CONTENTS

INTRODUCTION ix

1. CONSTRUCTION OF ASYMPTOTIC SOLUTIONS FOR SECOND-ORDER LINEAR DIFFERENTIAL EQUATIONS WITH SLOWLY VARYING COEFFICIENTS 1
   1. Formulation of the Problem 1
   2. A Formal Solution in the Case of Resonance 3
   3. A Formal Solution in the "Nonresonance" Case 6
   4. The Asymptotic Nature of the Solution 8
   5. Finding the Tension in a Visco-Elastic Thread of Variable Length 16

2. CONSTRUCTION OF AN ASYMPTOTIC SOLUTION FOR A SYSTEM OF SECOND-ORDER LINEAR DIFFERENTIAL EQUATIONS WITH SLOWLY VARYING COEFFICIENTS 25
   6. Formulation of the Problem 25
   7. A Formal Solution in the Resonance Case 26
   8. The Nonresonance Case 35
   9. The Asymptotic Nature of the Solution 36
   10. On the Dynamic Stresses in a Visco-Elastic Thread of Variable Length with a Weight Q at the End 42
   11. The Boundary-Value Problem for a System of Second-Order Linear Differential Equations 54

3. ASYMPTOTIC DECOMPOSITION OF A SYSTEM OF LINEAR DIFFERENTIAL EQUATIONS 61
   12. Formulation of the Problem 61
   13. Formal Decomposition 62
   14. Construction of the Transforming Matrix and Differentiability of the Formal Solution 66
   15. Proof of Asymptotic Convergence 73
   16. Some Special Cases of Decomposition 77

17. Decomposition of a Nonhomogeneous System of Linear Differential Equations 79
18. Asymptotic Decomposition of a System of Ordinary Linear Differential Equations in the Case of Multiple Roots of the Characteristic Equation 85

4. CONSTRUCTION OF AN ASYMPTOTIC SOLUTION IN THE CASE OF MULTIPLE ROOTS OF THE CHARACTERISTIC EQUATION 121

19. General Remarks 121
20. The Case of Simple Elementary Divisors 123
21. A Formal Solution in the Presence of One Multiple Elementary Divisor 125
22. An Example 142
23. The Asymptotic Nature of the Solution 146
24. Asymptotic Solution in the Presence of Several Multiple Elementary Divisors 153
25. Construction of an Asymptotic Solution in the Case of Other Sufficient Conditions 157
26. Differential Equations with a Small Parameter in the Highest Derivatives 170
27. Finding the Characteristic Values of a Boundary-Value Problem for a Fourth-Order Differential Equation Consisting of Two Self-Adjoint Expressions 173

5. ASYMPTOTIC SOLUTIONS OF DIFFERENTIAL EQUATIONS IN BANACH SPACE 187

28. Formulation of the Problem 187
29. Existence and Uniqueness of the Solution 189
30. On the Solvability of Certain Operator Equations in Banach Space 202
31. Construction of a Formal Solution 207
32. Proof of Asymptotic Convergence 213
33. Asymptotic Solutions of the Nonhomogeneous Equation 216
34. Direct Construction of a Particular Solution to the Nonhomogeneous Equation 223
35. Applications 227

6. ASYMPTOTIC METHODS OF SOLVING LINEAR PARTIAL DIFFERENTIAL EQUATIONS 239

36. Formulation of the Problem 239
37. Construction of Formal Solutions 243
38. Proof of Asymptotic Convergence 256
