

Contents

Foreword	vii
Preface	ix
Computational Methods in Special Functions—A Survey	1
<i>Walter Gautschi</i>	
Purdue University, West Lafayette, Indiana	
Unsolved Problems in the Asymptotic Estimation of Special Functions	99
<i>F. W. J. Olver</i>	
University of Maryland, College Park, Maryland	
Periodic Bernoulli Numbers, Summation Formulas and Applications	143
<i>Bruce C. Berndt</i>	
University of Illinois at Urbana-Champaign, Urbana, Illinois	
Problems and Prospects for Basic Hypergeometric Functions	191
<i>George E. Andrews</i>	
Pennsylvania State University, University Park, Pennsylvania	
An Introduction to Association Schemes and Coding Theory	225
<i>N. J. A. Sloane</i>	
Bell Telephone Laboratories, Murray Hill, New Jersey	
Linear Growth Models with Many Types and Multidimensional Hahn Polynomials	261
<i>S. Karlin and J. McGregor</i>	
Stanford University, Stanford, California	

CONTENTS

Orthogonal Polynomials Revisited	289
<i>K. M. Case</i>	
The Rockefeller University, New York, New York	
Symmetry, Separation of Variables, and Special Functions	305
<i>Willard Miller, Jr.</i>	
University of Minnesota, Minneapolis, Minnesota	
Nicholson-Type Integrals for Products of Gegenbauer Functions and Related Topics	353
<i>L. Durand</i>	
University of Wisconsin—Madison, Madison, Wisconsin	
Positivity and Special Functions	375
<i>George Gasper</i>	
Northwestern University, Evanston, Illinois	
Two-Variable Analogues of the Classical Orthogonal Polynomials	435
<i>Tom Koornwinder</i>	
Mathematical Centre, Amsterdam, The Netherlands	
Special Functions of Matrix and Single Argument in Statistics	497
<i>Alan T. James</i>	
The University of Adelaide, Adelaide, South Australia	
Some Properties of Determinants of Orthogonal Polynomials	521
<i>Samuel Karlin and James McGregor</i>	
Stanford University, Stanford, California	
Index	551
