Foreword	iii
Executive Body and Organization American Vacuum Society	iv
Governing Board of the International Organization for Vacuum Science and Technology — 1961	v
Congress Notes	vi
Congress Personalities	ix
Sessions and Moderators	x

SECTION I

SYMPOSIUM

LIMITATIONS IN THE ATTAINMENT OF ULTRA-HIGH VACUUM

(INVITED PAPERS)

Processes Limiting the Ultimate Pressure in Ultra High Vacuum Systems — A. Venema	1
Gas Permeation Through the Vacuum Envelope — F. J. Norton	8
Entgasung — R. Jaeckel	17
Desorption of Adsorbed Gas and Re-Emission of Gas Previously Pumped by Ionic Pumping — J. P. Hobson	26
Problems of "Very Large Systems" — J. T. Mark and W. G. Henderson	31

SECTION II

ULTRA-HIGH VACUUM AND LIMITING PARAMETERS

(CONTRIBUTED PAPERS)

Outgassing Rate of Contaminated Metal Surfaces — B. B. Dayton	42
Gasabgabe Verschiedener Metallischer Hochvakuum-Baustoffe — F. A. Flecken und H. G. Nöller	58
The Origins and Composition of the Limiting Gas Load in Ultra-High Vacuum Systems— I. Farkass and E. J. Barry	66

VOLUME 1

	<i>Page</i>
Effect of Pretreatment on the Degassing of Materials — P. F. Váradi	73
Outgassing Data for Several Epoxy Resins and Rubbers for the Zero Gradient Synchrotron — F. Markley, R. Roman and R. Vosecek	78
Pumps as a Gas Source — F. Pagano	86
Adsorption Capacities of Some Room-Temperature Trap Materials-I—L. L. Levenson and N. Milleron	91

SECTION III

SYMPOSIUM

ADSORPTION

(INVITED PAPERS)

Adsorption and High Vacua — B. M. W. Trapnell	98
Adsorption on Semiconductors — J. T. Law	104
The Clean Surface Approach to Adsorption Studies — J. A. Dillon, Jr.	113
The Interaction of Rare Gas Atoms with Surfaces — G. D. Halsey, Jr.	119
Molecular Processes in Adsorption on Metals — G. Ehrlich	126

SECTION IV

ADSORPTION AND GETTERING

(CONTRIBUTED PAPERS)

Physical Adsorption in Ultra-High-Vacuum Systems — J. P. Hobson	146
Adsorption of Molecular Gases on Surfaces and its Effect on Pressure Measurement — D. Lee, H. Tomaschke and D. Alpert	151
Modern Vacuum Technology and Surface Interactions — A. G. Nasini and F. Ricca	160
Desorption of Gas by Photons — W. J. Lange and H. Riemersma	167
The Measurement of Accommodation Coefficients of Gases on Tungsten, in Particular for the Case Where the Tungsten has Already a Monolayer of Gas on its Surface — A. E. Saunders and J. Yarwood	171
Desorption of NS 22S Stainless Steel by Flash-Filament Technique in Ultra High Vacuum — D. A. Degras, A. Schram, B. Lux and L. A. Petermann	177

VOLUME 1

	<i>Page</i>
Gas Desorption on Rubbing Surfaces in Vacua — J. Groszkowski	186
Some Low Pressure Sorption Characteristics of Evaporated Titanium and Zirconium with Dry Air and Oxygen — E. J. Zdanuk and S. P. Wolsky	188
Gas Sorption Properties of Barium Getters for Use with a TV Picture Tube — H. Takayama and H. Kobayashi	193
Adsorption of Gases on Germanium — M. J. Bennett and F. C. Tompkins	203
The Formation of Hydrocarbon Gas by Titanium Getters Containing Carbon and Hydrogen Impurities — L. Holland, L. Laurensen and P. G. W. Allen	208
Properties of Modern Barium Getters — R. Cels, C. W. Reash and J. S. Wagener ..	220
Investigations Concerning Bulk Getters from Metals of the IVth A Group and Thorium— P. della Porta, T. Giorgi, S. Origlio and F. Ricca	229

SECTION V

SYMPOSIUM

THE SPUTTERING PHENOMENA

(INVITED PAPERS)

