CONTENTS

Asterisk denotes the author who presented the paper at the symposium.

CONTRIBUTORS ix
PREFACE xv

Theorems of Korovkin Type for Positive Linear Operators on Banach Lattices 1
H. Berens and G. G. Lorentz*

A Survey of Work on Approximation at Aachen, 1968-1972 31
P. L. Butzer

Uniform Algebras on Plane Sets 101
T. W. Gamelin

Topics in Multivariate Approximation Theory 151
Joseph W. Jerome

A Review of Müntz-Jackson Theorems. 199
D. J. Newman

Additional Remarks to the Paper of D. J. Newman 213
M. v. Golitschek

Approximation by C^k-Functions 217
Daniel Wulbert

Characterizations of Generalized Convex Functions by Their Best L^p-Approximations. 241
*Dan Amir and Zvi Ziegler**

The Separable Projection Property 247
John Warren Baker

Approximation and Intergral Representation for Operators on Bounded Analytic Functions. 251
M. W. Bartelt

Inclusions, Interposition and Approximation 257
J. Blatter and G. L. Seever*

A Survey of Recent Results and Problems in the Study of Convolution Products of Sequences 263
R. Bojanic and Y. H. Lee*

The Quasi-Interpolant as a Tool in Elementary Polynomial Spline Theory 269
Carl de Boor

Global Analysis and Chebyshev Approximation by Exponentials 277
Dietrich Braess

A Variational Inequality and Some Applications in Approximation Theory 283
*B. Brosowski and K.-H. Hoffmann**

Extremal Positive Splines with Applications 291
Hermann Burchard

On Simultaneous L_1 Approximation 295
M. P. Carroll

A Korovkin Theorem for Finitely Defined Operators 299
A. S. Cavaretta, Jr.

Approximation of Functions from Their Means 307
Charles K. Chui and Chin-Hung Ching*

Extended Error Bounds for Spline and L-Spline Interpolation 313
*Stephen Demko and Richard S. Varga**

Cardinality of Extreme Points of the Unit Sphere with Applications to Nonexistence Theorems in Approximation Theory. . 319
Frank Deutsch

An Extension of Bernstein's Inequality 325
Ronald DeVore

Varisolvent Chebyshev Approximation on Subsets 337
Charles B. Dunham

Butterworth and Chebyshev Splines 341
Rui J. P. de Figueiredo

A Proof of Cauchy's Integral Theorem Using Bernstein Polynomials 345
*L. Flatto and O. Shisha**

Degree of Approximation by Polynomials on Compact Plane Sets 347
Tord H. Ganelius

Permissible Bounds on the Coefficients of Generalized Polynomials . . . 353
M. v. Golitschek

Bohr Type Inequalities for Fourier Expansions in Banach Spaces 359
E. Görlich

The Spline Interpolation of Sequences Satisfying
a Linear Recurrence Relation 365
*T. N. E. Greville, I. J. Schoenberg,and A. Sharma**

Some Spaces Where Best Uniform Approximation Always Fails 369
Alfred P. Hallstrom

On the Construction of Multivariate Spline Systems 373
Werner Haussmann and Heinz Josef Münch*

On the Existence of Best Analytic Approximations 379
William Hintzman

Existence of Best Approximations by Exponential Sums in
Several Independent Variables 383
David W. Kammler

Approximation on Curves by Linear Combinations of Exponentials . . . 387
J. Korevaar

Discretization of Approximation Problems in the View of Optimization . . 395
Werner Krabs

Exchange Algorithm in Convex Analysis 403
P. J. Laurent

The Constant Error Curve Problem for Varisolvent Families 411
William H. Ling and J. Edward Tornga*

Some Minimum Problems for Spline Functions
with Applications to Quadrature Formulas 415
C. A. Micchelli

Approximations of Generalized Inverses
of Linear Operators in Banach Spaces 425
*R. H. Moore and M. Z. Nashed**

Recent Results on Minimal Projections 429
P. D. Morris

Some Remarks on Pointwise Saturation 433
G. Mühlbach

A Linear Best Approximation Operator 441
K. H. Price and E. W. Cheney*

Approximation Theory and Absolute Convergence of Fourier Series on Compact Lie Groups 445
David L. Ragozin

On the Computational Complexity of Approximation Operators 449
John R. Rice

Mergelyan Sets and the Modulus of Continuity 457
L. A. Rubel, A. L. Shields, and B. A. Taylor*

On Semi-Cardinal Quadrature Formulae 461
I. J. Schoenberg and S. D. Silliman*

Constructive Aspects of Discrete Polynomial Spline Functions 469
Larry L. Schumaker

Two Theorems on Suns in Continuous Function Spaces 477
Paul Schwartz

Approximation by Functions with Restricted Ranges 481
Wilhelm Sippel

Characterization of the Function Class $W^{m,p}$ 485
P. W. Smith

Approximation of a Class of Unbounded Functions 491
*J. J. Swetits and B. Wood**

Uniform Approximation with Side Conditions 495
Gerald D. Taylor

Fourier Multipliers on $L^p(R^n)$ in Connection with Bounded Riesz Means . 505
Walter Trebels

The Approximation of Functions by Certain Trigonometric Interpolation Polynomials 511
A. K. Varma

A General Theorem of Korovkin Type for Vector Lattices 517
Manfred Wolff

Monotone Approximation 523
K. L. Zeller
