0. Introduction	1
1. Painlevé Test and Ordinary Differential Equations	5
1.1. Method of Sonya Kovalevskaya	5
1.2. Painlevé Property	9
1.3. Variational Equation	13
1.4. Painlevé Test	26
1.5. Integrability	56
1.6. Painlevé Test and Integrability	68
1.7. Quasi- and Weak Painlevé Test	73
1.8. Painlevé Transcendents	80
1.9. Schwarzian Derivative	87
1.10. Painlevé Test and Chaotic Behaviour	91
1.11. Self-Similar Natural Boundaries	94
1.12. Computer Algebra and Painlevé Test	101
2. Applications	103
2.1. Conservative Systems	103
2.2. Nambu Mechanics	114
2.3. Dissipative Systems	117
2.4. Construction of Solutions	136
3. Ziglin's Theorems and Nonintegrability	150
3.1. Introduction	150
3.2. Ziglin's Theorems	151
3.3. Applications	157

4. Group Theoretical Reduction of Partial Differential Equations and Painlevé Test	167
4.1. Introduction	167
4.2. Examples	172
4.2.1. Completely Integrable Systems	172
4.2.2. Nonintegrable Systems	174
5. Painlevé Property and Painlevé Test for Partial Differential Equations	175
5.1. Definitions and Technique	175
6. Painlevé Property and Integrability	184
6.1. Introduction	184
6.2. Lax Pairs and Bäcklund Transformations	189
6.3. Symmetries	196
6.4. Recursion Operator	199
6.5. Linearizable Equations	201
6.6. Kowalewski Exponents and Conservation Laws	204
6.7. Resonances and Bäcklund Transformations	208
7. Hirota Technique and Painlevé Test	210
7.1. Hirota Technique	210
7.2. Connection with Painlevé Test	224
8. Deformation of Painlevé Series under Symmetry Reduction	235
9. Integrable Field Equations	241
9.1. Introduction	241
9.2. Burgers Equation and Hierarchy of Burgers Equations	242
9.3. Korteweg de Vries equation	245

9.4. Modified Korteweg de Vries Equation	249
9.5. Boussinesq Equation	251
9.6. One-Dimensional Nonlinear Schrödinger Equation	254
9.7. Integrable Nonlinear Klein-Gordon Equations	258
9.8. Calogero-Degasperis-Fokas Equation	262
9.9. (1+1)-Dimensional SO(2) Invariant σ Model	264
9.10. Reduced Maxwell Bloch Equations	266
9.11. Self-Dual Yang-Mills Equations	269
10. Nonintegrable Field Equations	275
10.1. Introduction	275
10.2. Nonintegrable Nonlinear Klein-Gorden Equations	276
10.2.1. u^4 -Field Equations	276
10.2.2. Double Sine-Gorden Equation	279
10.3. Discrete Boltzmann Equations	281
10.4. Modified Burgers Equations	293
10.5. Nonlinear Field Equation Describing the Relaxation to a Maxwell Distribution	301
11. Painlevé Transcendents in Statistical Mechanics	308