Physical Sputtering — G. K. Wehner	239
High Energy Sputtering — O. Almén and G. Bruce	245
Sputtering Yields at Medium and Low Energies — R. V. Stuart	252
A Theoretical Model of the Sputtering Process — D. E. Harrison, Jr.	259

SECTION VI

SPUTTERING AND ION BOMBARDMENT

(CONTRIBUTED PAPERS)

Ion Beam Method for the Study of Angular Distribution of Sputtering Material — R. D. Knight	265
The Sputtering of Cu by N_2^+ as a Function of Pressure and Temperature — T. W. Snouse and M. Bader	271
Positive Ion Bombardment of Metal Surfaces — J. S. Colligon and J. H. Leck	275
The Desorption of Ionically Trapped Argon from Tungsten — E. V. Kornelsen	281

VOLUME 1

SECTION VII

MECHANICAL, SORPTION AND MOLECULAR PUMPS

(CONTRIBUTED PAPERS)

	<i>Page</i>
A New Mechanical Vacuum Pump — J. R. Boyd	287
Power Requirements of Oil Sealed Mechanical Pumps — E. A. Winzenburger	291
A Magnetically Suspended Molecular Pump — C. E. Williams and J. W. Beams	295
Performance Criteria for Sorption Pumps — F. T. Turner and M. Feinleib	300

SECTION VIII

DIFFUSION PUMPS AND PUMP FLUIDS

(CONTRIBUTED PAPERS)

High Vacuum with the Polyphenyl Ethers — A Self-Contained Technology — K. C. D. Hickman	307
Evaluation of a High-Temperature Functional Fluid in a Conventional Diffusion Pumping System — T. H. Batzer	315
A Hypothesis Concerning Limitations of Diffusion Pumps — P. B. Kennedy.....	320
On An Oil Self-Purifying Diffusion Pump System — H. Kumagai	327
Testing Performance of Diffusion Pumps — M. H. Hablanian and H. A. Steinerherz	333
Progress on Optimization of Oil Diffusion Pump Systems for Ultra-High Vacuum — III — N. Milleron and L. L. Levenson	342

SECTION IX

GETTER AND ION PUMPING

(CONTRIBUTED PAPERS)

Large-Scale Getter Pumping Experiment Using Vapor Deposited Titanium Films — R. E. Clausing	345
Barium Absorption Pumps — R. W. Cloud, H. Milde and S. F. Philp	357
Preliminary Pumping Results with Penning-Type Discharges Supported on Condensable Metal Vapors — N. Milleron	365
One Year of Operating Experience with 70 Getter-Ion Pumps — C. L. Gould and R. A. Dryden	369

VOLUME 1

	<i>Page</i>
Operational Procedures and Experiences with a High Speed Ion Getter Pump — H. Adam and W. Bächler	374
Etude et Réalisation d'une Pompe à Titane — J. Sarrau	380
Some Experimental Data on Parameter Variations with the Triode Getter-Ion Pump — A. R. Hamilton	388
The "Secondary" Electrical Gas Cleanup Mechanism — F. A. Baker	395
Electrical Cleanup in Ionization Gauges — K. B. Blodgett and T. A. Vanderslice ...	400
Elektrische Gasaufzehrung durch Anregung Metastabiler Zustände — R. Jaeckel und E. Teloy	406
Pressure-Versus-Time Variation in Closed Vessels Exhausted by Ionic Pumping — G. Comşa and B. Iosifescu	413

SECTION X

CRYOPUMPING

(CONTRIBUTED PAPERS)

A Catalytic Method for Cryopumping Hydrogen — J. Grobman	421
Cryopumping in the Free-Molecular Flow Regime — R. W. Moore, Jr.	426

SECTION XI

VACUUM GAUGES — DESIGN AND CHARACTERISTICS

(CONTRIBUTED PAPERS)

An Ionization Gauge for Measurement of Ultra-High Vacua — A. Klopfer	439
A Bayard-Alpert Type Ionization Gauge with a Low X-Ray Limit — A. Van Oostrom	443
The X-Ray Limit in Ionization Gauges — H. J. Schütze and H. W. Ehlbeck	451
Further Developments in the Hot-Cathode Magnetron Ionization Gauge — J. M. Lafferty	460
Etude et Réalisation d'une Nouvelle Jauge à Ionisation Tetrode — J. C. Edeline ...	464
A Wide Range Resonance Vacuum Gauge — H. Schwarz	467
A Vacuum Manometer Using Ultraviolet Light — I. Alexeff	472
General Observations on Hot Filament Ion Gauge Operation in Homogeneous Magnetic Fields — G. D. Martin, Jr.	476

