

TABLE OF CONTENTS

	<u>Page</u>
INTRODUCTION	1
PART I: THE PHYSICAL LIMITS TO GROWTH	10
1. Demographic prospects	11
2. Food prospects	17
3. Energy	26
4. Industrial raw materials	41
5. The physical environment	56
6. A difficult transition	61
PART II: PAST TRENDS, FUTURE DIMENSIONS	65
1. The last quarter-century	66
2. Why scenarios	75
3. The range of the scenarios	77
4. The future in orders of magnitude	88
PART III: THE ADVANCED INDUSTRIAL SOCIETIES CONFRONTED WITH CHANGE	97
1. The evolution of values	99
2. The prospects for macro-economic growth	112
3. Pressures on structures of advanced industrial societies	133
4. Rigidities within advanced industrial societies	161
5. Strategies for adaptation to change	186
PART IV: THE ADVANCED INDUSTRIAL SOCIETIES AND THE THIRD WORLD	197
1. The homogeneity and heterogeneity of the Third World	199
2. Problems and long-term prospects for the Third World countries	203

3. The various aspects of interdependence between the advanced industrial societies and the Third World 234
4. Developed countries' strategies in regard to the Third World 277

PART V: THE GROWTH OF WORLD INTERDEPENDENCE

1. The Scenarios: possible futures 289
2. The prospects for worldwide industry 334
3. Sectoral aspects of interdependence 376
4. The management of interdependence 395

CONCLUSION

1. The Prospects 406
2. The critical issues 410
3. Some recommendations 416
