Splines as Linear Combinations of <i>B</i> -Splines:	
A Survey	1
<i>Carl de Boor</i>	
Nonlinear Approximation	49
<i>Dietrich Braess</i>	
Recent Results on Padé Approximants and Related Problems	79
<i>Charles K. Chui</i>	
Degree of Approximation	117
<i>Ronald A. DeVore</i>	
Lagrange Interpolation at Zeros of Orthogonal Polynomials	163
<i>G. P. Nevai</i>	
Fitting Surfaces to Scattered Data	203
<i>Larry L. Schumaker</i>	
Approximations of Entire Functions and Coding of Signals with a Finite Spectrum	269
<i>A. G. Vituškin</i>	
On the Convergence of Smooth Monosplines to Polynomial Monosplines	283
<i>R. B. Barrar and H. L. Loeb</i>	
Quantitative Korovkin Theorems for L_p -Spaces	289
<i>H. Berens and R. DeVore</i>	
Reflexivity and the Existence of Best Approximations	299
<i>Jörg Blatter</i>	
Approximate Functional Complexity	303
<i>R. Creighton Buck</i>	
Best Uniform Harmonic Approximation	309
<i>H. G. Burchard</i>	
Fractional Chebyshev Operational Calculus and Best Algebraic Approximation	315
<i>P. L. Butzer and R. L. Stens</i>	
On the Computation of Minimal Projections from $C[0, 1]$ to $P_n[0, 1]$	321
<i>B. L. Chalmers and F. T. Metcalf</i>	
Approximation of Fixed Points of Contractive and Expanding Operators	327
<i>L. Collatz</i>	
On Saturation Theorems	341
<i>Z. Ditzian</i>	
Extremal Problems on Polynomials	347
<i>P. Erdős</i>	
Some Nonlinear Variational Problems	357
<i>Stephen D. Fisher</i>	
The Problem of Minimal Projections in L_1 Spaces	365
<i>C. Franchetti and E. W. Cheney</i>	
Markov-Bernstein Type Inequalities in $L_p(-\infty, \infty)$	369
<i>Geza Freud</i>	

A Semi-Infinite Linear Programming Procedure and Applications to Approximation Problems in Optimal Control	379
<i>K. -H. Hoffmann and A. Klostermair</i>	
M-Ideals in Approximation Theory	391
<i>R. B. Holmes</i>	
Rolle Regular Birkhoff Interpolation	397
<i>L. Jaffe</i>	
Birkhoff Interpolation by Splines	405
<i>K. Jetter</i>	
Nonuniqueness of Simultaneous Approximation by Trigonometric Polynomials	411
<i>Darell J. Johnson</i>	
Approximation by Polynomials with Restricted Coefficients	417
<i>D. Leviatan</i>	
Regularity of Some Special Birkhoff Matrices	423
<i>G. G. Lorentz, S. S. Stangler, and K. L. Zeller</i>	
Müntz-Szász Type Approximation Results and the Paley-Wiener Theorem	437
<i>W. A. J. Luxemburg</i>	
Interpolation to Boundary Data in Triangles with Application to Compatible Finite Elements	449
<i>Lois Mansfield</i>	
Convergence Results for Cardinal Hermite Splines	457
<i>M. J. Marsden and S. D. Riemenschneider</i>	
n-Width under Restricted Approximations	463
<i>Avraham A. Melkman</i>	
The Exact Asymptotic Value for the N-Width of Smooth Functions in L^∞	469
<i>Charles A. Micchelli and Allan Pinkus</i>	
On n-Widths and Optimal Recovery in M^r	475
<i>Charles A. Micchelli and Allan Pinkus</i>	
On Nikolskii-Type Inequalities for Orthogonal Expansions	479
<i>R. J. Nessel and G. Wilmes</i>	
Hybrid Finite Element Methods	485
<i>J. T. Oden</i>	
On Simple Intergrability and Bounded Coarse Variation	491
<i>Charles F. Osgood and Oved Shisha</i>	
Shape Preserving Spline Interpolation	503
<i>Eli Passow and John A. Roulier</i>	
Negative Theorems on Convex Approximation	509
<i>Eli Passow and John A. Roulier</i>	
Approximation by Circles	513
<i>T. J. Rivlin</i>	
The Behavior of the Padé Table for the Exponential	519
<i>E. B. Saff and R. S. Varga</i>	
Calculation of Best Approximations by Rational Splines	533
<i>R. Schaback</i>	
Maximum Norm Error Estimates in the Finite Element Method for Poisson Equation on Plane Domains with Corners	541
<i>A. H. Schatz and L. B. Wahlbin</i>	
Some Inverse Theorems for Best Approximation by Λ -Splines	549
<i>Karl Scherer</i>	
A Generalization of a Result of Subbotin	557
<i>A. Sharma and J. Tzimbarario</i>	

CONTENTS

On the Smoothness of Local Best L_p Spline Approximations 563
Philip W. Smith

Approximation by Regular Splines with Free Knots 567
H. Werner

An Approximation Proof in the Theory of Complex L_1 -Preduals 575
Daniel Wulbert

Approximation in a Normed Space; New Foundations and Methods 581
Marc Zamansky