VOLUME 1

	<i>Page</i>
The Use of Semiconductors in High Vacuum — M. Varićak	483
Response Time of Thermal Conductivity Vacuum Gauges — J. M. Benson	489
Design Parameters' Influence on M.I.T.-Bayard-Alpert Gauge Sensitivity — W. B. Nottingham	494

SECTION XII

VACUUM MEASUREMENTS, UNITS AND CALIBRATION

(CONTRIBUTED PAPERS)

Sur l'Etat Actuel du Problème des Unités en Science et Technique du Vide — E. Thomas et R. Leyniers	499
Reproducible Low Pressures and Their Application to Gauge Calibration — N. A. Florescu	504
Accurate Calibration of Vacuum Gauges to 10^{-9} Torr — J. R. Roehrig and J. C. Simons, Jr.	511
A Serious Error Caused by Mercury Vapour Stream in the Measurement with A McLeod Gauge in the Cold Trap System — H. Ishii and K. Nakayama	519
Eine genaue Relativmethode zur Druckbestimmung im Hochvakuum — R. Helbing, R. Jaeckel und H. Pauly	525
An Ultrahigh Vacuum Gage Calibration System — G. W. Monk, W. W. Stickney, III, and A. J. Calio	531
Use of a Standard Orifice in the Calibration of Vacuum Gauges — C. E. Normand	534
Absolute Measurement of High Vacuum — M. Onchi	544
Pressure Measurement in Non-Baked Ultra-High Vacuum Systems — D. J. Santeler	549
Improving the Accuracy of Metering Gas Flow and Computing Throughput — D. L. Stevenson	555

SECTION XIII

MASS SPECTROMETRY

(CONTRIBUTED PAPERS)

Eine Gegenüberstellung der Partialdruckmessgeräte Topatron und Omegatron — G. Reich und H. G. Nöller	560
Rapid Scanning r.f. Mass Spectrometer — H. W. Ehlbeck, J. Ruf and H. J. Schütze	567

VOLUME 1

	<i>Page</i>
The Mass Filter Partial-Pressure Vacuum Gauge — K. G. Günther and W. Hänlein	573
The Analysis of 10^{-14} to 10^{-6} cm ³ STP Noble Gas Samples by Mass Spectroscopy — L. F. Herzog, T. J. Eskew and R. L. Erwin	581
Mass-Spectrometer Investigations in Ultra-High Vacuum Systems — W. K. Huber and E. A. Trendelenburg	592
Residual Gases in Metal Vacuum Systems — M. Michijima, J. Okano, A. Fujinaga and K. Ogata	598
Residual Gases During Operation and Life-Testing of Power Klystrons — L. Noble and R. K. Waits	606
Analysis of Gases in an Oil Pumped Vacuum System by Use of an Automatically Controlled Mass Spectrometer — G. R. Giedd and G. C. Roberts	612
H ₂ ⁺ and H ₂ D ⁺ Ions in the Omegatron — G. Bajeu and G. Comşa	617
Techniques for the Admission of High Purity Gases to a Vacuum System — J. R. Young and N. R. Whetten	625

SECTION XIV

GENERAL VACUUM SUBJECTS

(CONTRIBUTED PAPERS)

Progrès Recents de la Spectroscopie dans le Vide — B. Rosen	628
Ultra-High Vacuum Ultraviolet Monochromator — L. Marton, J. A. Simpson, J. A. Suddeth and L. B. Leder	633
High Temperature Reactions of Silica-Glass with Several Metals in a Vacuum — H. Okamoto	640
Refining of Rice Oil by Molecular Distillation — K. Sakurai	647
Problems Associated with Low Pressure Ion Acceleration — A. H. Frentrop and H. Sherman	652
A Special Evaporator for Reflective Coating of a 74 Inch Astronomical Mirror — H. Takei, C. Hayashi, H. Mizorogi and Y. Fujino	656
The Application of Vacuum to Steam Sterilizers — T. W. G. Rowe, R. Kusay and E. Skelton	661
