CONTENTS OF VOLUME V

Introduction 1

1900, 1. On a class of definite integrals containing hyperbolic functions. 9
Messenger of Mathematics, 29, 25–42. Published 1899.

1901, 1. On differentiation and integration under the integral sign. 28
Quarterly Journal of Mathematics, 32, 66–140. Published 1900. (Corrected in 1915, 2.)

1901, 2. General theorems in contour integration, with some applications. 106
Quarterly Journal of Mathematics, 32, 369–84.

1901, 3. Notes on some points in the integral calculus I: On the formula for integration by parts. 123
Messenger of Mathematics, 30, 185–7.

1901, 4. Notes on some points in the integral calculus II: Two general convergence theorems. 126
Messenger of Mathematics, 30, 187–90.

1902, 1. The elementary theory of Cauchy's principal values. 130
Proceedings of the London Mathematical Society, (1) 34, 16–40. Published 1901.

1902, 2. The theory of Cauchy's principal values (Second Paper: the use of principal values in some of the double limit problems of the integral calculus). 156
Proceedings of the London Mathematical Society, (1) 34, 55–91. Published 1901.

1902, 3. On the Frullanian integral 195

$$\int_0^\infty \frac{\phi(ax^m)-\psi(bx^n)}{x}(\log x)^p\,dx.$$

Quarterly Journal of Mathemtics, 33, 113–44. Published 1901.

1902, 4. Notes on some points in the integral calculus III: On the logarithmic criteria for the absolute convergence of an integral whose upper limit is ∞. 229
Messenger of Mathematics, 31, 1–6. Published 1901.

1902, 5. Notes on some points in the integral calculus IV: On the integral 235

$$\int^\infty \sin x\,\psi(x)\,dx.$$

Messenger of Mathematics, 31, 6–8. Published 1901.

1902, 7. Notes on some points in the integral calculus V: On absolutely convergent integrals of functions which are infinitely often infinite. 238

Messenger of Mathematics, 31, 73–6. Published 1901.

1902, 8. Notes on some points in the integral calculus VI: Absolute convergence of infinite multiple integrals. 243

Messenger of Mathematics, 31, 125–8. Published 1901.

1902, 9. Notes on some points in the integral calculus VII: On differentiation under the integral sign. 247

Messenger of Mathematics, 31, 132–4.

1902, 10. Notes on some points in the integral calculus VIII: Absolutely convergent integrals of irregular types. 251

Messenger of Mathematics, 31, 177–83.

1903, 1. The theory of Cauchy's principal values (Third Paper: differentiation and integration of principal values). 259

Proceedings of the London Mathematical Society, (1) 35, 81–107.

1903, 2. On the continuity and discontinuity of definite integrals which contain a continuous parameter. 287

Quarterly Journal of Mathematics, 34, 28–53. Published 1902.

1903, 4. Notes on some points in the integral calculus IX: On the integral 315

$$\int^{\infty} \{A-\phi(\sin^2 x)\}\psi(x)\,dx.$$

Messenger of Mathematics, 32, 1–3. Published 1902.

1903, 6. On the integral $\displaystyle\int_{-\infty}^{\infty} \frac{\log(ax^2+2bx+c)^2}{\alpha x^2+2\beta x+\gamma}\,dx.$ 319

Messenger of Mathematics, 32, 45–50. Published 1902.

1903, 7. Notes on some points in the integral calculus X: On conditionally convergent infinite multiple integrals. 325

Messenger of Mathematics, 32, 92–7. Published 1902.

1903, 8. Notes on some points in the integral calculus XI: Some conditionally convergent infinite double integrals. 332

Messenger of Mathematics, 32, 159–65.

1903, 9. Notes on some points in the integral calculus XII: On the operation which is the inverse of double integration. 340

Messenger of Mathematics, 32, 187–92.

1904, 8. Notes on some points in the integral calculus XIII: On differentiation under the integral sign (continued). 347

Messenger of Mathematics, 33, 62–7. Published 1903.

1904, 10. Notes on some points in the integral calculus XIV: Integrals whose discontinuities are everywhere dense. 354

Messenger of Mathematics, 33, 80–5. Published 1903.

1905, 10. Notes on some points in the integral calculus XV: On upper and lower integration. 361

Messenger of Mathematics, 34, 3–6. Published 1904.

1905, 11. Notes on some points in the integral calculus XVI: A class of conditionally convergent infinite multiple integrals. 365

Messenger of Mathematics, 34, 6–10. Published 1904.

1905, 12. A generalization of Frullani's integral. 371

Messenger of Mathematics, 34, 11–18, and note, p. 102. Published 1904.

1906, 4. On certain double integrals. 381

Quarterly Journal of Mathematics, 37, 360–9.

1906, 6. Notes on some points in the integral calculus XVII: On the integration of series. 391

Messenger of Mathematics, 35, 126–30.

1906, 8. Notes on some points in the integral calculus XVIII: On some discontinuous integrals. 396

Messenger of Mathematics, 35, 158–66.

1906, 9. Some notes on certain theorems in higher trigonometry. 405

Mathematical Gazette, 3, 284–8.

1907, 7. Notes on some points in the integral calculus XIX: On Abel's lemma and the second theorem of the mean. 410

Messenger of Mathematics, 36, 10–13. Published 1906.

