TECHNICAL PROGRAM

SCIENTIFIC BASIS OF VACUUM TECHNIQUES AND THEIR APPLICATION TO SCIENTIFIC AND APPLIED RESEARCH

Compression in Roots Type Blowers—E. A. Winzenburger	1
Oil Diffusion Pumps for Very Low Ultimate Pressures—H. G. Nöller, G. Reich and W. Bächler	6
Role of Adsorption in Production and Measurement of High Vacuum—Chikara Hayashi	13
Structure Determined Properties of Evaporated Bismuth Films—C. E. Drumheller	27
Preparation and Properties of Clean High-Area Metal and Alloy Evaporated Films for Use in Surface Studies—S. J. Stephens	34
Utilization of the Surface Tension of Liquid Metals in Making High-Vacuum Seals—N. Milleron	38
Resistance-Temperature Characteristics of Evaporated Chromium Films—D. M. Hoffman and J. Riseman	42
The Evaporation Mode of Certain Vacuum Metal Distillation Source Configurations—L. E. Preuss and C. E. Alt	47
Design Criteria for Accelerator Vacuum Systems—R. N. Edwards and J. F. Lawyer	73
Distributed Differential Pumping—R. C. Knechtli	83

METHODS AND TECHNIQUES FOR OBTAINING AND MEASURING HIGH VACUUM AND ULTRA HIGH VACUUM—INDUSTRIAL APPLICATIONS

The Steam Jet Ejector: A Versatile Pump for High Vacuum—V. V. Fondrk....	88
A Large Metal System Permitting Low Base Pressures—J. R. Ullman	95

Production of Very Low Pressures with Getter-Ion Pumps—G. Reich and H. G. Nöller 97

Gas Collection and Analysis System Employed in Vacuum Tube Problems—J. Morrison 100

A New Silicone Diffusion Pump Fluid—A. R. Huntress, A. Lee Smith, B. D. Power and N. T. M. Dennis 104

A Magnetic Amplifier Control Circuit for a Thermal Conductivity Vacuum Gauge—A. R. Hamilton 112

A New Type of Vacuum Leak Detector—F. L. Torney, Jr. 115

Permeation of Air Through Walls of Plastic Tubing Used in Low Pressure Systems—J. M. Kendall 120

A Simple Mass Spectrometer for the Identification of Residual Gases in High Vacuum Systems—G. D. Perkins and D. E. Charpentier 125

Some Aspects and Developments of Vacuum Drying and Impregnation—G. W. Oetjen 129

Metallizing of Flexible Substrates—P. J. Clough 136

Vacuum Metallizing on Plastics—T. J. LaBounty 138

INDUSTRIAL APPLICATIONS

High Vacuum Techniques for Nuclear Physics—M. Auwaerter..... 143

Continuous Evaporation of Refractory Metals by Electron Bombardment without using Support Materials—N. Milleron 148

The Removal of Gaseous Impurities by Vacuum Arc Melting—S. J. Noesen 150

Vacuum Stream-degassing—K. C. Taylor 157

Vacuum Heat-treating—R. R. Giler 161

What Vacuum Melting Process Shall I Use?—A. M. Aksoy..... 168
