

CONTENTS

J. C. ALEXANDER		
	Numerical continuation methods and bifurcation	1
W. ALT		
	Periodic solutions of some autonomous differential equations with variable time delay	16
N. ANGELSTORF		
	Global branching and multiplicity results for periodic solutions of functional differential equations	32
O. ARINO - P. SEGUIER		
	Existence of oscillating solutions for certain differential equations with delay	46
H. T. BANKS		
	Approximation of delay systems with applications to control and identification	65
S. N. CHOW - J. MALLET-PARET - J. A. YORKE		
	Homotopy method for locating all zeros of a system of polynomials	77
B. C. EAVES		
	A view of complementary pivot theory (or solving equations with homotopies)	89
W. FORSTER		
	On numerical approximation of fixed points in $C[0,1]$	112
K. GEORG		
	An application of simplicial algorithms to variational inequalities	126

K. P. HADELER		
Delay equations in biology		136
J. K. HALE		
Retarded equations with infinite delays		157
G. HETZER		
A degree continuation theorem for a class of compactly perturbed differentiable Fredholm maps of index 0		194
J. L. KAPLAN - J. A. YORKE		
Chaotic behavior of multidimensional difference equations		204
J. L. KAPLAN - J. A. YORKE		
Numerical solution of a generalized eigenvalue problem for even mappings		228
K. KUNISCH - W. SCHAPPACHER		
Positive solutions of functional differential equations		238
G. V. D. LAAN - A. J. J. TALMAN		
A restart algorithm without an artificial level for computing fixed points on unbounded regions		247
T. Y. LI - J. A. YORKE		
Path following approaches for solving nonlinear equations: Homotopy, continuous Newton and projection		257
J. A. NOHEL		
A nonlinear singularly perturbed Volterra functional differential equation		265

R. D. NUSSBAUM		
Periodic solutions of nonlinear autonomous functional differential equations		283
H.-O. PEITGEN - M. PRÜFER		
The Leray-Schauder continuation method is a constructive element in the numerical study of nonlinear eigenvalue and bifurcation problems		326
M. PRÜFER - H. W. SIEGBERG		
On computational aspects of topological degree in \mathbb{R}^n		410
R. SAIGAL - Y. S. SHIN		
Perturbations in fixed point algorithms		434
J. SCHEURLE		
Bifurcation of a stationary solution of a dynamical system into n-dimensional tori of quasiperiodic solutions		442
K. SCHMITT		
Periodic solutions of delay-differential equations		455
M. J. TODD		
Hamiltonian triangulations of \mathbb{R}^n		470
A. J. TROMBA		
The beer barrel theorem		484
H. O. WALTHER		
On instability, ω -limit sets and periodic solutions of nonlinear autonomous differential delay equations		489
