jane Cronin	37
IV. On the Behavior of the Solutions of Linear Periodic Differential Systems Near Resonance Points	
By Jack K. Hale	55
V. On the Stability of Periodic Solutions of Weakly Nonlinear Periodic and Autonomous Differential Systems	
By Jack K. Hale	91
VI. Existence Theorems for Periodic Solutions of Nonlinear Lipschitzian Differential Systems and Fixed Point Theorems	
By Lamberto Cesari	115
VII. The Applications of a Fixed Point Theorem to a Variety of Non-Linear Stability Problems	
By Arnold Stokes	173
VIII. Quadratic Differential Equations and Non-Associative Algebras	
By Lawrence Markus	185
IX. Sur Une Propriété De L'Ensemble Des Trajectoires Bornées De Certains Systèmes Dynamiques	
By Georges Reeb	215
X. On Lagrange Stable Motions in the Neighborhood of Critical Points	
By Pinchas Mendelson	219
XI. The Local Theory of Piecewise Continuous Differential Equations	
By J. André and P. Seibert	225
XII. Asymptotic Stability in 3-Space	
By Courtney Coleman	257
XIII. Existence and Uniqueness of the Periodic Solution of an Equation for Autonomous Oscillations	
By Rui Pacheco de Figueiredo	269
Appendix	
By E. Pinney	285
