

Contents

Preface	ix
Higher Order Local Accuracy by Averaging in the Finite Element Method	1
<i>J. H. Bramble</i>	
<i>A. H. Schatz</i>	
Cornell University	
Ithaca, New York	
Convergence of Nonconforming Methods	15
<i>J. A. Nitsche</i>	
Institut für Angewandte Mathematik	
Universität Freiburg	
Germany	
Some Convergence Results for Galerkin Methods for Parabolic Boundary Value Problems	55
<i>Vidar Thomée</i>	
Chalmers University of Technology and	
The University of Göteborg	
Göteborg, Sweden	
On a Finite Element Method for Solving the Neutron Transport Equation	89
<i>P. Lasaint</i>	
Service de Mathématiques Appliquées	
Centre d'Etudes de Limeil, France	
<i>P.-A. Raviart</i>	
Analyse Numérique, Université de Paris VI	
France	

CONTENTS

A Mixed Finite Element Method for the Biharmonic Equation	125
<i>P. G. Ciarlet</i>	
<i>P.-A. Raviart</i>	
Analyse Numérique, Université de Paris VI	
France	
A Dissipative Galerkin Method for the Numerical Solution of First Order Hyperbolic Equations	147
<i>Lars B. Wahlbin</i>	
University of Chicago	
Chicago, Illinois	
C^1 Continuity via Constraints for 4th Order Problems	171
<i>Ridgway Scott</i>	
University of Chicago	
Chicago, Illinois	
Finite Element and Finite Difference Methods for Hyperbolic Partial Differential Equations	195
<i>H.-O. Kreiss</i>	
<i>G. Scherer</i>	
Uppsala University	
Uppsala, Sweden	
Solution of Problems with Interfaces and Singularities	213
<i>Ivo Babuška</i>	
Institute for Fluid Dynamics	
University of Maryland, College Park, Maryland	
The Construction and Comparison of Finite Difference Analogues of Some Finite Element Schemes	279
<i>Blair K. Swartz</i>	
Los Alamos Scientific Laboratory	
University of California	
Los Alamos, New Mexico	
L_2 Error Estimates for Projection Methods for Parabolic Equations in Approximating Domains	313
<i>Todd Dupont</i>	
University of Chicago	
Chicago, Illinois	

CONTENTS

An H^{-1} -Galerkin Procedure for the Two-Point Boundary Value Problem	353
<i>H. H. Rachford, Jr.</i>	
<i>Mary F. Wheeler</i>	
Rice University	
Houston, Texas	
H^1 -Galerkin Methods for the Laplace and Heat Equations	383
<i>Jim Douglas, Jr.</i>	
<i>Todd Dupont</i>	
University of Chicago	
Chicago, Illinois	
<i>Mary F. Wheeler</i>	
Rice University	
Houston, Texas	
Index	417
