

## CONTENTS

	Preface .. .. .	ix
	<b>Introduction</b> .. .. .	1
	I. The simple pendulum .. .. .	2
	II. A dissipative system .. .. .	5
	III. The spherical pendulum .. .. .	7
	IV. Vector fields and dynamical systems .. .. .	10
<b>Chapter 1.</b>	<b>Some Simple Examples</b> .. .. .	12
	I. Flows and homeomorphisms .. .. .	12
	II. Orbits .. .. .	13
	III. Examples of dynamical systems .. .. .	14
	IV. Constructing systems .. .. .	17
	V. Properties of orbits .. .. .	23
	<b>Appendix 1</b> .. .. .	26
	I. Group actions .. .. .	26
<b>Chapter 2.</b>	<b>Equivalent Systems</b> .. .. .	28
	I. Topological conjugacy .. .. .	28
	II. Homeomorphisms of the circle .. .. .	29
	III. Flow equivalence and topological equivalence .. .. .	31
	IV. Local equivalence .. .. .	38
	V. Limit sets of flows .. .. .	41
	VI. Limit sets of homeomorphisms .. .. .	46
	VII. Non-wandering sets .. .. .	46
	<b>Appendix 2</b> .. .. .	50
	I. Two topological lemmas .. .. .	50
	II. Oriented orbits in Hausdorff spaces .. .. .	51
	III. Compactification .. .. .	54

<b>Chapter 3.</b>	<b>Integration of Vector Fields</b>	.. .. .	57
I.	Vector fields	.. .. .	58
II.	Velocity vector fields and integral flows	.. .. .	60
III.	Ordinary differential equations	.. .. .	63
IV.	Local integrals	.. .. .	67
V.	Global integrals	.. .. .	72
	<b>Appendix 3</b>	.. .. .	76
	I. Integrals of perturbed vector fields	.. .. .	76
	II. First integrals	.. .. .	78
<b>Chapter 4.</b>	<b>Linear Systems</b>	.. .. .	80
I.	Linear flows on $\mathbf{R}^n$	.. .. .	82
II.	Linear automorphisms of $\mathbf{R}^n$	.. .. .	88
III.	The spectrum of a linear endomorphism	.. .. .	90
IV.	Hyperbolic linear automorphisms	.. .. .	91
V.	Hyperbolic linear vector fields	.. .. .	97
	<b>Appendix 4</b>	.. .. .	103
	I. Spectral Theory	.. .. .	103
<b>Chapter 5.</b>	<b>Linearization</b>	.. .. .	109
I.	Regular points	.. .. .	111
II.	Hartman's theorem	.. .. .	113
III.	Hartman's theorem for flows	.. .. .	117
IV.	Hyperbolic closed orbits	.. .. .	119
	<b>Appendix 5</b>	.. .. .	126
	I. Smooth linearization	.. .. .	126
	II. Liapunov stability	.. .. .	128
	III. The index of a fixed point	.. .. .	133
<b>Chapter 6.</b>	<b>Stable Manifolds</b>	.. .. .	143
I.	The stable manifold at a hyperbolic fixed point of a diffeomorphism	.. .. .	144
II.	Stable manifold theory for flows	.. .. .	151
III.	The generalized stable manifold theorem	.. .. .	154
	<b>Appendix 6</b>	.. .. .	160
	I. Perturbed stable manifolds	.. .. .	160
<b>Chapter 7.</b>	<b>Stable Systems</b>	.. .. .	161
I.	Low dimensional systems	.. .. .	162
II.	Anosov systems	.. .. .	168
III.	Characterization of structural stability	.. .. .	171
