

## CONTENTS

### I. MATHEMATICAL FOUNDATIONS

#### K. ITÔ: \*

Stochastic Differentials of Continuous Local Quasi-Martingales. . . 1

#### P. MANDL:

An Application of Itô's Formula to Stochastic Control Systems . . . 8

#### A. FRIEDMAN:\*

Stability and Angular Behavior of Solutions of Stochastic  
Differential Equations. . . . . 14

#### T. MOROZAN:

Boundedness Properties for Stochastic Systems . . . . . 21

### II. IDENTIFICATION AND FILTERING

#### K.J. ÅSTRÖM:\*

System Identification . . . . . 35

#### D.Q. MAYNE:

Parametrization and Identification of Linear Multivariable  
Systems . . . . . 56

#### A. PENSOUSSAN:

Optimization of Sensors' Location in a Distributed Filtering  
Problem . . . . . 62

#### T.E. DUNCAN:

Some Banach-Valued Processes with Applications. . . . . 85

### III. STOCHASTIC STABILITY I

#### H.J. KUSHNER:\*

Stochastic Stability. . . . . 97

#### U.G. HAUSSMANN:

Stabilization of Linear Systems with Multiplicative Noise . . . . 125

J.L. WILLEMS:

Lyapunov Functions and Global Frequency Domain Stability  
Criteria for a Class of Stochastic Feedback Systems . . . . . 139

D.J.G. JAMES:

Stability of Model-Reference Systems with Random Inputs . . . . . 147

W. WEDIG:

Regions of Instability for a Linear System with Random  
Parametric Excitation . . . . . 160

T. NAKAMIZO and Y. SAWARAGI:

Analytical Study on n-th Order Linear System with Stochastic  
Coefficients. . . . . 173

IV. STOCHASTIC STABILITY IIF. KOZIN: \*

Stability of the Linear Stochastic System . . . . . 186

Ch.J. HARRIS:

The Fokker-Planck-Kolmogorov Equation in the Analysis of Non-  
linear Feedback Stochastic Systems. . . . . 230

J.A. LEPORE and R.A. STOLTZ:

Stability of Linear Cylindrical Shells Subjected to Stochastic  
Excitations . . . . . 239

R.W. BROCKETT and J.C. WILLEMS:

Average Value Criteria for Stochastic Stability . . . . . 252

P.R. SETHNA:

Ultimate Behaviour of a Class of Stochastic Differential Systems  
Dependent on a Parameter. . . . . 273

H. BUNKE:

Stable Periodic Solutions of Weakly Nonlinear Stochastic  
Differential Equations. . . . . 283

V. APPLICATIONSS.T. ARIARATNAM: \*

Stability of Mechanical Systems under Stochastic Parametric  
Excitation. . . . . 291

L.A. MYSAK:

Waves in a Rotating Stratified Fluid with Laterally Varying  
Random Inhomogeneities. . . . . 303

P.S. SAGIROW:

The Stability of a Satellite with Parametric Excitation by the  
Fluctuations of the Geomagnetic Field . . . . . 311

VI. OTHER CONTRIBUTIONS (not presented at the meeting)V.G. KOLOMIETZ:

Application of Averaging Principle in Nonlinear Oscillatory  
Stochastic Systems. . . . . 317

V.V. SOLODOVNIKOV and V.F. BIRIUKOV:

Optimization of Multi-Dimensional Stochastic Systems and  
Stability of Solutions. . . . . 324

\* These were key-note lectures
