<i>Preface</i>	ix
<b>Historical Introduction</b>	1
<b>Chapter 1. Fourier Series</b>	
1.1 The Lebesgue Integral	5
1.2 The Geometry of $L^2(Q)$	12
1.3 The Geometry of $L^2(Q)$ Continued	22
1.4 Square Summable Functions on the Circle and Their Fourier Series	29
1.5 Summable Functions and Their Fourier Series	37
1.6* Gibbs' Phenomenon	43
1.7 Miscellaneous Applications	46
1.8 Applications to the Partial Differential Equations of One-Dimensional Mathematical Physics	60
1.9* More General Eigenfunction Expansions	72
1.10 Several-Dimensional Fourier Series	81
<b>Chapter 2. Fourier Integrals</b>	
2.1 Fourier Integrals	86
2.2 Fourier Integrals for $C^\infty(\mathbb{R}^1)$	88
2.3 Fourier Integrals for $L^2(\mathbb{R}^1)$ : First Method	91
2.4* Fourier Integrals for $L^2(\mathbb{R}^1)$ : Second Method	94
2.5* Fourier Integrals for $L^2(\mathbb{R}^1)$ : Third Method	97
2.6 Fourier Integrals for $L^1(\mathbb{R}^1)$	101
2.7 Miscellaneous Applications	106
2.8* Heisenberg's Inequality	116
2.9* Band- and Time-Limited Functions	121
2.10 Several-Dimensional Fourier Integrals	132
2.11 Miscellaneous Applications of Several-Dimensional Fourier Integrals	134

### Chapter 3. Fourier Integrals and Complex Function Theory

3.1	A Short Course in Function Theory	144
3.2	Hardy's Theorem	156
3.3	The Paley–Wiener Theorem	158
3.4	Hardy Functions	161
3.5*	Hardy Functions and Filters	170
3.6*	Wiener–Hopf Factorization: Milne's Equation	176
3.7*	Spitzer's Identity	184
3.8*	Hardy Functions in the Disk and Szegő's Theorem	187
3.9*	Polynomial Approximation: The Szász–Müntz Theorem	194
3.10*	The Prime Number Theorem	196

### Chapter 4. Fourier Series and Integrals on Groups

4.1	Groups	203
4.2	Fourier Series on the Circle	206
4.3	Fourier Integrals on the Line	209
4.4	Finite Commutative Groups	214
4.5	Fourier Series on a Finite Commutative Group	217
4.6*	Gauss' Law of Quadratic Reciprocity	222
4.7	Noncommutative Groups	226
4.8	The Rotation Group	228
4.9	Three Convolution Algebras	237
4.10	Homomorphisms of $L^1(K/G/K)$	239
4.11	Spherical Functions Are Eigenfunctions of the Laplacian	242
4.12	Spherical Functions Are Legendre Polynomials	245
4.13	Spherical Harmonics	249
4.14*	Representations of $SO(3)$	255
4.15*	The Euclidean Motion Group	261
4.16*	$SL(2, \mathbb{R})$ and the Hyperbolic Plane	273

<b>Additional Reading</b>	282
---------------------------	-----

<b>Bibliography</b>	283
