

Contents of Part Two (Institute and Society Conference Series No. 6)

SESSION IIE: VACUUM METALLURGY

- 451 Progress in vacuum metallurgy
O. Winkler
- 458 A new 260-kw electron-beam multiple-gun production melting furnace and a new application of electron-beam melting
W. Dietrich and H. Stephan
- 463 Electron-beam technology
R. Bakish
- 469 The effect of surface treatment on the outgassing rates of 304 stainless steel
Y. E. Strausser
- 473 L'élaboration sous vide partiel de matériaux réfractaires selon le procédé de réaction chimique en phase vapeur
B. Pinteau

SESSION IIIA: VACUUM DEPOSITION OF THIN FILMS

- 479 Evaporated single-crystal films
J. W. Matthews
- 486 Correlation between the thickness distribution of evaporated thin films and the emission characteristics of the vapour source
B. Štepie *
- 491 Programmed control of vacuum-deposited multilayers
J. English, T. Putner and L. Holland
- 496 The choice of deposition technique for Ni-Fe-Cr thin films
A. S. Young and R. J. Heritage
- 501 Explosive evaporation—a method for ultra-rapid deposition of magnetic thin films
D. R. Gray and V. J. Hammond
- 505 Thin-film deposition by explosion as a method of effectively increasing vacuum purity
L. N. Aleksandrov, E. I. Dagman and V. I. Petrosyan
- 510 Some optical measurements on thin films in an ultra-high-vacuum system
R. W. Fane and W. E. J. Neal
- 515 Epitaxial films of gold and silver formed on magnesium oxide in ultra-high vacuum
P. W. Palmberg, T. N. Rhodin and C. J. Todd
- 520 U.h.v. ten-substrate supply and manipulator assembly for *in situ* resistivity RHEED and THEED thin-film studies
R. B. Marcus and N. Soucek
- 523 Jauge à ionisation à balayage électronique destinée à la régulation des évaporations sous vide
B. Zega
- 527 Optimum usage of quartz-crystal monitor-based devices
R. P. Riegert

<i>Page</i>	
531	Photoelectric analysis of vacuum-deposited films E. Kansky
536	Some experiments on evaporation synthesis: formation of TiN and ZrN A. Itoh
541	Tetrode sputtering E. C. Muly, Jr. and A. J. Aronson
545	Tetrode sputtering and its application to the deposition of tantalum, silica and alumina thin films Z. Oda, T. Asamaki, H. Muta and T. Mizonobe
549	A comparative study of open-end and closed-end continuous sputtering systems A. M. Hanfmann and F. J. Viola
554	The mechanism of reactive sputtering (summary only) E. J. Hollands and D. S. Campbell
555	Capacitance and impedance of the glow discharge in r.f. sputtering (summary only) R. T. C. Tsui
557	Argon content of Si and SiO ₂ films deposited by r.f. sputtering in argon R. E. Jones, M. A. Zuegel and G. C. Schwartz
561	Deposition of magnetosensitive films by cathodic sputtering T. J. Fountain and P. Norgate
565	Uniformity of r.f.-deposited films G. N. Jackson and T. I. Putner
569	Ein Ionenstrahlssystem zum Zerstäuben von Metallen und Isolatoren im Hochvakuum O. Fiedler, G. Reisse, B. Schöneich und C. Weissmantel
573	Electron-beam steel-strip-coating units W. Dietrich, A. Hauff and W. Reichelt
579	Microbalance techniques K. H. Behrndt
SESSION IIIB: TOTAL-PRESSURE MEASUREMENT AND VACUUM GAUGES	
591	Evolution des mesures de pression totale P. S. Choumoff
600	Gauge-calibration facility for operation at extremely low pressures L. E. Bergquist
605	Calibration of vacuum gauges at pressures below 10 ⁻¹⁰ torr W. D. Davis
609	A calibration system for total-pressure gauges in the range 10 ⁻³ -10 ⁻⁵ torr J. G. Bannenberg and A. Tip
613	La jauge à suspension diamagnétique fournit-elle des mesures absolues? Discussion théorique H. Dormont

