

# Contents

Translator's Note . . . . .	v
Preface to the Russian Edition . . . . .	vii

## Chapter I

Spaces of Type W . . . . .	1
1. Definitions . . . . .	1
2. Bounded Operators in Spaces of Type $W$ . . . . .	12
3. Fourier Transforms . . . . .	18
4. The Case of Several Variables . . . . .	25

## Chapter II

Uniqueness Classes for the Cauchy Problem . . . . .	29
1. Introduction . . . . .	29
2. The Cauchy Problem in a Topological Vector Space . . . . .	32
3. The Cauchy Problem for Systems of Partial Differential Equations. The Operator Method. . . . .	36
4. The Cauchy Problem for Systems of Partial Differential Equations. The Method of Fourier Transforms . . . . .	51
5. Examples . . . . .	60
6. The Connection between the Reduced Order of a System and Its Characteristic Roots . . . . .	64
7. A Theorem of the Phragmén-Lindelöf Type . . . . .	80
Appendix 1. Convolution Equations . . . . .	90
Appendix 2. Equations with Coefficients Which Depend on $x$ . . . . .	94
Appendix 3. Systems with Elliptic Operators . . . . .	100

## Chapter III

Correctness Classes for the Cauchy Problem . . . . .	105
1. Introduction . . . . .	105
2. Parabolic Systems . . . . .	111
3. Hyperbolic Systems . . . . .	126

4. Systems Which Are Petrovskii-Correct . . . . .	134
5. On the Solutions of Incorrect Systems . . . . .	156
<b>Chapter IV</b>	
Generalized Eigenfunction Expansions . . . . .	165
1. Introduction . . . . .	165
2. Differentiation of Functionals of Strongly Bounded Variation .	172
3. Differentiation of Functionals of Weakly Bounded Variation .	176
4. Existence and Completeness Theorems for the System of Eigenfunctionals . . . . .	182
5. Generalized Eigenfunctions of Self-Adjoint Operators . . . . .	189
6. The Structure of the Generalized Eigenfunctions . . . . .	201
7. Dynamical Systems . . . . .	206
Notes and References . . . . .	211
Bibliography . . . . .	217
Index . . . . .	221
