Contents

Chapter 1: Measure preserving and null preserving point mappings 1

§ 1.1 Von Neumann's mean ergodic theorem, ergodicity 1
§ 1.2 Birkhoff's ergodic theorem 7
§ 1.3 Recurrence 16
§ 1.4 Shift transformations and stationary processes 22
§ 1.5 Kingman's subadditive ergodic theorem and the multiplicative ergodic theorem of Oseledeč 35
§ 1.6 Relatives of the maximal ergodic theorem 50
§ 1.7 Some general tools and principles 63

Chapter 2: Mean ergodic theory 71

§ 2.1 The mean ergodic theorem 71
§ 2.2 Uniform convergence 86
§ 2.3 Weak mixing, continuous spectrum and multiple recurrence 94
§ 2.4 The splitting theorem of Jacobs-Deleeuw-Glicksberg 103

Chapter 3: Positive contractions in L_1 113

§ 3.1 The Hopf decomposition 113
§ 3.2 The Chacon-Ornstein theorem 119
§ 3.3 Brunel's lemma and the identification of the limit 123
§ 3.4 Existence of finite invariant measures 135
§ 3.5 The subadditive ergodic theorem for positive contractions in L_1 146
§ 3.6 An example with divergence of Cesàro averages 151
§ 3.7 More on the filling scheme 154

Chapter 4: Extensions of the L_1-theory 159

§ 4.1 Non positive contractions in L_1 159
§ 4.2 Vector valued ergodic theorems 167
§ 4.3 Power bounded operators and harmonic functions 172

Chapter 5: Operators in $C(K)$ and in L_p, $(1 < p < \infty)$ 177

§ 5.1 Markov operators in $C(K)$ 177
§ 5.2 Contractions in L_p, $(1 < p < \infty)$ 186

Chapter 6: Pointwise ergodic theorems for multiparameter and amenable semigroups 195

§ 6.1 Unrestricted convergence for averages over d-dimensional intervals 195
§ 6.2 Multiparameter additive and subadditive processes 201
§ 6.3 Multiparameter semigroups of L_1-contractions 211
§ 6.4 Amenable semigroups 221

Chapter 7: Local ergodic theorems and differentiation 229

§ 7.1 Positive 1-parameter semigroups 229
§ 7.2 Local ergodic theorems for multiparameter and non positive semigroups, and for vector valued functions 243

Chapter 8: Subsequences and generalized means 251

§ 8.1 Strong convergence and mixing 251
§ 8.2 Pointwise convergence 257

Chapter 9: Special topics 267

§ 9.1 Ergodic theorems in von Neumann algebras 267
§ 9.2 Entropy and information 281
§ 9.3 Nonlinear nonexpansive mappings 288
§ 9.4 Miscellanea 297

Supplement: Harris Processes, Special Functions, Zero-Two-Law (by Antoine Brunel) 301
