<b>Preface</b>	VII
<b>Introduction</b>	1
<b>1. Basic Concepts and Facts of the Theory of Dynamical Systems</b>	4
1.1. Introductory Notions and Basic Examples.	4
1.2. Survey of the Topics Studied in this Book	16
1.2.1. Classification of dynamical systems	17
1.2.2. Generic properties	19
1.2.3. Stability of dynamical systems	20
1.2.4. Theory of entropy	21
1.3. Survey of Basic Facts of the Theory of Ordinary Differential Equations	24
1.4. Vector Fields and Their Integral Curves on Manifolds	31
1.5. The Hadamard–Perron Theorem	38
1.6. The Stable Manifold and the Unstable Manifold of a Hyperbolic Critical Point. The Case of a Cascade	51
1.7. The Stable Manifold and the Unstable Manifold of a Hyperbolic Critical Point. The Case of a Flow	56
1.8. Linearization of a Dynamical System in a Neighbourhood of a Hyperbolic Critical Point	60
1.9. Behaviour of a Flow in a Neighbourhood of a Closed Orbit	70
1.10. Suspension of a Diffeomorphism	76
1.11. Limit Sets	78
<b>2. Dynamical Systems on Manifolds of Dimension 1 and 2</b>	83
2.1. Survey of Basic Facts of Differential Topology	83
2.2. Limit Sets for Flows on Two-Dimensional Manifolds	86
2.3. Index of a Critical Point of a Flow on $R^2$	93
2.4. Homeomorphisms of the Circle	97
2.5. Differential Equations and Flows on the Torus	108
2.6. Algebraic Automorphisms of the Torus	117
<b>3. Transversality Theory and Generic Properties</b>	126
3.1. Survey of Facts and Notions of Functional Analysis	126
3.2. Elements of the Transversality Theory	139

3.3. Differentiation of a Flow on a Manifold with Respect to the Generating Vector Field . . . . .	148
3.4. Critical Elements of Vector Fields on Compact Manifolds . . . . .	154
3.5. Generic Properties. Genericity of Property $\mathcal{G}_1$ . . . . .	163
3.6. Genericity of Property $\mathcal{G}_2$ . . . . .	168
3.7. Genericity of Property $\mathcal{G}_3$ . . . . .	172
3.8. Non-Wandering Points. Closing Lemma. Genericity of Properties $\mathcal{G}_4$ and $\mathcal{G}_5$ . . . . .	179
<b>4. Structural Stability. Homoclinic Points</b> . . . . .	186
4.1. The Idea of Stability. Structural Stability . . . . .	186
4.2. Structural Stability of Diffeomorphisms of the Circle . . . . .	189
4.3. Structural Stability. Necessary Conditions . . . . .	196
4.4. Morse–Smale Systems . . . . .	202
4.5. Properties of Morse–Smale Systems . . . . .	211
4.6. Structural Stability of Flows on Two-Dimensional Manifolds . . . . .	218
4.7. Hyperbolic Sets . . . . .	225
4.8. Anosov Diffeomorphisms . . . . .	229
4.9. Smale’s Counter-Example. The Existence of Structurally Stable Dynamical Systems . . . . .	243
4.10. Geodesic Flows . . . . .	248
4.11. Expanding Mappings . . . . .	256
4.12. Axiom A Diffeomorphisms. Remarks on Stability . . . . .	264
4.13. Homoclinic Points . . . . .	266
<b>5. Ergodic Theory of Topological Dynamical Systems. Entropy</b> . . . . .	273
5.1. Measure Preserving Transformations . . . . .	273
5.2. Birkhoff’s Theorem. Ergodicity . . . . .	277
5.3. Invariant Measures for Topological Dynamical Systems . . . . .	286
5.4. Uniquely Ergodic Dynamical Systems . . . . .	290
5.5. Invariant Measures for Smooth Dynamical Systems . . . . .	302
5.6. Flows on the Torus $T^2$ (II). Linearization . . . . .	316
5.7. Metric Entropy . . . . .	324
5.8. Topological Entropy . . . . .	328
5.9. Properties of Entropy. Interrelation between Topological and Metric Entropy . . . . .	337
<b>Notes</b> . . . . .	349
<b>Bibliography</b> . . . . .	359
<b>List of Symbols</b> . . . . .	363
<b>Subject Index</b> . . . . .	365
<b>Author Index</b> . . . . .	368
