

# CONTENTS

<b>1</b>	<b>Formal Power Series</b>	<b>1</b>
1.1.	Algebraic Preliminaries: Complex Numbers,	1
1.2.	Definition and Algebraic Properties of Formal Power Series,	9
1.3.	A Matrix Representation of Formal Power Series,	14
1.4.	Differentiation of Formal Power Series,	18
1.5.	Formal Hypergeometric Series and Finite Hypergeometric Sums,	27
1.6.	The Composition of a Formal Power Series with a Nonunit,	35
1.7.	The Group of Almost Units Under Composition,	45
1.8.	Formal Laurent Series: Residues,	51
1.9.	The Lagrange-Bürmann Theorem,	55
	Seminar Assignments,	64
	Notes,	65
<b>2</b>	<b>Functions Analytic at a Point</b>	<b>66</b>
2.1.	Banach Algebras: Functions,	66
2.2.	Convergent Power Series,	75
2.3.	Functions Analytic at a Point,	87
2.4.	Composition and Inversion of Analytic Functions,	94
2.5.	Elementary Transcendental Functions,	106
2.6.	Matrix-Valued Functions,	122
2.7.	Sequences of Functions Analytic at a Point,	133
	Seminar Assignments,	137
	Notes,	138
<b>3</b>	<b>Analytic Continuation.</b>	<b>139</b>
3.1.	Rearrangement of Power Series; Derivatives,	139
3.2.	Analytic Extension and Continuation,	144
3.3.	New Determination of the Radius of Convergence,	155
3.4.	Sequences of Functions Analytic in a Region,	159

3.5.	Analytic Continuation Along an Arc: Monodromy Theorem,	165
3.6.	Numerical Analytic Continuation Along an Arc, Seminar Assignments, Notes,	170 179 179
<b>4</b>	<b>Complex Integration</b>	<b>180</b>
4.1.	Complex Functions of a Real Variable,	180
4.2.	The Integral of a Function Along an Arc,	187
4.3.	Integrals of Analytic Functions,	195
4.4.	The Laurent Series: Isolated Singularities,	206
4.5.	Applications of the Laurent Series: Bessel Functions, Fourier Series,	219
4.6.	Continuous Argument, Winding Number, Jordan Curve Theorem,	230
4.7.	Residue Theorem: Cauchy Integral Formula,	241
4.8.	Applications of the Residue Theorem: Evaluation of Definite Integrals,	249
4.9.	Applications of the Residue Theorem: Summation of Infinite Series,	265
4.10.	The Principle of the Argument, Seminar Assignments, Notes,	276 285 285
<b>5</b>	<b>Conformal Mapping</b>	<b>286</b>
5.1.	Geometric Interpretation of Complex Functions,	286
5.2.	Moebius Transformations: Algebraic Theory,	299
5.3.	Moebius Transformations: The Riemann Sphere,	307
5.4.	Moebius Transformations: Symmetry,	316
5.5.	Holomorphic Functions and Conformal Maps,	323
5.6.	Conformal Transplants,	333
5.7.	Problems of Plane Electrostatics,	342
5.8.	Two-Dimensional Ideal Flows,	356
5.9.	Poisson's Equation,	371
5.10.	General Results on Conformal Maps,	377
5.11.	Symmetry,	387
5.12.	The Schwarz-Christoffel Mapping Function,	396
5.13.	Mapping the Rectangle. An Elliptic Integral,	416
5.14.	Rounding Corners in Schwarz-Christoffel Maps, Seminar Assignment, Notes,	422 432 432

**6 Polynomials . . . . . 433**

- 6.1. The Horner Algorithm, 433
- 6.2. Sign Changes. The Rule of Descartes, 439
- 6.3. Cauchy Indices: The Number of Zeros of a Real Polynomial in a Real Interval, 443
- 6.4. Disks Containing a Specified Number of Zeros, 450
- 6.5. Geometry of Zeros (Theorems of Gauss-Lucas, Laguerre, and Grace), 463
- 6.6. Circular Arithmetic, 475
- 6.7. The Number of Zeros in a Half-Plane, 485
- 6.8. The Number of Zeros in a Disk, 491
- 6.9. Methods for Determining Zeros: A Survey, 497
- 6.10. Methods of Search for a Single Zero, 500
- 6.11. Methods of Search and Exclusion for the Simultaneous Determination of All Zeros, 513
- 6.12. Fixed Points of Analytic Functions: Iteration, 523
- 6.13. Newton's Method for Polynomials, 534
- 6.14. Methods of Descent, 541  
Seminar Assignments, 550  
Notes, 551

**7 Partial Fractions . . . . . 553**

- 7.1. Construction of the Partial Fraction Representation of a Rational Function, 553
- 7.2. Partial Fractions: Miscellaneous Applications 562
- 7.3. Some Applications to Combinatorial Analysis, 578
- 7.4. Difference Equations, 584
- 7.5. Hankel Determinants, 591
- 7.6. The Quotient-Difference Algorithm, 608
- 7.7. Hadamard Polynomials, 622
- 7.8. Matrix Interpretation, 634
- 7.9. Poles with Equal Moduli, 641
- 7.10. Partial Fraction Expansions of Meromorphic Functions, 655  
Seminar Assignments, 662  
Notes, 662

**Bibliography. . . . . 663****Index . . . . . 673**
