Introduction	1

I. REPRESENTATIONS OF RANDOM PROCESSES APPLIED TO NONLINEAR SYSTEMS

Editor's Comments on Papers 1 Through 5	6
1 BUSSGANG, J. J.: Crosscorrelation Functions of Amplitude-Distorted Gaussian Signals	8
<i>MIT Res. Lab. Electronics Tech. Rept. 216, 1-14 (Mar. 26, 1952)</i>	
2 BARRETT, J. F., and D. G. LAMPARD: An Expansion for Some Second-Order Probability Distributions and Its Application to Noise Problems	23
<i>IRE Trans. Information Theory, IT-1(1), 10-15 (1955)</i>	
3 LEIPNIK, R.: The Effect of Instantaneous Nonlinear Devices on Cross-Correlation	29
<i>IRE Trans. Information Theory, IT-4(2), 73-76 (1958)</i>	
4 WONG, E.: The Construction of a Class of Stationary Markoff Processes	33
<i>Proc. Amer. Math. Soc. Symp. Appl. Math., 16, 264-276 (1963)</i>	
5 CAMBANIS, S., and B. LIU: On the Expansion of a Bivariate Distribution and Its Relationship to the Output of a Nonlinearity	46
<i>IEEE Trans. Information Theory, IT-17(1), 17-25 (1971)</i>	

II. OUTPUT PROPERTIES OF ZNL SYSTEMS

Editor's Comments on Papers 6 Through 12	56
6A PRICE, R.: A Useful Theorem for Nonlinear Devices Having Gaussian Inputs <i>IRE Trans. Information Theory</i> , IT-4(2), 69–72 (1958)	59
6B PRICE, R.: Comment on “A Useful Theorem for Nonlinear Devices Having Gaussian Inputs” <i>IEEE Trans. Information Theory</i> , IT-10(2), 171 (1964)	63
7 GORMAN, C. D., and J. ZABORSZKY: Functional Calculus in the Theory of Nonlinear Systems with Stochastic Signals <i>IEEE Trans. Information Theory</i> , IT-14(4), 528–531 (1968)	64
8 SHUTTERLY, H. B.: General Results in the Mathematical Theory of Random Signals and Noise in Nonlinear Devices <i>IEEE Trans. Information Theory</i> , IT-9(2), 74–84 (1963)	68
9 BAUM, R. F.: The Correlation Function of Gaussian Noise Passed Through Nonlinear Devices <i>IEEE Trans. Information Theory</i> , IT-15(4), 448–456 (1969)	79
10 ABRAMSON, N.: Nonlinear Transformations of Random Processes <i>IEEE Trans. Information Theory</i> , IT-13(3), 502–505 (1967)	88
11 BLACHMAN, N. M.: The Signal \times Signal, Noise \times Noise, and Signal \times Noise Output of a Nonlinearity <i>IEEE Trans. Information Theory</i> , IT-14(1), 21–27 (1968)	92
12 BLACHMAN, N. M.: The Uncorrelated Output Components of a Nonlinearity <i>IEEE Trans. Information Theory</i> , IT-14(2), 250–255 (1968)	99

III. FUNCTIONALS WITH RANDOM INPUTS

Editor's Comments on Papers 13, 14, and 15	106
13 CAMERON, R. H., and W. T. MARTIN: The Orthogonal Development of Non-linear Functionals in Series of Fourier–Hermite Functionals <i>Ann. Math.</i> , 48(2), 385–392 (1947)	108
14 BARRETT, J. F.: The Use of Functionals in the Analysis of Non-linear Physical Systems <i>J. Electronics and Control</i> , 15(6), 567–615 (1963)	116
15 BEDROSIAN, E., and S. O. RICE: The Output Properties of Volterra Systems (Nonlinear Systems with Memory) Driven by Harmonic and Gaussian Inputs <i>Proc. IEEE</i> , 59(12), 1688–1707 (1971)	167

IV. BASIC PAPERS ON OUTPUT SPECTRA OF SPECIAL NONLINEARITIES

Editor's Comments on Papers 16, 17, and 18	188
16 BENNETT, W. R.: Response of a Linear Rectifier to Signal and Noise <i>J. Acoust. Soc. Amer.</i> , 15 (3), 164–172 (1944)	190
17 VAN VLECK, J. H., and D. MIDDLETON: The Spectrum of Clipped Noise <i>Proc. IEEE</i> , 54 (1), 2–19 (1966)	199
18 BENNETT, W. R.: Spectra of Quantized Signals <i>Bell Syst. Tech. J.</i> , 27 , 446–472 (July 1948)	217

V. BANDPASS NONLINEAR SYSTEMS

Editor's Comments on Papers 19 and 20	246
19 MIDDLETON, D.: Some General Results in the Theory of Noise Through Non-linear Devices <i>Quart. Appl. Math.</i> , 5 (4), 445–498 (1948)	248
20 DAVENPORT, W. B., Jr.: Signal-to-Noise Ratios in Band-Pass Limiters <i>J. Appl. Phys.</i> , 24 (6), 720–727 (1953)	302

VI. OUTPUT DISTRIBUTIONS OF ZADEH'S CLASS η_1 FUNCTIONALS

Editor's Comments on Papers 21 Through 26	312
21 KAC, M., and A. J. F. SIEGERT: On the Theory of Noise in Radio Receivers with Square Law Detectors <i>J. Appl. Phys.</i> , 18 (4), 383–397 (1947)	315
22 MEYER, M. A., and D. MIDDLETON: On the Distributions of Signals and Noise After Rectification and Filtering <i>J. Appl. Phys.</i> , 25 (8), 1037–1052 (1954)	330
23 DARLING, D. A., and A. J. F. SIEGERT: A Systematic Approach to a Class of Problems in the Theory of Noise and Other Random Phenomena: Part I <i>IRE Trans. Information Theory</i> , IT-3 (1), 32–37 (1957)	346
24 SIEGERT, A. J. F.: A Systematic Approach to a Class of Problems in the Theory of Noise and Other Random Phenomena: Part II. Examples <i>IRE Trans. Information Theory</i> , IT-3 (1), 38–43 (1957)	352

25	SIEGERT, A. J. F.: A Systematic Approach to a Class of Problems in the Theory of Noise and Other Random Phenomena: Part III. Examples <i>IRE Trans. Information Theory</i> , IT-4 (1), 4–14 (1958)	358
26	GRENDER, U., H. O. POLLAK, and D. SLEPIAN: The Distribution of Quadratic Forms in Normal Variates: A Small Sample Theory with Applications to Spectral Analysis <i>J. Soc. Ind. Appl. Math.</i> , 7 (4), 374–401 (1959)	369
	Bibliography	397
	Author Citation Index	403
	Subject Index	407
