

CONTENTS

<u>Chapter 0. INTRODUCTION</u>	1
<u>Chapter 1. SECOND ORDER EQUATIONS</u>	4
1. General properties	4
2. Comparison theorems	9
3. Tests for oscillation	17
4. The case $p(t) \equiv 1$	20
<u>Chapter 2. LINEAR HAMILTONIAN SYSTEMS</u>	34
1. General properties	34
2. Principal solutions	39
3. Conjugate points	46
4. Matrix Riccati equations	49
5. Calculus of variations	58
6. The method of polar coordinates	67
7. Self-adjoint equations of higher order	73
<u>Chapter 3. EQUATIONS OF ARBITRARY ORDER</u>	81
1. General properties of zeros	81
2. A test for disconjugacy	84
3. Markov and Descartes systems	87
4. Conjugate points	98
5. Adjoint equations	102
6. Green's functions	105
7. Principal solutions	109
8. Differential inequalities	119
Notes	136
