

CONTENTS

Introduction to ICEC 8	xvii
The ICEC 8 Exhibition	xxi
List of sponsors and committee members	xxiii
1G Opening plenary session	
1G-1 Infrared astronomy* <i>R. J. van Duinen</i>	1
1G-2 Space cryogenics in the 1980's* <i>P. V. Mason</i>	6
2G Space cryogenics	
2G-1 Phase separation under zero <i>g</i> conditions* <i>K. Lüders and G. Klipping</i>	14
2G-2 Passive phase separator for superfluid helium for the European space cryostat "Chresus" <i>J. R. Becker, P. Blaser, M. Perdu and R. Prost</i>	22
2G-3 The mechanism governing phase separation of helium II by means of narrow channels <i>U. Schotte and H. -D. Denner</i>	27
2G-4 Performance of an active phase separator for helium <i>H. -D. Denner, G. Klipping, I. Klipping, K. Lüders, J. Menzel, U. Ruppert and H. Walter</i>	32
2G-5 Cryogenic sub-system performance of the infrared telescope for Spacelab 2 <i>G. R. Karr, J. B. Hendricks, E. W. Urban, L. Katz and D. Ladner</i>	38
2G-6 The German Infrared Laboratory (GIRL), its overall concept and cooling system <i>A. Seidel</i>	43
1P Cryogenics for high-energy physics	
1P-1 Superconducting accelerators* <i>A. Citron</i>	49
1P-2 Measurements on niobium multicell superconducting C-band structures for linear accelerator application <i>V. Lagomarsino, G. Manuzio and R. Parodi</i>	59
1P-3 Helium cryogenic system for "Cello" superconducting solenoids <i>G. Mayaux, J. Bénichou, H. Desportes, J. C. Lottin, H. Oberlack, G. Gistau and R. Frank</i>	64

* Invited paper

1P-4	The operation of a forced two phase cooling system on a large superconducting magnet <i>M. A. Green, W. A. Burns, P. H. Eberhard, G. H. Gibson, M. Pripstein, R. R. Ross, R. G. Smits, J. D. Taylor and H. Van Slyke</i>	72
1P-5	Quench characteristics of energy doubler magnets <i>M. Wake, R. Yamada, D. A. Gross and W. B. Fowler</i>	81
1P-6	Nb ₃ Sn dipole magnet by wind and react process (abstract only) <i>Kenji Ishibashi, Misao Koizumi, Kenji Hosoyama and Mineo Kobayashi</i>	87

1E Poster session †

1E-1g	Isothermal flow of He II through wide capillary tubes <i>M. Murakami and H. Tahara</i>	88
1E-2g	GFRP supports for the helium tank of a space cryostat <i>J. R. Becker, M. Perdu, H. Raupp, M. Girard M. Tardivo</i>	93
1E-3g	Temperature control of superfluid helium in zero g by a porous plug <i>D. Petrac and P. V. Mason</i>	97
1E-4g	Development of a superfluid helium cooling system for a 3-year orbital operation <i>T. C. Nast, G. A. Bell and W. F. Foster</i>	102
1E-5g	The cryogenic system for the Far Infrared Sky Survey Experiment (FIRSSE) (abstract only) <i>J. M. Lester</i>	111
1E-6g	A recyclable ³ He refrigerator for the space shuttle <i>J. P. Torre and G. Chanin</i>	112
1E-7g	Cryogenic refrigeration using low temperature heat source (abstract only) <i>C. K. Chan</i>	116
1E-8g	Solid subliming refrigerators for the High Energy Astronomy Observatory (abstract only) <i>J. M. Lester</i>	117
1E-9g	The development of space qualified cryogenic valves for pressurized superfluid helium <i>R. Prost, M. Girard, J. Lizon-Tati and B. Tatry</i>	118
1E-10p	Eight liquid helium cryostats for the superconducting magnets of the ISR high-luminosity insertion <i>H. Laeger, Ph. Lebrun and P. Rohmig</i>	124
1E-11p	High harmonics and field homogeneity in two-shell-type superconducting dipole magnet <i>M. Wake and R. Yamada</i>	130
1E-12p	Design and operation of superconducting magnets in a 400 GeV beamline (abstract only) <i>U. Patel, H. Haggerty and K. Krempetz</i>	136

