Contents

Preface to the Russian Edition v

Chapter I

Linear Topological Spaces 1

1. Definition of a Linear Topological Space 1
2. Normed Spaces. Comparability and Compatibility of Norms . . 11
3. Countably Normed Spaces 15
4. Continuous Linear Functionals and the Conjugate Space . . . 32
5. Topology in a Conjugate Space 41
6. Perfect Spaces 53
7. Continuous Linear Operators 60
8. Union of Countably Normed Spaces 66

Appendix 1. Elements, Functionals, Operators Depending on a Parameter 70

Appendix 2. Differentiable Abstract Functions 72

Appendix 3. Operators Depending on a Parameter 73

Appendix 4. Integration of Continuous Abstract Functions with Respect to the Parameter 75

Chapter II

Fundamental and Generalized Functions 77

1. Definition of Fundamental and Generalized Functions 77
2. Topology in the Spaces $K\{M_p\}$ and $Z\{M_p\}$ 86
3. Operations with Generalized Functions 98
4. Structure of Generalized Functions 109

Chapter III

Fourier Transformations of Fundamental and Generalized Functions 122

1. Fourier Transformations of Fundamental Functions 122
2. Fourier Transforms of Generalized Functions 128
3. Convolution of Generalized Functions and Its Connection to Fourier Transforms. 135
4. Fourier Transformation of Entire Analytic Functions 154

Chapter IV

Spaces of Type S 166

1. Introduction 166
2. Various Modes of Defining Spaces of Type S 169
3. Topological Structure of Fundamental Spaces 176
4. Simplest Bounded Operations in Spaces of Type S 184
5. Differential Operators 193
6. Fourier Transformations 197
7. Entire Analytic Functions as Elements or Multipliers in Spaces of Type S 207
8. The Question of the Nontriviality of Spaces of Type S 225
9. The Case of Several Independent Variables 237

Appendix 1. Generalization of Spaces of Type S 244

Appendix 2. Spaces of Type W 246

Notes and References 253

Bibliography 257

Index 259
