

## Contents of Part One (Institute and Society Conference Series No. 5)

<i>Page</i>	
	<b>PLENARY SESSION</b>
3	Physical processes in vacuum <b>J. P. Hobson and P. A. Redhead</b>
21	Mass spectroscopy <b>E. W. Blauth</b>
35	Microscopie électronique à très haute tension <b>G. Dupouy et F. Perrier</b>
	<b>SESSION IA: STANDARDS, UNITS AND TERMINOLOGY</b>
43	On the present state of the problems of units and terminology in vacuum science and technology <b>E. Thomas</b>
48	Die Normung auf dem Gebiet der Vakuumtechnik <b>K. G. Günther</b>
57	Problems in vacuum physics influencing the development of standard measuring techniques <b>B. B. Dayton</b>
67	Performance specification of high-vacuum pumps <b>W. Steckelmacher</b>
73	The committee for bibliography and literature <b>J. H. Makkink</b>
	<b>SESSION IB: DRYING, CHEMICAL AND BIOLOGICAL APPLICATIONS</b>
79	Comparison of design parameters for food and biological freeze-drying plants <b>A. P. Longmore</b>
83	Über die kontinuierliche Gefriertrocknung von Kaffee-Extrakt <b>W. Armbruster</b>
	<b>SESSION IC: SORPTION AND DESORPTION OF CHARGED AND UNCHARGED PARTICLES</b>
89	La chimisorption sur les solides <b>D. A. Degras</b>
96	Absorptionsuntersuchungen bei sehr niedrigen Oberflächen-Bedeckungsgraden mit Hilfe von Molekularströmungs-Versuchen <b>B. A. Gottwald und R. Haul</b>
101	Quelques considerations sur l'étude des liaisons gaz-métal par la méthode de desorption thermique pulsée <b>J. Lapujoulade</b>
106	L'équilibre dynamique en physisorption à basses pressions <b>A. Schram</b>
111	Sorption kinetics, phase equilibrium and electrical resistivity of the hydrogen-tantalum system <b>K. Poulter and J. A. Pryde</b>

*Page*

- 115 The adsorption and absorption of hydrogen by evaporated tantalum films  
**D. O. Hayward and N. Taylor**
- 120 The simultaneous adsorption of hydrogen and nitrogen on polycrystalline tungsten (summary only)  
**J. H. Singleton**
- 121 Field emission-adsorption spectrometry by noise-glow curves—a new microscopic desorption method  
**Ch. Kleint**
- 127 Massenspektrometrische Untersuchung der durch Stoss langsamer Elektronen ausgelösten Ionendesorption  
**W. Huber und G. Rettinghaus**
- 131 Electron-induced desorption of gases from aluminium  
**E. L. Garwin, E. W. Hoyt, M. Rabinowitz and J. Jurow**
- 137 Electron-impact desorption of active gases from tungsten  
**D. R. Sandstrom, J. H. Leck and E. E. Donaldson**
- 141 Investigation of electronic desorption from metal surfaces  
**Yu. P. Vachrushin and V.V. Ryabov**
- 145 The influence of radiation damage on the trapping of low-energy He<sup>+</sup> ions in tungsten  
**K. Erents, G. Farrell and G. Carter**
- 149 The temperature dependence of deuterium ion trapping in niobium, titanium, zirconium and erbium  
**G. M. McCracken, D. K. Jefferies and P. Goldsmith**
- 155 An ultra-high-vacuum infra-red cell  
**R. W. Roberts and J. F. Harrod**
- 159 Interactions of gases with porous materials at low pressures  
**J. W. Coleman and F. A. Inkley**
- 164 The interaction of heavy particles with metal surfaces  
**J. Kistemaker, D. Onderdelinden, F. W. Saris and W. F. van der Weg**
- 175 Water chemisorption on stainless steel  
**R. A. Strehlow and D. M. Richardson**
- 179 Ultra-high-vacuum adsorption studies of CO<sub>2</sub> and O<sub>2</sub> on 'fresh' and 'passivated' silica and various glass surfaces  
**J. F. Antonini**
- 184 Sorption of nitrogen by continuously deposited titanium films  
**N. E. Biryukova, M. I. Vinogradov and M. N. Efimov**
- SESSION ID: SURFACE PHENOMENA**
- 191 Proton scattering as a tool for the study of crystal structures  
**R. S. Nelson**
- 198 L'étude des surfaces par la diffraction des électrons lents (D.E.L.)  
**P. Ducros**
- 203 An apparatus for the examination of single crystals by scattered protons  
**R. G. Livesey and G. Butcher**
- 207 Field-ion microscopy of non-refractory metals  
**P. J. Turner and M. J. Southon**

*Page***SESSION IE: SPACE SIMULATION**

- 213 The importance and realization of launch profile simulation in space chambers  
**A. Lorenz**
- 219 Background and state of the art of vacuum pumping in large space-simulation chambers  
**C. B. Barnes and J. Pinson**
- 225 Thermal-balance test chambers and their application to spacecraft  
**E. W. V. Acton and N. C. Breddy**
- 231 A 3-m spherical test-volume space-simulation facility for ESTEC  
**C. W. Hancock, D. Drechsel and G. Fischer**
- 237 Untersuchungen zur Verteilung des molekularen Flusses in Raumsimulations-Anlagen  
**R. A. Haefer und P. Kleber**