* Invited paper

† In the numbering of poster-session papers, the lower-case "g" or "p" indicates whether the poster is closer in subject to session G or session P

1E-13p	Structural analysis of superconducting bending magnets <i>R. B. Meuser</i>	137
1E-14p	A quick reference graph for the design of minimum volume simple and compensated superconducting coils made with multifilamentary Nb-Ti wire <i>A. Echarri</i>	142
1E-16p	A simple continuous flow cryostat for low temperature experiments in pile <i>H. Yanagi</i>	145
1E-17p	A frozen spin target with three orthogonal polarization directions <i>P. Chaumette, P. Chesny, J. Deregel, R. Duthil, C. Lesmond, J. C. Lottin and T. Niinikoski</i>	150
1E-18p	A helium regenerative compressor <i>H. Sixsmith and M. J. Watson</i>	155
1E-19p	A helium refrigerator for biomedical research at SIN (abstract only) <i>S. Blaser and K. Kurtcuoglu</i>	165
1E-22p	A microprocessed automatization system for a superfluid helium cryostat <i>J. L. Augueres</i>	166
1E-23p	A sample configuration effect on the heat transfer from metal surfaces to pressurized He II <i>H. Kobayashi and K. Yasukōchi</i>	171
1E-24p	A technique for improving heat transfer to boiling fluids <i>M. A. Hilal</i>	176
1E-25p	Experimental investigation of pressure drop and critical heat flux in the helium two-phase flow in a vertical tube <i>B. S. Petukhov, V. M. Zhukov and V. M. Shieldcret</i>	181
1E-26p	Heat transfer properties in a vertical channel filled with saturated and pressurized helium II (abstract only) <i>Dominique Gentile and Maurice X. François</i>	186
1E-27g	Cryogenic search for gravitational radiation <i>A. Ceapa</i>	187
1E-28g	Spacecraft motorized superfluid helium valve <i>John W. Vorreiter, Yutaka Matsumoto, William B. Van Ark and Louis J. Salerno</i>	188

3G Space cryogenics

3G-1	Design and development tests of a superfluid helium space cryostat (CRHESUS) <i>J. Lizon-Tati, M. Girard, A. Tardivo, R. Prost and M. Perdu</i>	189
3G-2	CIRBS — a low-temperature radiometer for cosmological studies <i>J. E. Beckman and D. H. Martin</i>	196
3G-3	Long life orbital operation of Stirling cycle mechanical refrigerators <i>L. G. Naes and T. C. Nast</i>	204

3G-4	Magnetic refrigeration for space applications <i>J. A. Barclay and W. A. Steyert</i>	213
3G-5	Mechanical components for a helium-cooled IR-telescope for space <i>J. R. Becker, P. Blaser and K. Suttner</i>	218
3G-6	Superfluid heat pipe <i>M. Murakami and N. Kaido</i>	223
2P Heat and helium transfer		
2P-1	Heat transfer in superfluid helium II* <i>S. W. Van Sciver</i>	228
2P-2	Gravitational convection of supercooled He I and the transition into superfluid He II at atmospheric pressure <i>S. Caspi</i>	238
2P-3	Effects of mass diffusion controlled growth and wall superheat on bubble departure in a cryogenic binary mixture system <i>J. R. Thome and G. Davey</i>	243
2P-4	Observation of bubble formation mechanism of liquid helium subjected to transient heating <i>O. Tsukamoto, T. Uyemura, Y. Ishida, T. Uyemura and T. Tsuno</i>	251
2P-5	Heat transfer during pool boiling of subcooled helium <i>B. I. Verkin, Yu. A. Kirichenko, S. M. Kozlov and K. V. Rusanov</i>	256
2P-6	Four hundred meters of flexible cryogenic helium transfer lines <i>H. Blessing, H. Laeger, Ph. Lebrun, P. Rohner and K. D. Schippl</i>	261
4G Plenary session		
4G-1	Superconductivity and cryogenics for mirror fusion* <i>D. N. Cornish</i>	267
5G Plenary session		
5G-1	Prospective use of liquid hydrogen as a fuel for transportation* <i>K. D. Williamson, Jr.</i>	290
5G-2	Towards the absolute zero* (abstract only) <i>O. V. Lounasmaa</i>	302
6G Fusion and other devices		
6G-1	Superconducting magnets for tokamaks* <i>P. Komarek</i>	303

