CHAPTER 1

METHODS AND ALGORITHMS FOR THE APPROXIMATE SOLUTION OF GENERAL OPERATOR EQUATIONS

1	RELEVANT ASPECTS OF FUNCTIONAL ANALYSIS	1
	1.1 Abstract Spaces 1	
	1.2 Operators and Functionals 7	
	1.3 Compact Sets 10	
2	THE GENERAL THEORY OF APPROXIMATE METHODS	13
	2.1 Linear Problems in a Hilbert Space 13	
	2.2 Linear Problems in a Banach Space 24	
	2.3 Non-Linear Problems 29	
3	THE METHOD OF LEAST SQUARES	41
	3.1 The Basis of the Method 41	
	3.2 An Orthogonalization Algorithm 53	
	3.3 Gaussian Elimination with Pivoting 59	
	3.4 A Coordinate-wise Descent Algorithm (Gauss-Seidel) 69	
	3.5 The Steepest Descent Algorithm (L.V. Kantorovich) 79	
	3.6 Some Other Algorithms 84	
4	THE RITZ-GALERKIN METHOD	86
	4.1 Connection with the Method of Least Squares 86	
	4.2 Properties of the Ritz-Galerkin Method 88	
5	ITERATIVE METHODS	90
	5.1 Simple Iteration and Analytic Continuation 90	
	5.2 Steepest Descent Methods 102	
6	OTHER METHODS AND ALGORITHMS	110
	6.1 Yu. V. Vorob'ev's Method of Moments 110	
	6.2 Generalizations of the Method of Least Squares 111	
	6.3 Some Algorithms for the Solution of Non-Linear Programming Problems 119	
	6.4 Criteria for the Comparison of Different Algorithms 126	

CHAPTER 2

BASIC RESULTS FROM THE THEORY OF ONE-DIMENSIONAL LINEAR SINGULAR INTEGRAL EQUATIONS

7	SINGULAR INTEGRALS AS OPERATORS	131
---	---------------------------------------	-----

8	SINGULAR INTEGRAL EQUATIONS WHICH ARE SOLVABLE IN CLOSED FORM	135
	8.1 The Dominant Equation in the Case of a Closed Contour	135
	8.2 The Dominant Equation in Exceptional Cases	137
	8.3 The Dominant Equation in the Case of an Open Contour	140
	8.4 A System of Dominant Equations	144
9	THE THEORY OF SINGULAR INTEGRAL EQUATIONS	148
	9.1 Basic Concepts	148
	9.2 Methods of Regularization	150
	9.3 The Integrability and Smoothness of Solutions	152
	9.4 Stability of Solutions	153
	9.5 A General Functional Approach	157
CHAPTER 3		
THE NUMERICAL SOLUTION OF SINGULAR INTEGRAL EQUATIONS WITH CAUCHY KERNEL		
10	RESULTS FROM THE CONSTRUCTIVE THEORY OF FUNCTIONS	161
	10.1 Approximation on a Circle	161
	10.2 Approximation on Other Sets	167
	10.3 Examples of Complete Systems of Functions	169
11	THE APPROXIMATE EVALUATION OF SINGULAR INTEGRALS AND CAUCHY INTEGRALS	172
	11.1 Methods Based on the Approximation of the Density Function	172
	11.2 Quadrature Formulae	176
	11.3 Some Other Methods	182
12	THE CASE OF A NORMALLY SOLVABLE EQUATION WITH CLOSED CONTOUR AND SUFFICIENTLY SMOOTH INPUT DATA	187
	12.1 Application of the Method of Least Squares	187
	12.2 Application of the Method of Collocation	191
	12.3 Other Methods	199
	12.4 The Calculation of Characteristic Values	206
	12.5 The Determination of All Solutions	208
13	THE NORMALLY SOLVABLE EQUATION WITH AN OPEN CONTOUR OF INTEGRATION ..	211
	13.1 Reduction to the Case of a Closed Contour	211
	13.2 Questions on the Improvement of Convergence	213
	13.3 Application of the Method of Least Squares	216
14	OTHER CASES OF A SINGLE EQUATION	223
	14.1 Equations in the Exceptional Case	223
	14.2 Minimum Restrictions on the Smoothness of the Input Data, and on the Condition for Inversion when $a \pm b$ is zero on γ	230
15	SYSTEMS OF SINGULAR INTEGRAL EQUATIONS	233
	15.1 Reduction to a System of Fredholm Integral Equations of the Second Kind	233
	15.2 Application of the Method of Least Squares	238
	15.3 Application of Iterative Methods	241
	15.4 Other Methods	243

16	SYSTEMS OF SINGULAR INTEGRAL EQUATIONS ARISING FROM QUANTUM FIELD THEORY	248
	16.1 Systems of Equations of the First Type	248
	16.2 Systems of Equations of the Second Type	250
17	THE COMPUTER SOLUTION OF A SYSTEM ARISING IN DISPERSION THEORY	255

CHAPTER 4

NUMERICAL SOLUTION OF SINGULAR INTEGRAL EQUATIONS OF CONVOLUTION TYPE

18	THE GENERAL FORM OF SINGULAR INTEGRAL EQUATIONS OF CONVOLUTION TYPE	265
19	WIENER-HOPF EQUATIONS OF THE SECOND KIND	268
20	WIENER-HOPF EQUATIONS OF THE FIRST KIND	271
21	APPLICATIONS IN THE THEORY OF AUTOMATIC CONTROL	278
	21.1 The Approximate Calculation of Fourier Transforms	278
	21.2 Approximation of the Transfer Function	282
	21.3 The Determination of the Dynamic Characteristics of Linear Filters with Constant Parameters	286
	21.4 The Numerical Solution of Statistical Linearization and the Synthesis of Optimum Linear Systems	292

CHAPTER 5

NUMERICAL SOLUTION OF OTHER FORMS OF SINGULAR EQUATIONS

22	INTEGRO-DIFFERENTIAL EQUATIONS	303
23	MULTI-DIMENSIONAL EQUATIONS	306
24	NON-LINEAR EQUATIONS	311