**SESSION IF: PARTICLE ACCELERATORS AND NUCLEAR-FISSION APPARATUS**

- 245 The vacuum systems of nuclear-fusion installations  
**Yu. M. Pustovoi**
- 251 Ultra-high vacuum system for a 3-GeV electron-positron storage ring at DESY, Hamburg  
**H. Pingel**
- 255 Ceramic vacuum chambers for the electron synchrotron at DESY, Hamburg  
**W. F. Gibbons**
- 259 Vacuum problems of the intersecting storage rings at CERN  
**R. S. Calder and R. L. Samuel**

**SESSION IG: ELECTRON TUBE SYSTEMS AND DEVICES**

- 267 Recent trends in vacuum studies for electron tubes  
**A. Venema**
- 271 An investigation of whisker formation and growth associated with electrical breakdown in vacuum  
**K. F. Poole and A. Venema**
- 275 Field electron emission from alloys  
**A. van Oostrom**

**SESSION IIA: MECHANICAL AND VAPOUR PUMPS**

- 283 Vakuumpumpen nach dem Kreiskolbenprinzip  
**M. Wutz**
- 290 Identification of some organic vapours from rotary pump oil by the combined chromatographic-mass-spectrometric technique  
**J. S. Olejniczak**
- 295 Methods of determining the nature of contaminants arising from pumps using organic fluids  
**M. A. Baker, L. Holland and L. Laurenson**

*Page*

- 300 Speed and compressibility computations by a new diffusion-pumping theory based on the kinetic theory of non-uniform gases  
**G. Tóth**
- 305 Besonderheiten des Wärmeaustausches im Siedegefäß von Öl-Treibmittelpumpen und ihre Wirkung auf die Vakuumcharakteristiken der Pumpen  
**M. M. Sorokin und A. W. Tschetschotkin**

**SESSION IIB: ION PUMPS AND GETTER PUMPS**

- 317 The physics of sputter-ion pumps  
**R. L. Jepsen**
- 325 The development of sputter-ion pumps  
**D. Andrew**
- 332 The discharge mechanism in a magnetic ion pump  
**L. de Chernatony and R. D. Craig**
- 337 Inert-gas pumping in a magnetron pump  
**D. Andrew, D. R. Sethna and G. F. Weston**
- 341 Instabilité du système plasma-faisceau électronique et phénomènes associés au point de vue du mécanisme des pompes du type Penning  
**G. Grigorov et G. Panev**
- 345 A model of the Penning discharge in the neighbourhood of the transition point  
**L. T. Lamont, Jr.**
- 349 Améliorations apportées aux pompes Penning du type diode  
**C. Coumes et J. Pontvianne**
- 353 Etude et réalisation d'une famille de pompe ionique à getter du type triode  
**B. Aubry**
- 356 On the ion current distribution on the cathode in an ion pump discharge at low pressures  
**G. V. Smirnitskaya and Nguyen-Khiu-Tee**
- 361 Residual-gas analysis in an Orb-Ion pump system  
**J. C. Maliakal**
- 365 Neuere Untersuchungen über den Edelgas-Pumpmechanismus von Ionenzerstäuber-Pumpen des Diodentyps  
**W. Bächler und H. Henning**
- 369 Magnetless gauge appendage pump utilizing non-evaporable getter material  
**P. della Porta and B. Ferrario**
- 373 Evaluation of a high-rate titanium getter pump  
**D. D. Robertson**
- 377 Getter properties of yttrium as used in a getter-ion pump  
**D. R. Denison**
- 382 Un piège ionique et à getter pour canalisation primaire  
**J. M. Sarrau**

*Page***SESSION IIC: SORPTION PUMPS AND CRYOPUMPS**

- 389 The influence of the initial conditions on the pumping properties of molecular sieves  
**P. Lukáč**
- 393 Pumping speed of molecular sieves in the forevacuum region  
**A. L. Boers**
- 397 Essais d'amélioration du pompage par les zéolithes  
**P. Noé, Madeleine Constant et G. Troadec**
- 401 Die Titanverdampfer, die an der 'OGRA' in der asotiten Auspumpenanordnung verwendet werden  
**W. I. Butussow, Je. A. Masslennikow, M. Ja. Miljagin, I. A. Tshuchin und T. A. Schewtschenko**
- 405 A cryosublimation trap for extremely high-vacuum systems  
**D. H. Holkeboer**
- 409 Entwicklung einer integrierten Kryopumpe für den Einsatz in vakuumtechnischen Forschungs- und Produktionsanlagen  
**F. X. Eder, J. Hengevoss und H. Woessner**
- 414 The automatic control, information processing and analysis of condensation-pumping experiments  
**J. N. Chubb, L. Gowland, I. E. Pollard and E. K. Sinton**
- 419 Measurement of Omnitron cryopumping and outgassing by  $10^{-16}$ -torr pulse-counting mass filter  
**N. Milleron, R. Wolgast and J. M. Nitschke**
- 425 Kontinuierliche Kühlung zwischen 4,2 und 1°K  
**H.-J. Forth**

**SESSION IID: GAS KINETICS**

- 433 Monte Carlo studies of free molecular gas flow through various vacuum structures  
**J. N. Chubb**
- 439 Problems of molecular motion in high-vacuum systems with adsorbing walls  
**C. Pisani**
- 443 Messungen zum Transport von Oelmolekülen in Rohrleitungen  
**W. K. Huber**