1908, 4 (with T. J. I'A. Bromwich). The definition of an infinite integral as the limit of a finite or infinite series. 414

Quarterly Journal of Mathematics, 39, 222–40.

1908, 5. Some multiple integrals. 434

Quarterly Journal of Mathemtics, 39, 357–75.

1908, 6. Notes on some points in the integral calculus XX: On double Frullanian integrals. 454

Messenger of Mathematics, 37, 96–103. Published 1907.

1908, 7. Notes on some points in the integral calculus XXI: On a conditionally convergent multiple integral. 463

Messenger of Mathematics, 37, 127–30.

1908, 8. Notes on some points in the integral calculus XXII: On double Frullanian integrals (continued). 467

Messenger of Mathematics, 37, 154–61.

1909, 2. The theory of Cauchy's principal values (Fourth Paper: the integration of principal values—continued—with applications to the inversion of definite integrals). 476

Proceedings of the London Mathematical Society, (2) 7, 181–208.

1909, 4. Notes on some points in the integral calculus XXIII: On certain oscillating cases of Dirichlet's integral. 505

Messenger of Mathematics, 38, 1–8. Published 1908.

1909, 5. On certain definite integrals whose values can be expressed in terms of Bessel's functions. 514

Messenger of Mathematics, 38, 129–32.

1909, 6. Notes on some points in the integral calculus XXIV: Oscillating cases of Dirichlet's integral (continued). 518

Messenger of Mathematics, 38, 176–85 (correction at end of 1911, 3).

1909, 7. The integral $\int_0^\infty \frac{\sin x}{x}\,dx.$ 528

Mathematical Gazette, 5, 98–103.

1910, 6. Notes on some points in the integral calculus XXV: Absolutely convergent integrals of irregular types (continued). 534

Messenger of Mathematics, 39, 28–32. Published 1909.

1910, 8. Notes on some points in the integral calculus XXVI: On a case of term-by-term integration of an infinite series. 540

Messenger of Mathematics, 39, 136–9.

1911, 3. Notes on some points in the integral calculus XXVII: Oscillating cases of Dirichlet's integral (continued). 545

Messenger of Mathematics, 40, 44–53. Published 1910.

1911, 4. A class of definite integrals. 555

Messenger of Mathematics, 40, 53–4. Published 1910.

1911, 5. Notes on some points in the integral calculus XXVIII: A conditionally convergent double integral. 558

Messenger of Mathematics, 40, 62–9. Published 1910.

1911, 6. Notes on some points in the integral calculus XXIX: Two convergence theorems. 567

Messenger of Mathematics, 40, 87–91. Published 1910.

1912, 8. Notes on some points in the integral calculus XXXII: On double series and double integrals. 573

Messenger of Mathematics, 41, 44–8. Published 1911.

1913, 8. Notes on some points in the integral calculus XXXIV: Absolutely convergent integrals of irregular types (continued). 579

Messenger of Mathematics, 42, 13–18. Published 1912.

1914, 8. Notes on some points in the integral calculus XXXVI: On the asymptotic values of certain integrals. 586

Messenger of Mathematics, 43, 9–13. Published 1913.

1915, 2. Correction of an error. 592

Quarterly Journal of Mathematics, 46, 261–2.

1915, 5. Proof of a formula of Mr. Ramanujan. 594

Messenger of Mathematics, 44, 18–21. Published 1914.

1915, 6. Notes on some points in the integral calculus XXXIX: Further examples of conditionally convergent infinite double integrals. 598

Messenger of Mathematics, 44, 57–63. Published 1914.

1915, 7. Notes on some points in the integral calculus XL: Some cases of term-by-term integration of an infinite series. 605

Messenger of Mathematics, 44, 145–9.

1915, 8. Notes on some points in the integral calculus XLI: On the convergence of certain integrals and series. 610

Messenger of Mathematics, 44, 163–6.

1916, 11. Further remarks on the integral 615

$$\int_0^\infty \frac{\sin x}{x}\,dx.$$

Mathematical Gazette, 8, 301–3.

1917, 6. Notes on some points in the integral calculus XLIII: On the asymptotic value of a definite integral, and the coefficient in a power series. 619
Messenger of Mathematics, 46, 70–3. Published 1916.

1917, 7. Notes on some points in the integral calculus XLIV: On certain multiple integrals and series which occur in the analytic theory of numbers. 623
Messenger of Mathematics, 46, 104–7. Published 1916.

1918, 7. Notes on some points in the integral calculus XLVIII: On some properties of integrals of fractional order. 628
Messenger of Mathematics, 47, 145–50.

1919, 2. Notes on some points in the integral calculus L: On the integral of Stieltjes and the formula for integration by parts. 635
Messenger of Mathematics, 48, 90–100. Published 1918.

1926, 3. Note on the inversion of a repeated integral. 647
Proceedings of the London Mathematical Society, (2) 24, l–li.

1945, 2 (with N. Aronszajn). Properties of a class of double integrals. 650
Annals of Mathematics, (2) 46, 220–41, and corrigendum in 47, 166.

Arrangement of the Volumes. 675

Complete list of Hardy's mathematical papers. 677
