

CONTENTS

Preface	xiii
Some qualitative features of the three-body problem RICHARD MOECKEL	1
Symmetry in n -particle systems DONALD G. SAARI	23
The charged isosceles 3-body problem PAU ATELA	43
Central configurations in R^2 and R^3 DIETER S. SCHMIDT	59
Stable manifolds in Hamiltonian systems CLARK ROBINSON	77
Reduction of Hamiltonian systems for singular values of momentum JUDITH M. ARMS	99
A variation on the Poincaré-Birkhoff theorem JOHN FRANKS	111
An analog of Sharkovski's theorem for twist maps PHILIP BOYLAND	119
Some problems on dynamics of annulus maps GLEN R. HALL	135
Area preserving homeomorphisms of two manifolds EDWARD E. SLAMINKA	153
An Anosov type stability theorem for almost periodic systems KENNETH R. MEYER	169
The prescribed energy problem for periodic solutions of Hamiltonian systems PAUL H. RABINOWITZ	183
Homoclinic and heteroclinic phenomena in some Hamiltonian systems CARLES SIMÓ	193

Exponentially small splittings of separatrices with applications to KAM theory and degenerate bifurcations	
PHILIP HOLMES, JERROLD MARSDEN and JURGEN SCHEURLE	213
The three point vortex problem: Commutative and non-commutative integrability	
MALCOLM ADAMS and TUDOR RATIU	245
On a theorem of Ziglin in Hamiltonian dynamics	
DAVID L. ROD	259
