
CONTENTS

3 PREFACE

REFRIGERATION

- 9 Measurement of the efficiency of the valveless Doll-Eder expansion engine
H. Becker, R. Doll and F. X. Eder
- 12 Measurements and experience with valveless piston expansion engines
R. Kneuer and E. Turnwald
- 16 A closed-cycle 3.5°K refrigerator
T. J. Dean and E. F. Daly
- 19 A 3.5°K refrigerator based on the three-space Stirling refrigerator
G. Prast
- 23 Refrigerator helium 7 W à 4.5°K: application à la refrigeration par convection gazeuse de bobinage supraconducteurs
P. Solente and D. Marinèt
- 27 Reliability of cryogenic refrigeration systems
W. H. Hogan
- 32 Helium expansion turbines
P. Saúty and P. Girot
- 34 A helium liquefier using a gas-bearing expansion turbine
A. de la Harpe, C. Johannès, P. Girot and P. Fregeac
- 36 A flexible multipurpose helium refrigerator
A. P. Stoll
- 39 Helium refrigerators for a nuclear research institute
P. Pagani and U. Giger
- 44 Computation of the temperature field of regenerators with temperature-dependent parameters
J. W. L. Köhler
- 47 Compact heat exchanger assemblies for gas separation plants
A. G. Lenfestey
- 50 A cold transfer system
J. Mulder
- 52 Automatic control system for liquefiers
A. G. Zel'dovich, Yu. K. Pilipenko, V. F. Sikolenko and V. L. Tischenko
- 55 Techniques for evaluating the performance of the helium-3 dilution refrigerator
H. London, D. Phillips and G. P. Thomas
- 59 A hermetically sealed helium-3 cryostat with a charcoal adsorption pump
W. Wiedemann and E. Smolic
- 62 Example of the use of low-temperature gas separation for nuclear reactors
W. Lehmer
- 65 Low-temperature cooling devices for laboratory operation
K. E. Nicholds
- 67 Fractionation balance in low-energy oxygen production
J. C. Gee and G. G. Haselden

HANDLING

- 73 A high-pressure transfer system for liquid hydrogen
A. T. Jeffs
- 77 Flow-rate limits imposed by thermal stresses in stainless steel pipelines cooled with liquid hydrogen
J. K. Novak
- 83 Flow and heat transfer characteristics of sub-triple-point cryogenics in heated tubes
M. C. Jones, Patricia J. Giarratano and A. U. Simpson
- 89 A cryogenic propellant tank pressurisation analysis
M. Bourgarel, R. Clement and M. Segel

- 102 **Design of a circulation pump for liquid hydrogen**
H. Bauer
- 106 **A new cryogenic transfer pump**
K. E. Nicholds
- 107 **Multistage cryogenic pumping systems**
A. V. Pradhan
- 112 **Design and development of cryogenic pumps**
A. V. Pradhan
- 117 **Measurement of thermal conductivity coefficient of multilayer insulations**
L. B. Golovanov
- 123 **Effect of multilayer insulation thickness on apparent thermal conductivity**
B. I. Verkin, R. S. Mikhal'chenko and A. G. Gerzhin
- 128 **Temperature-dependence of the integral emissivity of some materials below 300°K**
B. I. Verkin, R. S. Mikhal'chenko and V. A. Ashukin
- 131 **New developments in insulation systems for cryogenic storage tanks**
Y. A. Selcukoglu
- 135 **Design, construction, and testing of NASA's liquid-oxygen and liquid-hydrogen barges**
D. C. Dorney
- 139 **Short helium Dewar for high-current superconducting coils**
S. Deiness and P. Coville
- 141 **Vertical and horizontal temperature profiles in the necks of liquid-helium Dewars**
P. Lynam and R. G. Scurlock
- 144 **The design of low-loss liquid-helium Dewars**
R. G. Scurlock
- 146 **Economic application of vacuum insulation in cryogenic liquid distribution**
D. H. Tantam and J. Robb
- 151 **The thermal conductivity of a flat plate cooled by a sublimating medium**
B. I. Verkin, R. S. Mikhal'chenko, B. F. Get'manets and V. T. Arkhipov
- 154 **The influence of accidents in the continuing development of cryogenic procedures**
R. Reider
- 159 **Some cryogenic aspects of the Oxford University—Rutherford Laboratory 80-cm liquid-helium bubble chamber**
C. A. Bailey and G. Davey
- 163 **All-metal separable closures for controlled leakage in cryogenic environments**
G. Forrest