* Invited paper

6G-2	Pressure rise during the quench of a superconducting magnet using internally cooled conductors <i>J. R. Miller, L. Dresner, J. W. Lue, S. S. Shen and H. T. Yeh</i>	321
6G-3	Quench studies on the EURATOM-LCT-Conductor <i>G. Krafft and G. Ries</i>	330
6G-4	Cryostat for the production and acceleration of deuterium pellets for use in nuclear fusion plants <i>H. -J. Forth, F. -J. Otte, M. Gessinger, C. Andelfinger, K. Büchl and W. Riedmüller</i>	337
6G-5	Closed superconducting magnetic system for thermonuclear fusion studies (abstract only) <i>B. V. Glasov, O. S. Druj, V. I. Kurnosov, E. S. Skibenko and V. B. Yuferov</i>	342
6G-6	Turbines as "wet" expanders in helium refrigerators <i>H. Quack</i>	343
6G-7	A fully auto-controlled He refrigerator system for the Daresbury SRS superconducting wiggler magnet system <i>A. E. Senn and R. L. Roberts</i>	348
3P	Cryostats and liquid circulation	
3P-1	The cold neutron sources of the research reactor Orphée at Saclay, France <i>G. Gistau and J. Verdier</i>	359
3P-2	New development on compact cryorefrigerators and refrigerator cooled cryostats <i>R. Frank, H. -J. Forth, H. -H. Klein, R. Heisig, K. -H. Völker and F. -J. Otte</i>	365
3P-3	Characteristics of a four-phase Stirling refrigerator (abstract only) <i>K. Nakamura, Y. Shiroshita, Y. Ishizaki and T. Ohtsuka</i>	372
3P-4	A pressurized helium II-cooled magnet test facility <i>R. P. Warren, G. R. Lambertson, W. S. Gilbert, R. B. Meuser, S. Caspi and R. V. Schafer</i>	373
3P-5	A continuous flow gas cooled object stage for a scanning electron microscope <i>B. Müller and C. Heiden</i>	378
3P-6	The construction and testing of a double acting bellows liquid helium pump <i>W. A. Burns, M. A. Green, R. R. Ross and H. Van Slyke</i>	383
3P-7	Flowmeter and flowregulator for He II <i>D. Arnaud and M. Locatelli</i>	388
2E	Poster session	
2E-1g	Cryogenic test of a model coil with a LCT-dummy-conductor (abstract only) <i>G. Krafft and G. Zahn</i>	392

