

Contents

List of Important Symbols	xv
1 Kinetic Theory of Gases	1
1.1 Fundamental Postulates of the Kinetic Theory of Gases	1
1.2 Ideal Gas Laws	1
1.3 Avogadro Number	6
1.4 Molecular Velocities; Maxwell-Boltzmann Distribution Laws	8
1.5 Rate at Which Molecules Strike a Surface	14
1.6 Rate of Evaporation and Vapor Pressure	17
1.7 Free Paths of Molecules	22
1.8 Relation between Coefficient of Viscosity, Mean Free Path, and Molecular Diameter	25
1.9 Heat Conductivity of Gases	39
1.10 Thermal Conductivity at Low Pressures	43
1.11 Langmuir's Film Theory of Heat Conduction	53
1.12 Thermal Transpiration (Thermomolecular Flow)	58
1.13 Thermal Diffusion	60
1.14 Theory of Diffusion of Gases	66
1.15 Random Motions and Fluctuations	73
2 Flow of Gases through Tubes and Orifices (<i>Revised by David G. Worden</i>)	80
2.1 Introduction	80
2.2 Flow Conductance and Impedance	81
2.3 Viscous Flow	82
2.4 Molecular Flow	87
2.5 Flow in the Transition Range	104
2.6 Rate of Exhaust through a Tube or Orifice	111
3 Vacuum Pumps (<i>Revised by Peter Cannon</i>)	118
3.1 Historical Review	118
3.2 General Remarks on the Operation of Pumps	120

3.3	Types of Mechanical Pumps	121
3.4	Roots-Type Pumps	129
3.5	Molecular Pumps	131
3.6	Vapor-Stream Pumps	137
3.7	Ion and Getter Pumps	170
3.8	Cryogenic Pumps	176
4	The Utilization of Pumps (<i>Revised by Peter Cannon</i>)	181
4.1	General Remarks on System Design	181
4.2	Determination of Speed of Pump	186
4.3	Design of High-Vacuum System	197
4.4	The Use of Traps and Baffles with Vapor-Stream Pumps	200
4.5	The Choice and Stability of Work Fluids for Vapor-Stream Pumps	208
5	Manometers for Low Gas Pressures (<i>Revised by J. M. Lafferty</i>)	220
5.1	Application of Electrical Discharge in Gas at Low Pressures	220
5.2	Mercury (and Other Liquid) Manometers	222
5.3	Mechanical Manometers	235
5.4	Viscosity Manometers	244
5.5	Radiometer Type of Gauges	259
5.6	Heat-Conductivity Manometers	280
5.7	Ionization Gauges	301
5.8	General Remarks on Gauges	350
5.9	Leak Detectors	353
6	Sorption of Gases and Vapors by Solids (<i>Revised by George L. Gaines, Jr.</i>)	376
6.1	Adsorption, Absorption, Occlusion, and Sorption	376
6.2	Some Typical Adsorption Isotherms	378
6.3	Parabolic and Hyperbolic Equations for Adsorption Isotherm	384
6.4	Multimolecular Adsorption: The Brunauer-Emmett-Teller Equation	395
6.5	Other Expressions for the Adsorption Isotherm	401
6.6	Heat of Sorption; Temperature Variation of Sorption and Sorption Thermodynamics	404
6.7	Rate of Sorption	413
6.8	Surface of Adsorbents	415
6.9	Chemisorption	425

