

C O N T E N T S

A.M.A. Abou-El-Ela:

A stability result for the solutions of a certain system of third-order differential equations	1
--	---

H.D. Alber:

A local existence theorem for the quasilinear wave equation with initial values of bounded variation	9
--	---

S.S. Antman:

Bifurcation problems associated with nonlinear wave propagation	25
---	----

B. Aulbach:

Conditions for a limit set to be a singleton	35
--	----

J. Bell:

A hydrodynamical model of the sea hare's propulsive mechanism	42
---	----

I. Bihari:

Periodic solutions of some second order nonlinear differential equations with periodic coefficients	49
---	----

M. Biroli:

Wiener obstacles for the biharmonic operator	60
--	----

N. Bleistein:

Inverse methods for reflector imaging	68
---	----

N.F. Britton:

Travelling wave front solutions of a differential-difference equation arising in the modelling of myelinated nerve axon	77
---	----

Gail A. Carpenter:

The non-parametric influence of light on mammalian circadian rhythms	90
--	----

R. Chiappinelli:

On bifurcation for nondifferentiable perturbations of selfadjoint operators	109
---	-----

Chin Yuan-Shun:

On surfaces defined by ordinary differential equations: a new approach to Hilbert's 16th problem	115
--	-----

Dung Xuan Nguyen:

Self-adjointness for general elliptic operators with Sobolev-type coefficients	132
--	-----

A. Elbert:

On a Nehari's constant 142

J. Fleckinger-Pelle:

Asymptotics of eigenvalues for some "non-definite" elliptic problems 148

I.M. Gali, H.A. El-Saify and S.A. El-Zahabi:

Optimal control of a system governed by hyperbolic operator 157

H. Gingold and Po-Fang Hsieh:

A global study of a Hamiltonian system with multi turning points 164

S.R. Grace and B.S. Lalli:

Some further results on oscillatory behaviour of solutions of nth order
delay differential equations 172

P. Grindrod:

A model for a myelinated nerve axon 183

Guo Ben Yu and B.D. Sleeman:

Spatial patterning of the spruce budworm in the presence of defoliation 192

K.P. Hadeler:

Vector models for infectious diseases 204

F.A. Howes:

Multi-dimensional reaction-convection-diffusion equations 217

R. Iannacci and M.N. Nkashama:

On periodic solutions of forced second order differential equations with a
deviating argument 224

Lin Zhen-sheng:

The theory of quasi periodic motions 233

W.E. Mahfoud:

Stability criteria for linear integro-differential equations 243

P.K. Maini, J.D. Murray and G.F. Oster:

A mechanical model for biological pattern formation: a nonlinear bifurcation
analysis 252

S.E.A. Mohammed:

Almost surely non-linear solutions of stochastic linear delay equations 270

P. Morales:

Properties of the set of global solutions for the Cauchy problem in a
locally convex topological vector space276

P. Omari and F. Zanolin:

Boundary value problems for forced nonlinear equations at resonance285

P.H. Rabinowitz:

Periodic-solutions of prescribed period for Hamiltonian systems295

J. Rinzel:

Bursting oscillations in an excitable membrane model304

H.C. Sager:

Semilinear second order evolution equations and regular boundary conditions 317

J. Smoller and A. Wasserman:

Symmetry-breaking for semilinear elliptic equations325

R.P. Soni and K. Soni:

On a boundary value problem associated with some difference-differential
equations335

J.R.L. Webb and S.C. Welsh:

A-proper maps and bifurcation theory342

A.I. Zayed:

On the singularities and asymptotic expansions of singular Sturm-Liouville
expansions350