* Invited paper

2E-3g	Experiment and analysis of magnetoelastic buckling of superconducting toroidal magnets in a partial torus <i>T. Takagi, M. Uesaka, H. Yanagi, K. Someya and K. Miya</i>	393
2E-4g	Cryogenic supplies for the JET cryosystem <i>W. Obert</i>	398
2E-5g	Experiments on stabilization of superconductors in pressurized superfluid helium (abstract only) <i>V. E. Keilin, I., A. Kovalev, S. L. Kruglov and D. B. Pavin</i>	403
2E-6g	A multiple purpose large bore superconducting magnet <i>H. Kimura and N. Tada</i>	404
2E-7g	5000 A current lead for an experimental superconducting rotor cooled by helium flow <i>Laumond, Gillet, Ky, Marquet, Duchateau and Berthet</i>	409
2E-8g	Concerning the influence of nucleate to film boiling transition in a liquid helium on the stability of composite superconductors under AC conditions (abstract only) <i>V. A. Altov, E. V. Blagov, N. A. Kulysov and V. V. Sytchev</i>	416
2E-9g	Design, construction, and test of a pair of high capacity, inertial, cryogenic current leads (abstract only) <i>J. R. Miller, R. E. Stamps, and K. R. Efferson</i>	417
2E-10g	Studies on optimization of Nb-Ti superconducting wires <i>E. Olzi, G. Rondelli and G. Turisini</i>	418
2E-11g	High current and high power superconducting rectifiers (abstract only) <i>H. H. J. ten Kate, P. B. Bunk, R. B. Britton and L. J. M. van de Klundert</i>	423
2E-12g	Composition effects on the transport properties of Nb ₃ Al superconducting wires <i>B. Annaratone, R. Bruzzese, S. Ceresara, G. Giordano, G. Pasotti, V. Pericoli-Ridolfini, G. Pitto, M. V. Ricci, N. Sacchetti and M. Spadoni</i>	424
2E-13g	Nb ₃ Sn tape by a modified diffusion method and its superconducting T_c behaviour <i>D. L. Yin, C. Y. Li, J. L. Chang, S. Z. Wang, W. M. Chen, W. C. Deng and W. G. Li</i>	429
2E-14g	Superconductivity and the Laves phase (C15) formation in V-Hf-Ti, V-Zr-Ti and V-Hf-Nb-Ti systems <i>H. R. Khan</i>	433
2E-16g	Thermal, electrical and mechanical properties of joints in composite specimens (abstract only) <i>K. T. Hartwig and S. W. Van Sciver</i>	438
2E-17p	Progress on niobium-based Josephson devices for $2e/h$ measurements <i>V. Lacquaniti and R. Vaglio</i>	439
2E-18p	High accuracy superconducting magnetometer <i>Massimo Cerdonio, Silvia Morante and Stefano Vitale</i>	443

2E-19p	On operating parameters of a Joule-Thomson microliquefier with heat exchanger with capillary-tube fins <i>E. Bodio</i>	447
2E-20p	A dilution refrigerator with a circulation rate of 2.5 mmol/s <i>A. T. A. M. de Waele, G. M. Coops, T. Satoh and H. M. Gijsman</i>	451
2E-21p	Liquid helium level meter by using superconducting wire two steps pulse current measurement <i>Y. Kuraoka</i>	456
2E-22p	Laboratory measuring apparatus for wide range temperature, pressure and magnetic field experiments <i>I. Kirschner, T. Porjesz, Gy. Kovács, J. Bánkuti, L. Lászlóffy, Gy. Reményi, K. Sajó, P. Debreceni, Gy. Kiss, J. Balla and I. Krómer</i>	461
2E-23p	Techniques of the adiabatic experiments in high magnetic fields below 1 K <i>E. Leyarovski, L. Leyarovska and Chr. Popov</i>	466
2E-25p	Effect of inhomogeneities on the characteristics of the superconductive coaxial cable <i>V. A. Bystrov, V. M. Dmitriev, I. A. Lyulicheva, V. A. Pavlyuk and A. L. Solovyev</i>	471
2E-26p	Larger helium liquefiers and refrigerators using expansion turbines (abstract only) <i>S. Bruzzi, J. W. Mart and A. J. Steel</i>	476
2E-27p	The Oxford Hybrid Magnet — a status report <i>P. A. Hudson and H. Jones</i>	477
2E-28p	Development of an 8 tesla high ramp-rate magnet <i>F. Irie, M. Takeo, Y. Furuto, M. Ikeda and M. Ban</i>	481

7G Materials (superconducting)

