

CONTENTS

Preface	vii
Numerical Solution of the Reactor Kinetics Equations, GARRETT BIRKHOFF, Harvard University, Cambridge, Massachusetts	3
Some Numerical Results for the Solution of the Heat Equation Backwards in Time, J. R. CANNON, Purdue University, Lafayette, Indiana	21
The Solution of van der Pol's Equation in Chebyshev Series, C. W. CLENSHAW, National Physical Laboratory, Middlesex, England	55
Monotonicity and Related Methods in Non-Linear Differential Equations Problems, L. COLLATZ, Universität Hamburg, West Germany	65
On Rigorous Error Bounds in the Numerical Solution of Ordinary Differential Equations, GERMUND G. DAHLQUIST, Royal Institute of Technology, Stockholm, Sweden	89
The Numerical Solution of Non-Linear Optimal Control Problems, STUART E. DREYFUS, RAND Corporation, Santa Monica, California	97
Numerical Studies of Steady Viscous Flow About Cylinders, H. B. KELLER and H. TAKAMI, Courant Institute of Mathematical Sciences, New York University, New York .	115
Difference Approximations for the Initial-Boundary Value Problem for Hyperbolic Differential Equations, HEINZ- OTTO KREISS, University of Uppsala, Uppsala, Sweden .	141

A Leray-Schauder Principle for A-Compact Mappings and The Numerical Solution of Non-Linear Two-Point Boundary Value Problems, M. LEES and M. H. SCHULTZ, Case Institute of Technology, Cleveland, Ohio	167
A General Theory for the Numerical Solution of the Equations of Hydrodynamics, WILLIAM F. NOH, Lawrence Radiation Laboratory, Livermore, California	181
Maximal Solutions of Mildly Non-Linear Elliptic Equations, SEYMOUR V. PARTER, Mathematics Department, University of Wisconsin, Madison	213
On Some Non Well Posed Problems for Partial Differential Equations, L. E. PAYNE, Cornell University, Ithaca, New York	239
Approximate Computational Solution of Non-Linear Para- bolic Partial Differential Equations by Linear Programming, J. B. ROSEN, Mathematics Research Center and Department of Computer Sciences, University of Wisconsin, Madison	265
Galerkin's Procedure for Non-Linear Periodic Systems and its Extension to Multi-Point Boundary Value Problems for General Non-Linear Systems, MINORU URABE, Kyushu University, Fukuoka, Japan	297
Abstracts of Contributed Papers	329
Subject Index	345
