

# CONTENTS

Global Solvability of the First Boundary Value Problem for a Quasilinear Parabolic Equation. . . . .	1
by A. V. Ivanov	
Nonlocal Estimates of First Derivatives of Solutions to Dirichlet's Problem for Nonuniformly Elliptic Quasilinear Equations. . . . .	12
by N. M. Ivochkina and A. P. Oskolkov	
One Class of Functions of Many Real Variables. . . . .	35
by V. P. Il'in	
Uniqueness and Smoothness of Generalized Solutions of the Navier–Stokes Equation . . . . .	60
by O. A. Ladyzhenskaya	
Certain Classes of Nonuniformly Elliptic Equations . . . . .	67
by O. A. Ladyzhenskaya and N. N. Ural'tseva	
Closure in the Metric of the Generalized Dirichlet Integral . . . . .	70
by V. G. Maz'ya	
Approximations in the Mean by Harmonic Functions . . . . .	72
by V. G. Maz'ya and V. P. Khavin	
Transformers Generated by the Stieltjes Double Operator Integrals . . . . .	75
by M. Z. Solomyak	
Exact Bounds in $L_p$ for One Class of Degenerate Second-Order Elliptic Equations . . . . .	88
by A. L. Treskunov	
Impossibility of $W_q^2$ Bounds for Multidimensional Elliptic Equations with Discontinuous Coefficients . . . . .	95
by N. N. Ural'tseva