7G-1	Problems in research and technology of ac loss reduction in superconductors* <i>K. Kwasnitza</i>	486
7G-2	Development of standards for superconductors <i>F. R. Fickett and A. F. Clark</i>	494
7G-3	Electromagnetic instabilities in technical NbTi and Nb ₃ Sn superconductors <i>H. J. Veringa</i>	499
7G-4	Development of 5 microns NbTi filament cable with a copper and copper-nickel matrix for superconducting generator <i>P. Dubots, J. Maldy, J. C. Renard, J. Goyer, H. Nithart and J. L. Sabrié</i>	505

* Invited paper

7G-5	The realisation of the full potential of filamentary Nb ₃ Sn in practical magnets <i>P. McDonald and W. Proctor</i>	509
7G-6	Developments in superconductors for large magnet applications <i>E. Gregory, E. Adam, S. Hong, W. Marancik, C. Rosen, P. Sander and C. Spencer</i>	514
4P Small-scale devices		
4P-1	Applications of SQUID magnetometers* <i>G. L. Romani</i>	521
4P-2	Superconducting X and gamma ray imaging device* (abstract only) <i>D. Hueber, C. Valette and G. Waysand</i>	533
4P-3	Cryogenics for superconducting computers <i>R. W. Guernsey, Jr</i>	534
4P-4	Fast-response superconducting bolometer <i>B. I. Verkin, Yu. A. Melenevsky, I. F. Kharchenko and V. A. Konovodchenko</i>	539
4P-5	A superconducting device for magnetic catheter guidance <i>A. Lacaze, A. Nemoz, M. Till and J. C. Vallier</i>	544
4P-6	An improved method of controlled cryodestruction of pathological tissues by high rate of cooling <i>Z. Málek, O. Horá, J. Jelínek, L. Zobač, F. Soukup, R. S. Safrata, J. Říha and I. Krýsl</i>	549
8G Plenary session		
8G-1	Properties and behaviour of liquid helium in rotating machinery* <i>A. Hofmann</i>	554
9G Plenary session		
9G-1	Cryogenic recycling and processing* <i>N. R. Braton</i>	564
9G-2	Status report on large scale applications of superconductivity* <i>G. Bogner</i>	571
10G Rotating machinery		
10G-1	Superconducting a.c. generators — a utility view* <i>J. G. Steel</i>	590
10G-2	A superconducting spin-test rotor (abstract only) <i>R. D. Blaugher, A. Patterson, M. A. Janocko and P. W. Eckels</i>	599

* Invited paper

10G-3	Investigation of liquid helium behavior under centrifugal force and tests of Nb ₃ Sn field coils <i>H. Fujino, A. Ishihara, K. Ueda, Y. Shindo and S. Nose</i>	600
10G-4	Description of a cryogenic generator rotor model <i>Laumond, Gillet, Denis, Marquet and Duchateau</i>	606
10G-5	Experimental research on a 400 KVA superconducting generator <i>Liu Cheng-ze, Wang De-feng, Li Zheng-ping, Zhang Qing-chuan, Zhuang Hong-tao and Fu Qi-lun</i>	611
10G-6	Helium flow in rotating thermosiphon loops — calculation of the flow start <i>C. Schnapper</i>	618
10G-7	Heat transfer to rotating helium at tip speeds of 120 m/s <i>W. I. Khan and R. G. Scurlock</i>	623

5P Cryopumping, heat and mass transfer

5P-1	Gaseous helium cryogenic pump: geometrical optimization and definition of the best working conditions <i>M. Benini, G. Malavolti and P. Morbidi</i>	628
5P-2	The influence of heat conduction and heat transfer on the efficiency of vapor cooled shields <i>R. Schräwer</i>	633
5P-4	Specific features of heat transfer in multilayer insulation under atmospheric pressure <i>R. S. Mikhalchenko, V. F. Getmanets, L. G. Goncharenko and I. P. Vinnichenko</i>	638
5P-5	Selfpumping superinsulation spacers optimization (abstract only) <i>K. Balcersek and T. L. Halaczek</i>	642
5P-6	Assessment of statistical analysis of breakdown strength in liquid nitrogen and liquid helium in the millimeter gap range <i>M. Delucchi, G. Liberti, P. Molfino and G. Molinari</i>	643

