Introduction, 1

1. Statement of the Problem, 1

Chapter

1. Theorems on the Existence of a Function $v(x_1, \dots, x_n, t)$, Satisfying the Conditions of Lyapunov's Theorems, 11

2. Preliminary Remarks, 11
3. Some Useful Lemmas, 12
4. Conditions for the Existence of a Lyapunov Function Having a Derivative dv/dt of Definite Sign, 16
5. Theorems on the Existence of a Function $v(x, t)$ that Satisfies the Conditions of Lyapunov's Theorem on Asymptotic Stability, 25
6. Theorems on the Existence of a Function $v(x, t)$ that Satisfies the Conditions of Lyapunov's First Theorem on Instability, 35
7. Theorems on the Existence of a Function $v(x, t)$ that Satisfies the Conditions of Lyapunov's Second Theorem on Instability, or Četaev's Theorem on Instability, 39

2. Some Modifications of Lyapunov's Theorems, 44

8. Preliminary Remarks, 44
9. Uniform Nonasymptotic Stability, 44
10. Generalizations of Lyapunov's Theorems on Asymptotic Stability when Stability is Nonuniform, 53
11. Lyapunov Functions that Satisfy Estimates Given in Terms of Quadratic Forms, 57
12. Modification of Četaev's Theorem on Instability, 63

3. Some Generalizations of Lyapunov's Theorems, 66

13. Preliminary Remarks, 66
14. Criteria for Asymptotic Stability, 66
15. Sufficient Criteria for Instability, 68
16. Criteria for Stability with Respect to Large Initial Perturbations, Based on Lyapunov's Theory of Stability of the Perturbed Trajectory $x(x_0, t_0, t)$, 70
17. Some Complements to the Theorems of Lyapunov, 76

4. Applications of Lyapunov's Method to Some General Problems of Stability, 80

- 18. Preliminary Remarks, 80
- 19. Structural Stability and Instability, 81
- 20. Criteria for Asymptotic Stability of Quasi-linear Systems, 86
- 21. Sufficient Conditions for the Asymptotic Stability of Solutions of Non-linear Systems of Differential Equations, 90
- 22. Theorems on m th-order Stability, 94

5. Applications of Lyapunov's Method to the Solution of Some Special Problems in Stability, 98

- 23. Preliminary Remarks, 98
- 24. Stability for Persistent Disturbances that are Bounded in the Mean, 100
- 25. Criteria for Asymptotic Stability in the Large for Some Nonlinear Systems, 109
- 26. Singular Cases, 123

6. General Theorems Concerning Lyapunov's Second Method for Equations with Time Delay, 126

- 27. Preliminary Remarks, 126
- 28. Statement of the Stability Problem for Equations with Time Delay, 130
- 29. Stability of Linear Systems of Equations with Time Delay, 133
- 30. Fundamental Definitions and Theorems of Lyapunov's Second Method for Equations with Time Delay, 143
- 31. Some Sufficient Conditions for Asymptotic Stability of Equations with Time Delay, 151

7. Application of Lyapunov's Method to the Problem of Stability of Equations with Time Delay, 161

- 32. Stability for Persistent Disturbances, 161
- 33. First-order Stability for Equations with Time Delay, 164
- 34. Construction of Functionals in Special Cases, 169