SUPERCONDUCTIVITY

- 167 **Nb-Zr-Ti ternary alloy in a superconducting magnet**
T. Doi, H. Kimura, M. Kudo and U. Kawabe
- 172 **Theoretical evaluation of high field measurements on type-II superconductors up to 230 kOe**
K. Hechler and E. Saur
- 175 **Experiments on copper- and aluminium-stabilised Nb-Ti superconductors in view of their application in large magnets**
G. Bogner, C. Albrecht, R. Maier and C. P. Parsch
- 179 **Contact resistance of stabilised superconducting wires**
Y. Furuto and M. Ikeda
- 184 **Some measurements on the superconducting properties of thin mercury foils**
A. van Itterbeek, Y. Bruynseraede and E. Deprez
- 187 **Machine homopolaire à inducteur supraconducteur**
R. Bonnefille, J. P. Chabrierie, G. Fournet, A. Mailfert, J. Robert and C. Vaillant
- 190 **Description des quelques bobinages supraconducteurs et équipements annexes**
D. Mariné and J. M. Leroux
- 193 **Design and performance of a superconducting dipole magnet**
A. J. Eatwell, B. B. Goodman, C. S. Instone and J. E. Jones
- 196 **Superconducting solenoid having a horizontal axis and a room-temperature aperture**
R. B. Meuser, W. H. Chamberlain and R. E. Hintz

- 200 **Theory of gas-cooled current-carrying leads for cryogenic apparatus**
L. Donadieu and C. Dammann
- 204 **Remarks on a new superconducting rectifier**
R. Fasel and J. L. Olsen
- 207 **Study of some problems in cryocables using the low-cost technique of end-cooling**
R. G. Scurlock
- 210 **A superconducting electron microscope lens**
I. Dietrich and R. Weyl

THERMOMETRY

- 213 **Investigations on the low-temperature thermocouple gold-cobalt (2.1%at.) versus chromel**
W. Koeppel
- 218 **High-sensitivity temperature measurements below 4.2°K with inductive voltage dividers**
P. C. F. Wolfendale and I. M. Firth
- 222 **Condensation thermometers and level indicators**
L. Bewilogua
- 226 **Study on a gas thermometer in a compact 20°K helium refrigerator**
M. Yamaguchi
- 229 **The international comparison of low-temperature scales**
M. P. Orlova, D. N. Astrov, D. I. Sharevskaya, G. A. Kytin and L. B. Belyansky
- 231 **Low-temperature measurements by precision platinum resistance thermometers in a magnetic field**
M. P. Orlova, D. N. Astrov, B. I. Alshin, and P. V. Zorin
- 233 **Investigation of the $W(T)$ dependence for modern thermometrical platinioms in the region between 14 and 273.15°K**
D. I. Sharevskaya, M. P. Orlova, L. B. Belyansky, and G. A. Galoushkina

PROPERTIES

- 236 **Mechanical testing at 4.2°K**
D. Evans, C. E. Micklewright, R. Sheldon and G. B. Stapleton
- 240 **Experience with 9% nickel steel for low-temperature containers**
K. A. Ebert and K. F. Windgassen
- 247 **The pre-straining of stainless steel En58b at room and cryogenic temperatures and the effect on tensile properties at these temperatures**
P. Midgley
- 251 **Experimental study of AZ5G-Zr-Cr alloy welds under 1-1/2 biaxial states of stress at low temperatures**
R. Claveyrolas, A. Faure and M. Segel
- 258 **Contribution to heat transfer in low-boiling-point liquids**
R. Knöner and H. Vinzelberg
- 260 **Liquid-phase separation and liquid-vapour equilibrium in the system neon-deuterium**
W. B. Streett
- 264 **Influence of surface roughness on cryogenic nucleate boiling heat transfer**
F. A. Mueller
- 274 **Critical nucleate boiling of liquid helium in narrow tubes and annuli**
S. Lehongre, J. C. Boissin, C. Johannes, and A. de la Harpe
- 276 **The density of liquid nitrogen from 85 to 120°K and from the saturation boundary to 200 atm**
A. H. Cockett, K. Goldman and N. G. Scrase
- 281 **The Joule-Thomson effect in neon at low temperatures**
R. Runge

SPACE SIMULATION AND CRYOPUMPING

- 285 **Verteilung der Molekularstromdichte in Raumsimulationskammern mit Kryowänden**
R. A. Haefer and P. Kleber
- 288 **Thermal plants for space-simulation chambers**
A. Sellmaier, B. Bissinger and H. Schiller
- 295 **A liquid-helium cryopump**
A. Sands, R. K. Dick and J. A. Haynes

RESEARCH EQUIPMENT

- 298** **Calorimetric measurement below 1 mW at low temperatures: application to dielectric dissipation measurements at 4.2°K**
 J. Bobo and M. Perrier
- 301** **A method of measuring heat conductivity and specific heat**
 H. Gobrecht and R. Krüger
- 304** **A silicon carbide superleak**
 J. M. Goldschvartz and B. S. Blaisse
- 307** **Temperature fluctuations in liquid helium, studied by noise measurements**
 G. J. van Gurp
- 310** **A specimen freezer for use in microscopy**
 J. Okada
