Chapter I. SIMULTANEOUS LINEAR EQUATIONS	3
1. Determinants	3
2. Solution of Linear Equations by Determinants . .	7
3. Homogeneous Equations.	11
4. The Method of Elimination.	15
5. Numerical Solution of Linear Equations	17
6. Symmetrical Equations.	24
7. Check on Accuracy of Computation	25
8. Evaluation of Determinants	26
9. Calculation of Cofactors	27
10. Magnitude of Inherent Errors	29
Chapter II. SOLUTION OF EQUATIONS BY SUCCESSIVE APPROXIMATIONS.	36
11. One Equation in One Unknown.	36
12. Exceptional Cases.	41
13. Simultaneous Equations	44
14. Successive Substitutions	47
15. Exceptional Cases.	49
16. Complex Roots of Algebraic Equations	53
17. Solutions of λ -determinants.	57
Chapter III. INTERPOLATION.	63
18. Interpolating Functions.	63
19. Linear Interpolation	68
20. Aitken's Process of Iteration.	69
21. Neville's Method of Iteration.	72
22. Inverse Interpolation.	73
23. The Error in Polynomial Interpolation.	78
24. Lagrange's Interpolation Formula	83
25. Equally Spaced Points.	89

	Page
Chapter IV. NUMERICAL DIFFERENTIATION AND INTEGRATION	93
26. Numerical Differentiation	93
27. Differentiation Formulas for Equally Spaced Points.	96
28. Numerical Integration	100
29. Undetermined Coefficients	104
30. Investigation of the Error.	108
31. Calculation of the Error.	114
32. The Trapezoidal Rule.	116
33. Simpson's Rule.	120
34. Newton-Cotes Quadrature Formulas, Closed Type .	122
35. Newton-Cotes Quadrature Formulas, Open Type . .	126
36. Summary	127
Chapter V. NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS	131
37. First Method.	132
38. Second Method	134
39. Equations of Second Order	138
40. Special Formulas for Second-Order Equations . .	140
41. Simultaneous Equations.	141
42. Use of Five-term Formulas	142
Chapter VI. FINITE DIFFERENCES.	145
43. Factorial Polynomials	145
44. The Binomial Coefficients	150
45. Finite Differences.	154
46. Detection of Errors	158
47. Newton's Binomial Interpolation Formula, Forward Differences	160
48. Newton's Binomial Interpolation Formula, Backward Differences.	161
49. Gauss's Interpolation Formulas.	163
50. Central Differences. Stirling's Formula.	172

	Page
51. Everett's Central Difference Formula	178
52. Bessel's Formula	181
53. Tabulation of Polynomials.	183
54. Subtabulation.	185
55. Derivatives in Terms of Differences	191
56. Integral of Newton's Interpolation Formula . . .	193
57. Symmetric Integrals of Stirling's Formula. . . .	196
58. Integral of Everett's Formula.	197
Chapter VII. DIVIDED DIFFERENCES.	201
59. Definition of Divided Differences.	201
60. The Interpolating Polynomial in Terms of Divided Differences.	207
61. Other Forms of the Interpolating Polynomial. . .	215
Chapter VIII. RECIPROCAL DIFFERENCES	219
62. Approximation by Means of Rational Fractions . .	219
63. Reduction of the Determinant	221
64. Reciprocal Differences	226
65. Further Properties of Reciprocal Differences . .	232
66. Exceptional Cases.	236
Chapter IX. POLYNOMIAL APPROXIMATION BY LEAST SQUARES.	242
67. Least Squares.	242
68. Further Investigation of Least Squares	250
69. Least Squares for Integrals.	255
70. Orthogonal Polynomials	257
71. Use of Orthogonal Polynomials.	263
72. Orthogonal Polynomials. Equally Spaced Points .	265
73. Graduation, or Smoothing of Data	275
74. Alternative Treatment of Smoothing Formulas. . .	280
75. Gauss's Method of Numerical Integration.	285
Chapter X. OTHER APPROXIMATIONS BY LEAST SQUARES. .	291
76. General Problem of Approximation by Least Squares.	291

	Page
77. Fundamental Theorem	292
78. Trigonometric Approximation	294
79. Harmonic Analysis	300
80. Calculation of Coefficients	302
81. The Gram-Charlier Approximation	309
82. Case of Discrete Points	317
Chapter XI. SIMPLE DIFFERENCE EQUATIONS	324
83. Solution of a Difference Equation	324
84. Calculus of Differences	328
85. The Difference Equation	331
86. Exact Equations	337
87. Linear Difference Equations of Order Higher Than the First	341
88. Linear Equations, Variable Coefficients	346
Appendix A. NOTATION AND SYMBOLS.	351
Appendix B. TEXTS, TABLES, AND BIBLIOGRAPHIES	353
Appendix C. CLASSIFIED GUIDE TO FORMULAS AND METHODS.	359
Tables. I. Binomial Coefficients $\binom{n}{k}$	365
II. Interpolation Coefficients $\binom{s}{k}$ for Newton's Binomial Interpolation Formula.	366
III. Everett's Interpolation Coefficients	369
IV. Lagrange's Coefficients for Five Equally Spaced Points.	371
V. Legendre's Polynomials (Adapted to the Interval $0 \leq x \leq 1$)	373
VI. Orthogonal Polynomials for $n + 1$ Equally Spaced Points.	375
VII. Integrals of Binomial Coefficients, $\int_0^s \binom{t}{k} dt$	382
VIII. Gamma and Digamma Functions.	383
INDEX.	385
