

TABLE OF CONTENTS

CHAPTER

I. INTRODUCTION TO VOLTERRA INTEGRAL EQUATIONS

I.1	Volterra Integral Equations	1
I.2	Special Forms	4
I.3	Systems of Integral Equations	6
I.4	Differential Equations	8
I.5	Linear Superposition	12
I.6	Linear Equations of Convolution Type	13
I.7	The Laplace Transformation	21
I.8	Picard Successive Approximations	24
I.9	Caratheodory Successive Approximations	34
I.10	Some Examples of Odd Behavior	44
I.11	Sources of Volterra Integral Equations	60
I.12	Bibliography	73
I.13	Problems	74

CHAPTER

II. EXISTENCE, UNIQUENESS AND CONTINUITY OF SOLUTIONS

II.1	Local Existence and Uniqueness	85
II.2	Continuation of Solutions	93
II.3	Cross Sections	98
II.4	Continuity of Solutions	106
II.5	Maximal and Minimal Solutions	116
II.6	Comparison Theorems	120
II.7	Examples	124
II.8	Bibliography	138
II.9	Problems	139
II.10	Supplementary List of Hypotheses, Chapter II	146

CHAPTER

III. TRANSLATIONS, FLOWS AND LIMITING EQUATIONS

III.1	Introduction	149
III.2	Local Semiflows	153
III.3	Integral Equations As Semiflows	154
III.4	Well Posed Problems With Continuous Solutions	160
III.5	Solutions in L^p_p	164

III.6	A Class of Integro-differential Equations	170
III.7	Limiting Equations	171
III.8	Examples	178
III.9	Bibliography	182
III.10	Problems	183

CHAPTER

IV. THE RESOLVENT EQUATION

IV.1	The Resolvent Equation	189
IV.2	The L^p Case	193
IV.3	The Continuous Case	201
IV.4	L^1 Resolvent Kernels	203
IV.5	Resolvent Kernels of Class $L^1(\mathbb{R}^+)$	205
IV.6	A Heat Problem	207
IV.7	Complete Monotone Kernels	221
IV.8	Linear Reactor Dynamics	224
IV.9	Bibliography	242
IV.10	Problems	243

CHAPTER

V. OPERATOR METHODS

V.1	Admissible Operators	251
V.2	Examples of Admissible Operators: Cg Spaces	261
V.3	The Spaces BC and BM	267
V.4	Some Perturbation Problems	273
V.5	Asymptotically Periodic Functions	285
V.6	Solutions in L^2	295
V.7	The Popov Method With $\beta < \infty$	317
V.8	Bibliography	326
V.9	Problems	326

CHAPTER

VI. LYAPUNOV'S METHOD

VI.1	Preliminaries	338
VI.2	Lyapunov Functionals	342
VI.3	A Global Attractor Criterion	345
VI.4	First Example	347
VI.5	Second Example	356
VI.6	Extensions of the Examples	363

VI.7	The Popov Method	367
VI.8	Bibliography	381
VI.9	Problems	382

APPENDIX

I. REVIEW OF SOME TRANSFORM THEORY

I.1	Laplace-Steiltjes Transform	389
I.2	Tauberian Theorems of Abelian Type	393
I.3	Steiltjes Transform	403
I.4	Fourier Transforms	404
I.5	Bibliography	410

APPENDIX

II. REVIEW OF TOPOLOGY AND FUNCTIONAL ANALYSIS

II.1	Topological Spaces and Metric Spaces	411
II.2	Topological Vector Spaces	420
II.3	Frechet Spaces	427
II.4	Operators in Banach Spaces	429
II.5	Bibliography	436