Page

- 619 The measurement of hydrogen pressure with a modulated Bayard–Alpert gauge at very low pressures
J. P. Hobson and J. W. Earnshaw
- 623 Classification and dynamic calibration of ionization sensors and detectors
J. A. Alcalay and E. L. Knuth
- 627 The surface component in ionization gauges
J. L. de Segovia, J. M. Lopez-Sancho and C. S. Martin
- 631 The development of ionization gauges for very low pressures
J. Groszkowski
- 638 Investigations with a variable-geometry Orbitron gauge
R. Walker and D. J. Pacey
- 643 Direct measurements of ion collection in Bayard–Alpert gauges
G. Comşa and A. Mircea
- 647 A hot-cathode magnetron ionization gauge with a high conversion constant for the measurement of extreme ultra-high vacua
J. M. Lafferty
- 651 The design and applications of a high-pressure ionization gauge
J. S. Cleaver
- 656 UHV-Kaltkathoden-Ionisationsmanometer
H. Mennenga und W. Schaedler
- 661 Probleme bei Verwendung von Ionisationsvakuummetern im Druckbereich oberhalb 10^{-2} Torr
G. Reich und W. Schulz
- 666 A study of the calibration curves of the cold-cathode magnetron gauge
G. A. Nichiporovich and I. F. Khanina
- 671 Vacuummeter with self-cleaning gauge for operating in vacuum systems with a high oil-vapour background
A. M. Grigor'ev
- 675 Perfectionnement sur les jauges à ionisation par source radioactive: l'Alphavac 500
P. Andrieux et B. Iapteff
- 679 The McLeod gauge vapour stream effect
R. S. Dadson, K. W. T. Elliott and Daphne M. Woodman
- SESSION IIIC: PARTIAL-PRESSURE MEASUREMENTS, GAS ANALYSIS AND MASS SPECTROMETERS**
- 685 Quadrupole ionization gauge
H. Schwarz
- 690 Gas analysis with pulsed vacuum networks
B. R. F. Kendall and R. E. Pulfrey
- 695 The quadrupole-50 miniature residual-gas analyser
C. J. Bargery and G. W. Ball

<i>Page</i>	
699	Design and performance of a miniature mass spectrometer J. A. Coulson and C. D. Hall
703	Some properties of the monopole mass spectrometer F. Lah and R. Zavašnik
707	A mass spectrometer for high-temperature inert-gas analysis N. G. Wilson and C. R. Winkelman
713	Partial-pressure analysis with three-dimensional quadrupole fields N. R. Whetton and P. H. Dawson
717	Instrumentation for partial-pressure analysis and transient gas atmospheres W. Steckelmacher, R. D. Collins and M. J. Fulker
722	The effect of space charges on partial-pressure measurements in ultra-high vacuum H.-J. Bültemann
729	The properties of omegatrons with non-uniform r.f. fields J. Bijma, E. P. Th. M. Suurmeijer and J. C. Francken
SESSION IVA: VACUUM SYSTEMS	
737	Problèmes d'étanchéité posés par l'ultra-vide—solutions nouvelles R.-G. Bernard
741	Sealography of vacuum seals having circumferentially machined surfaces A. Roth and A. Inbar
747	Improved tee connections for vacuum systems H. M. Ruess
SESSION IVB: SPECIALIZED SYSTEMS	
753	Practical design aspects of a continuous air-to-air vacuum processing machine B. J. Williams, B. Fletcher and J. A. A. Emery
759	The stoppering of containers in vacuum E. W. Malpas
763	SNAP 8 vacuum system H. Strahl
767	An ultra-high-vacuum system for a reactor beam tube E. Baltacis, R. Dobrozemsky and W. Kubischta
SESSION IVC: MATERIALS AND COMPONENTS	
775	Some observations on the outgassing of stainless steel after cleaning by various methods R. S. Barton and R. P. Govier
782	A dynamic gas flowmeter for ultra-high vacuum N. G. Wilson
787	Etude de la fatigue des métaux sous vide et ultra-vide B. Aubry et H. Bernardet

Page

- 791 The effect of ultra-high-vacuum environment on the fatigue life of steel
D. W. Morecroft
- 795 Über einige Probleme der Gasabgabe-Messung an Vakuumwerkstoffen mit dem Massenfilter
H. Stötzel
- 801 Gas emission from some structural materials in vacuum at room temperature and after degassing at 150–450°C
V. S. Zhilnin, L. P. Zhilnina and A. A. Kuzmin
- 809 Vacuum weight-loss and contamination tests of some materials for space application
H. C. Poehlmann

SESSION IVD: EDUCATION

- 817 Industrial education in vacuum principles
J. A. Kurtz
- 821 Vacuum technology in an honours (sandwich) degree course in applied physics
L. Ward and J. P. Bunn
- 825 Author index

LIST OF PLATES

Plates I—II	between pp. 128 and 129
Plates III—X	„ „ 224 „ 225
Plates XI—XIV	„ „ 272 „ 273
Plates XV—XVIII	„ „ 336 „ 337
Plates XIX—XXI	„ „ 400 „ 401
Plates XXII—XXIX	„ „ 464 „ 465
Plates XXX—XXXIII	„ „ 496 „ 497
Plates XXXIV—XXXIX	„ „ 528 „ 529
Plates XL—XLIII	„ „ 560 „ 561
Plates XLIV—XLVII	„ „ 688 „ 689
Plates XLVIII—LI	„ „ 720 „ 721
Plates LII—LIII	„ „ 784 „ 785