7 Sorption of Gases by “Active” Charcoal, Silicates (Including Glasses), and Cellulose (<i>Revised by George L. Gaines, Jr.</i>)	435
7.1 Data on Sorption of Gases	435
7.2 Preparation and Structure of Activated Charcoal	435
7.3 Sorption Data at Higher Pressures	440
7.4 Sorption Data at Low Pressures	451
7.5 Use of Charcoal at Low Temperatures in High-Vacuum Systems	454
7.6 Sorption by Silica Gel and Silicates	458
7.7 Evolution and Sorption of Gases by Glass	469
7.8 Diffusion of Gases through Quartz and Glasses	491
7.9 Sorption and Desorption Phenomena in Cellulose	500
7.10 Polymers; Sorption and Permeability	508
8 Gases and Metals (<i>Revised by Francis J. Norton</i>)	516
8.1 Introductory Remarks	516
8.2 Solubility of Gases in Metals	517
8.3 Solubility of Hydrogen in Metals of Group A	518
8.4 Solubility of Hydrogen in Metals of Group B	536
8.5 Derivation of Relations for the Solubility of Hydrogen in Metals	553
8.6 Solubility of Hydrogen in Palladium-like Metals and Palladium Black	555
8.7 Solubility of Nitrogen in Metals	559
8.8 Solubility of Oxygen and Other Gases	563
8.9 Diffusion of Gases through Metals	570
8.10 Rates of Sorption and Desorption; Calculation of Diffusion Constants	581
8.11 Earlier Investigations on Degassing of Metals	587
8.12 Investigation on Degassing of Metals by Norton and Marshall	596
8.13 Determination of Oxygen Content of Metals from Composition of Gases Evolved	600
8.14 Embrittlement of Metals by Hydrogen	603
8.15 Influence of Gases on Mechanical Properties	607
8.16 Analysis of Gases in Metals	610
8.17 Rare Gases in Metals	615
9 Chemical and Electrical Clean-up and Ultrahigh Vacuum (<i>Revised by V. L. Stout and T. A. Vanderslice</i>)	622
9.1 General Remarks	622
Part A. Chemical Clean-up	
9.2 Apparatus and Techniques for Measurement of Gettering Rates	624
9.3 Mechanisms of Sorption by Flashed Getters	629
9.4 Flashed Getters in Applications	636
9.5 Bulk Getters	639

9.6	Incandescent Filaments	644
	Part B. Electrical Clean-up of Gases	
9.7	Phenomena in Cold-Cathode Discharge Tubes	649
9.8	Clean-up in Electrodeless Discharges	659
9.9	Electron Emission and Space-Charge Phenomena in Hot-Cathode Low-Pressure Devices	661
9.10	Clean-up in Hot-Cathode Discharges	665
9.11	Electrical Clean-up in Hot-Cathode Tubes at Very Low Pressures	668
9.12	Ultrahigh Vacuum	673
10	Vapor Pressures and Rates of Evaporation (<i>Revised by L. R. Koller</i>)	691
10.1	Thermodynamical Relations	691
10.2	Vapor-Pressure Data and Rates of Evaporation for Metals and Carbon	694
10.3	General Remarks on Vacuum Distillation of Metals and Deposition of Films	703
10.4	Vapor Pressures and Evaporation Phenomena of Alloys	710
10.5	Vapor Pressures of Oxides and Other Inorganic Compounds	723
10.6	Vapor Pressures at Low Temperatures	723
10.7	Boiling Point of Liquid Air	730
10.8	Vapor Pressures of Oils, Greases, and Waxes	733
11	Dissociation Pressures of Oxides, Hydrides, and Nitrides (<i>Revised by Edward L. Simons</i>)	738
11.1	Free Energy	738
11.2	Free Energy of Formation of Water Vapor	746
11.3	Dissociation Pressures of Oxides of Silver, Palladium, and Mercury	748
11.4	Dissociation and Reduction of Oxides of Copper	750
11.5	Dissociation of Oxides of Iron and Their Reduction by Hydrogen	752
11.6	Dissociation and Reduction of Oxides of Nickel and Cobalt	754
11.7	Dissociation and Reduction of Oxides of Manganese, Chromium, Molybdenum, and Tungsten	755
11.8	Other Modes of Dissociation of Oxides	758
11.9	Reduction of Oxides by Carbon Monoxide, Other Reducing Atmospheres, and Carbon	759
11.10	Reduction of Oxides by Metals	765
11.11	Dissociation of Hydrides of the Alkali and Alkaline-Earth Metals	767
11.12	Dissociation Pressures of Nitrides	769
	Name Index	777
	Subject Index	791