3E Poster session

3E-1g	The electromagnetic forces and losses in cryoturbogenerator rotor shells <i>I. S. Zhitomirsky</i>	648
3E-2g	An analysis of condensation pumping of the evacuated interspaces in a cryoturbogenerator rotor <i>A. M. Kislov</i>	654
3E-3g	A "split-track" system of electrodynamic levitation for high speed transport <i>J. L. Mahtani, J. H. Rakels and R. G. Rhodes</i>	659
3E-4g	A superconducting electromagnetic prospecting system — operational in 1980 <i>B. C. Clawson and H. F. Morrison</i>	664

3E-6p	Specific features of contact heat transfer to solid cryogenics during sublimation <i>R. S. Mikhalchenko, V. F. Getmanets and L. G. Goncharenko</i>	669
3E-7g	Heat and mass transfer to cryogenically cooled surface under frosting conditions — a survey of research efforts and analysis — Part 1 <i>D. P. Sekulić</i>	673
3E-8p	Pipe freezing — examination of effects on pipework <i>D. H. Tantam and D. A. Wigley</i>	681
3E-9p	Observation of roll over in an LNG experimental vessel <i>M. Akiyama, H. Yanagi and S. Takayama</i>	686
3E-11p	The solubility of selected halogenhydrocarbons in liquid nitrogen <i>Z. Wojtaszek and B. Dąbrowska</i>	691
3E-12p	One-dimensional model of heat transfer in multilayer insulation under radiative heat flux to its layers <i>V. F. Getmanets, P. N. Yurchenko and Yu. A. Dushechkin</i>	696
3E-13p	Methods of temperature field simulation in vessels filled with cryogenic liquids under conditions of long-term storage <i>Yu. A. Kirichenko and Zh. A. Suprunova</i>	700
3E-14p	Pumping of hydrogen and deuterium with a large cryopump <i>P. Büttner</i>	705
3E-15p	Heat analysis and reduction of evaporation rate of liquid helium dewar (Part II) <i>Y. Kuraoka</i>	710
3E-16p	The thermal conductivity of carbon fibre/carbon matrix composites at low temperatures <i>C. I. Nicholls and H. M. Rosenberg</i>	715
3E-17	Thermal conductance of a pressed Al–Al-contact (abstract only) <i>M. Wanner</i>	719
3E-18p	Strength and electrical resistance of cold drawn Al and Cu <i>K. T. Hartwig and P. G. Appius</i>	720
3E-19p	Low temperature effect on the fatigue fracture of austenitic steel <i>N. M. Grinberg, Je. N. Aleksenko and K. U. Yushchenko</i>	726
3E-21p	Some observations on CMN- and resistance thermometry <i>G. M. Coops, A. B. Reekers, A. Th. A. M. de Waele and H. M. Gijsman</i>	731
3E-22p	Some possibilities of broadening working range of hole GaAs resistance thermometers <i>S. P. Logvinenko and D. A. Rossoshanski</i>	736
3E-24p	Losses in superconducting cylinders in transverse fields <i>C. Y. Pang, P. G. McLaren and A. M. Campbell</i>	739

3E-25p	Longitudinal electric field measurements along multifilamentary composite wires subjected to simultaneous transport current and external magnetic field variations <i>T. Pech</i>	744
3E-26p	Theoretical and experimental results on critical currents and ac losses in Nb-Ti flat braided superconducting cables <i>A. Février, J. P. Tavergnier, H. Nithart, M. Kiblaire and J. L. Duchateau</i>	749

