

CONTENTS

<i>Preface</i>	v
CHAPTER 1. ORDINARY DIFFERENTIAL EQUATIONS IN MORE THAN TWO VARIABLES	1
1. Surfaces and Curves in Three Dimensions	1
2. Simultaneous Differential Equations of the First Order and the First Degree in Three Variables	7
3. Methods of Solution of $dx/P = dy/Q = dz/R$	10
4. Orthogonal Trajectories of a System of Curves on a Surface	15
5. Pfaffian Differential Forms and Equations	18
6. Solution of Pfaffian Differential Equations in Three Variables.	26
7. Carathéodory's Theorem.	33
8. Application to Thermodynamics	39
Miscellaneous Problems	42
CHAPTER 2. PARTIAL DIFFERENTIAL EQUATIONS OF THE FIRST ORDER	44
1. Partial Differential Equations	44
2. Origins of First-order Partial Differential Equations	45
3. Cauchy's Problem for First-order Equations	47
4. Linear Equations of the First Order	49
5. Integral Surfaces Passing through a Given Curve	56
6. Surfaces Orthogonal to a Given System of Surfaces	57
7. Nonlinear Partial Differential Equations of the First Order	59
8. Cauchy's Method of Characteristics	61
9. Compatible Systems of First-order Equations	67
10. Charpit's Method	69
11. Special Types of First-order Equations.	70
12. Solutions Satisfying Given Conditions	73
13. Jacobi's Method	78
14. Applications of First-order Equations	81
Miscellaneous Problems	85
CHAPTER 3. PARTIAL DIFFERENTIAL EQUATIONS OF THE SECOND ORDER	88
1. The Origin of Second-order Equations	88
2. Second-order Equations in Physics	90
3. Higher-order Equations in Physics	94

4. Linear Partial Differential Equations with Constant Coefficients	96
5. Equations with Variable Coefficients	105
6. Characteristic Curves of Second-order Equations	110
7. Characteristics of Equations in Three Variables	115
8. The Solution of Linear Hyperbolic Equations	119
9. Separation of Variables	123
10. The Method of Integral Transforms	126
11. Nonlinear Equations of the Second Order	131
Miscellaneous Problems	136
 CHAPTER 4. LAPLACE'S EQUATION	141
1. The Occurrence of Laplace's Equation in Physics	141
2. Elementary Solutions of Laplace's Equation	145
3. Families of Equipotential Surfaces	148
4. Boundary Value Problems	151
5. Separation of Variables	156
6. Problems with Axial Symmetry	161
7. Kelvin's Inversion Theorem	164
8. The Theory of Green's Function for Laplace's Equation	167
9. The Relation of Dirichlet's Problem to the Calculus of Variations .	174
10. "Mixed" Boundary Value Problems	175
11. The Two-dimensional Laplace Equation	180
12. Relation of the Logarithmic Potential to the Theory of Functions .	184
13. Green's Function for the Two-dimensional Equation	193
Miscellaneous Problems	197
 CHAPTER 5. THE WAVE EQUATION	209
1. The Occurrence of the Wave Equation in Physics	209
2. Elementary Solutions of the One-dimensional Wave Equation .	215
3. The Riemann-Volterra Solution of the One-dimensional Wave Equation	221
4. Vibrating Membranes: Application of the Calculus of Variations .	226
5. Three-dimensional Problems	232
6. General Solutions of the Wave Equation	239
7. Green's Function for the Wave Equation	244
8. The Nonhomogeneous Wave Equation	249
9. Riesz's Integrals	254
10. The Propagation of Sound Waves of Finite Amplitude	257
Miscellaneous Problems	262
 CHAPTER 6. THE DIFFUSION EQUATION	274
1. The Occurrence of the Diffusion Equation in Physics	274
2. The Resolution of Boundary Value Problems for the Diffusion Equation	278

CONTENTS

ix

3. Elementary Solutions of the Diffusion Equation	282
4. Separation of Variables	286
5. The Use of Integral Transforms	290
6. The Use of Green's Functions	294
7. The Diffusion Equation with Sources	299
Miscellaneous Problems	303
APPENDIX. SYSTEMS OF SURFACES	309
1. One-parameter Systems	309
2. Two-parameter Systems	311
3. The Edge of Regression	312
4. Ruled Surfaces	314
<i>Solutions to the Odd-numbered Problems</i>	315
<i>Index</i>	323
