APPROXIMATION IN ABSTRACT SPACES

Applications of Fixed-point Theorems to Approximation Theory	1
<i>E.W. Cheney</i>	
Weighted Polynomial Approximation and K-Functionals	9
<i>Géza Freud</i>	
Continuity Theorems for the Product Approximation Operator	24
<i>M.S. Henry and D. Schmidt</i>	
Some Remarks on the Estimation of Quadratic Functionals	43
<i>F.M. Larkin</i>	
On Alternation in the Restricted Range Problem	64
<i>William H. Ling</i>	
Some Results on the Dual of an Approximation Problem	76
<i>S.J. Poreda</i>	
Best Least Square Approximation by Minimum Property of Fourier Expansions	86
<i>Chung-Lie Wang</i>	

CONTENTS

INTERPOLATION, SPLINE, AND GENERAL APPROXIMATION

Splines in Orlicz Spaces	101
<i>J. Baumeister</i>	
Geometric Convergence of Rational Functions to the Reciprocal of Exponential Sums on $[0, \infty]$	111
<i>Hans-Peter Blatt</i>	
On Local Linear Functionals Which Vanish at All B-Splines but One	120
<i>Carl de Boor</i>	
Spline Approximation in Banach Function Spaces	146
<i>Stephen Demko</i>	
Chebyshev Nodes for Interpolation on a Class of Ellipses	155
<i>K.O. Geddes</i>	
RRAS Approximation of Differentiable Functions	171
<i>Darell J. Johnson</i>	
On the Expansion of Exponential Type Integrals in Series of Chebyshev Polynomials	180
<i>Yudell L. Luke</i>	
Neville-Aitken Algorithms for Interpolation by Functions of Chebyshev-Systems in the Sense of Newton and in a Generalized Sense of Hermite	200
<i>G. Mühlbach</i>	
Best Simultaneous Approximation in the L_1 and L_2 Norms	213
<i>G.M. Phillips and B.N. Sahney</i>	
Comonotone Approximation and Piecewise Monotone Interpolation	220
<i>Louis Raymon</i>	

CONTENTS

Angular Overconvergence for Rational Functions Converging Geometrically on $(0, +\infty)$	238
<i>E.B. Saff and R.S. Varga</i>	
A Generalization of Monosplines and Perfect Splines	257
<i>A. Sharma and J. Tzimbalario</i>	
Zero Properties of Splines <i>J. Tzimbalario</i>	268
APPLICATIONS	
A Review of the Remez Exchange Algorithm for Approximation with Linear Restrictions	278
<i>Bruce L. Chalmers</i>	
An Algorithm for Constrained, Non-linear, Tchebycheff Approximations	298
<i>Gary A. Gislason</i>	
Transfinite Interpolation and Applications to Engineering Problems	308
<i>Charles A. Hall</i>	
Some Remarks on Best Simultaneous Approximation	332
<i>A.S.B. Holland and B.N. Sahney</i>	
The Numerical Solution of the Hilbert Problem	338
<i>Y. Ikebe, T. Y. Li, and F. Stenger</i>	
On Adaptive Piecewise Polynomial Approximation	359
<i>John R. Rice</i>	
Extremals and Zeros in Markov Systems Are Monotone Functions of One Endpoint	387
<i>Roy L. Streit</i>	
<i>Author Index</i>	402
<i>Subject Index</i>	404
