Contents of Volume 2	xxiii

Chapter 1 QUALITATIVE THEORY

Some Aspects of the Qualitative Theory of Differential Equations	1
--	---

CHARLES CONLEY

The Lefschetz Fixed-Point Formula; Smoothness and Stability	13
---	----

MICHAEL SHUB

Chapter 2 GENERAL THEORY

Nonlinear Oscillations in the Frame of Alternative Methods	29
--	----

LAMBERTO CESARI

Topology and Nonlinear Boundary Value Problems	51
--	----

JEAN MAWHIN

A Survey of Bifurcation Theory	83
--	----

PAUL H. RABINOWITZ

Generalized Linear Differential Systems and Associated Boundary Problems	97
--	----

WILLIAM T. REID

Some Stochastic Systems Depending on Small Parameters	103
---	-----

WENDELL H. FLEMING AND C. P. TSAI

Bifurcation	115
KLAUS KIRCHGÄSSNER AND JÜRGEN SCHEURLE	
Chapter 3 EVOLUTIONARY EQUATIONS	
An Introduction to Evolution Governed by Accretive Operators	131
MICHAEL G. CRANDALL	
Evolution Equations in Infinite Dimensions	167
LUC TARTAR	
Chapter 4 FUNCTIONAL DIFFERENTIAL EQUATIONS	
Functional Differential Equations of Neutral Type	179
JACK K. HALE	
Functional Differential Equations—Generic Theory	195
WALDYR M. OLIVA	
Chapter 5 TOPOLOGICAL DYNAMICAL SYSTEMS	
Stability Theory and Invariance Principles	211
JOSEPH P. LASALLE	
Topological Dynamics and Its Relation to Integral Equations and Nonautonomous Systems	223
RICHARD K. MILLER AND GEORGE R. SELL	
Chapter 6 PARTIAL DIFFERENTIAL EQUATIONS	
Nonlinear Oscillations under Hyperbolic Systems	251
LAMBERTO CESARI	
Liapunov Methods for a One-Dimensional Parabolic Partial Differential Equation	263
NATHANIEL CHAFEE	
Discontinuous Periodic Solutions of an Autonomous Wave Equation	267
J. P. FINK, WILLIAM S. HALL, AND A. R. HAUSRATH	

Continuous Dependence of Forced Oscillations for $u_t = \nabla \cdot \gamma(\nabla u) \nabla u$	273
THOMAS I. SEIDMAN	
Partial Differential Equations and Nonlinear Hydro- dynamic Stability	277
J. T. STUART	
Chapter 7 CONTROL THEORY	
On Normal Control Processes	283
ROBERTO CONTI	
Projection Methods for Hereditary Systems	287
H. T. BANKS AND JOHN A. BURNS	
Lower Bounds for the Extreme Value of a Parabolic Control Problem	291
WERNER KRABS	
Controllability for Neutral Systems of Linear Autonomous Differential-Difference Equations	297
MARC Q. JACOBS AND C. E. LANGENHOP	
Local Controllability of a Hyperbolic Partial Differen- tial Equation	303
WILLIAM C. CHEWNING	
A Connection between Optimal Control and Dis- conjugacy	307
E. N. CHUKWU AND O. HÁJEK	
Control for Linear Volterra Systems without Convexity	311
THOMAS S. ANGELL	
Noncontrollability of Linear Time-Invariant Systems Using Multiple One-Dimensional Linear Delay Feed- backs	317
A. K. CHOUDHURY	

A Perturbation Method for the Solution of an Optimal Control Problem Involving Bang-Bang Control	325
MARVIN I. FREEDMAN AND JAMES L. KAPLAN	
Sufficient Conditions for a Relaxed Optimal Control Problem	331
RUSSELL D. RUPP	
Author Index	333
Subject Index	337
