

Contents

1	Thermodynamics and Statistical, Mechanics and Their Relevance to Cryogenics	<i>N. Kurti</i>	1
2	Cryogenic Fluids	<i>A. J. Croft</i>	51
3	The Behaviour of Materials at Low Temperatures	<i>H. M. Rosenberg</i>	77
4	Measurement of Low Temperatures	<i>R. Berman</i>	103
5	Heat Transfer and Thermal Insulation	<i>C. A. Bailey</i>	133
6	Heat Transfer and Fluid Flow	<i>A. G. Lenfestey</i>	155
7	Liquefiers and Refrigerators	<i>A. J. Croft</i>	183
8	Miniature Expansion Turbines	<i>H. Sixsmith</i>	225
9	The He ³ Dilution Refrigerator	<i>M. F. Wood</i>	245
10	Superconductivity and Super- conducting Devices	<i>K. Mendelssohn</i>	261
11	Superconductive Magnets	<i>M. F. Wood</i>	293
12	The Cryogenic Pumping of Gases	<i>C. A. Bailey</i>	317
13	Cryosorption Pumping	<i>G. Davey</i>	339
14	Applications of Cryogenics to Rocket Propulsion	<i>I. E. Smith</i>	355
15	Application of Cryogenics to Electronics —Low Noise Microwave Amplifiers	<i>J. C. Walling</i>	373
16	Applications of Cryogenics to High Energy Nuclear Physics	<i>H. H. Atkinson</i>	395
17	Applications of Cryogenics to Nuclear Physics: Low Temperature Bubble Chambers	<i>R. W. Newport</i>	415

18	Applications of Cryogenics to Biology and Medicine	<i>M. J. Ashwood-Smith</i>	439
19	Liquefied Natural Gas—L.N.G.: Its Uses, Production and Handling	<i>D. E. Ward</i>	455
20	Design of Small-scale Cryogenic Apparatus	<i>F. D. Thornton</i>	493
	Appendix—Units		515
