

CONTENTS

<i>Prologue: The Importance of Interpersonal Strategies in Science</i>	1
--	---

PART ONE: A PRIMER FOR SCIENTIFIC STRATEGISTS 9

Chapter 1: The Scientist as a Writer: Publishing Scientific Papers 11

Authorship of scientific papers	12
The role of reviewers	25
Scientific writing viewed from the editor's desk	29
Damming the paper flood	33
Summary	36

Chapter 2: The Scientist as a Performer: Presenting Scientific Papers 39

How not to present a scientific paper	40
Suggestions for better paper presentations	42

How to enjoy presenting a scientific paper	49
The so-called discussion following paper presentation	52
The last word	54

Chapter 3: The Scientist as a Face in the Crowd:

Attending Scientific Meetings	55
Strategies for meeting participation	55
Funding meeting attendance	62
Election to society offices	63
International meetings	66
Residues of scientific meetings	71
Summary	73

Chapter 4: The Scientist as a Concertmaster: Chairing Scientific Sessions

Early planning	77
The meeting	80
Session follow-up	85
Special assignments	87
Summary	91

Chapter 5: The Scientist as a Producer/Director:

Organizing Scientific Meetings	93
The annual meeting of a scientific society	94
The workshop or small-group conference	102
The international symposium	106
Summary	112

Chapter 6: The Scientist as a Negotiator: Participating in Committee Meetings

The chairperson's creed	114
The committee members' guide	116
Some committee games	118

Committee women	121
The advisory committee	122
Paper products of committee activities	124
Computer conferences	126
Summary	128

PART TWO: CRITICAL ISSUES FOR SCIENTIFIC STRATEGISTS 129

Chapter 7: The Scientist in Transition: Moving Up, On, and Out 131

The fast track	134
Leaving the fast track	137
Life stages of a scientist	138
Eras in a professional career	144
The "professional"	148
Losing strategies	153
Moving on	156
Moving out	161
Summary	163

Chapter 8: The Scientist in Control: Getting and Using Power 165

Kinds of power in science	168
Power strategies	173
Organizational variations in power	178
Summary	180

Chapter 9: The Scientist in Doubt: Defining Ethics in Science 183

The perimeter of the circle	185
Within the circle	189
Maneuvers in ethical combat zones	192
Summary	199

**PART THREE: SPECIAL INTEREST AREAS FOR
SCIENTIFIC STRATEGISTS 201**

***Chapter 10: Evaluating the Roles of Women and Men in
Science 203***

Sex in the laboratory 204

Women in science 209

Men in science 217

***Chapter 11: Coping with Bureaucracy and
Bureaucrats 223***

Types of bureaucrats 224

Common characteristics of bureaucrats 233

The bureaucratic hierarchy 236

Kinds of bureaucracies 238

Summary 247

***Chapter 12: Dealing with External Forces: News Media,
Lawyers, Politicians, and the Public 249***

News media 250

Lawyers 253

Politicians 256

The public 258

Summary 260

Chapter 13: Relating to Industry 263

Industrial game rules 265

Consulting 270

The scientist as an industry spokesman 273

Summary 274

Epilogue 277