11G Heat transfer, cables and MHD

11G-1	Recent progress on heat transfer to liquid helium* <i>G. Krafft</i>	754
11G-2	The cooling and electrical excitation of 100 m superconducting power transmission cables <i>E. B. Forsyth, R. J. Gibbs, J. E. Jensen and A. J. McNerney</i>	770
11G-3	Construction of model ship ST-500 with superconducting electromagnetic thrust system <i>A. Iwata, Y. Saji and S. Sato</i>	775
11G-4	Design and construction of a large superconducting MHD magnet for the Coal-Fired Flow Facility at the University of Tennessee Space Institute <i>S. -T. Wang, L. Genens, J. Gonczy, H. Ludwig, J. Hoffman, K. Mataya, M. Lieberg, Y. -C. Huang, C. -J. Chen, E. Johanson, B. Phillips, E. Kraft, D. Gacek and W. Sajdak</i>	785
11G-5	Magnetic flocculation of paramagnetic particles in high magnetic field (abstract only) <i>J. H. P. Watson</i>	790

6P Materials (constructions and sensors)

6P-1	Fracture and strength properties of selected austenitic stainless steels at cryogenic temperatures (abstract only) <i>D. T. Read and R. P. Reed</i>	791
6P-2	A contribution to the study of the mechanical (flexural) ageing of dielectric laminates at 77 K <i>L. Centurioni, G. Coletti and G. Liberti</i>	792
6P-3	Strength and toughness of USSR Fe-20Cr-16Ni-6Mn-0.2N weldments at cryogenic temperatures <i>R. P. Reed, R. L. Tobler, J. W. Elmer, H. I. McHenry and K. A. Yushchenko</i>	797
6P-4	Measurements at low temperatures on Al Mg thin-film resistors <i>D. Andreone, E. Arri, G. Boella and V. Lacquaniti</i>	802
6P-6	The long-term stability of resistance thermometers for temperatures below 30 K <i>L. M. Besley</i>	807

* Invited paper

6P-7	Automatic test facility for cryogenic transducers in the range 2 K to 300 K and up to 7 T <i>F. Pavese, G. Cerutti, C. Ferrero and A. Rivetti</i>	812
12G Plenary session		
12G-1	Cryogenic liquid production plant of large tonnage* <i>M. Grenier</i>	817
13G Special magnets		
13G-1	Magnetic filtration* <i>H. K. Collan</i>	826
13G-2	Design and construction of a 200 kJ shielded magnet for pulsed energy storage <i>T. Shintomi, Masuda, Y. M. Eyssa and R. W. Boom</i>	834
13G-3	Refrigeration system design for pulsed superconducting magnetic energy storage <i>H. Yanagi, Y. Ishizaki and T. Shintomi</i>	839
13G-4	A mechanical superconducting switch for large magnets <i>M. Morpurgo</i>	844
13G-5	A 10 tesla, 340 mm diameter test facility working at 1.8 K for conductor studies <i>R. Aymar, G. Bon Mardion, G. Claudet, P. Genevey, S. Palanque, J. Plancoulaine, A. Sagniez, L. Senet and B. Turck</i>	848
7P AC losses in superconductors		
7P-1	Magnetic hysteresis in single filaments from commercial superconducting wires <i>P. Bruzzone, G. Gallinaro, A. Siri and R. Vaccarone</i>	854
7P-2	AC losses in NbTi and Nb ₃ Al wires <i>M. Asdente, G. Cavelleri and A. M. Ricca</i>	859
7P-3	Losses and eddy current saturation effects in Nb–Ti multifilamentary composites <i>A. Février</i>	864
7P-4	AC losses of diffusion-reacted Nb ₃ Sn filamentary superconductors <i>K. Kwasnitza and D. Salathé</i>	869
7P-5	Losses on multifilamentary Nb ₃ Sn wires <i>C.S. Furtado</i>	875
14G Final plenary session		
14G-1	Cryogenics in China today <i>C. S. Hung</i>	881
14G-2	Summary of the Conference <i>R. G. Scurlock</i>	893
	<i>Author index</i>	897
