

CONTENTS

Preface	<i>page vii</i>
1. Measurement of Pressure in the Ultra-high Vacuum Range	1
2. Pumping by Ionization, Sorption and Cryogenics	35
3. Fundamental Principles of Mechanical Appliances in Ultra-high Vacuum	83
4. Mass Spectrometry	102
5. Principles of Leak Detection	132
6. Residual Gases in Ultra-high Vacuum Systems	150
7. Adsorption Phenomena	175
8. Transfer of Gases at Ultra-high Vacuum	214
9. Degassing Phenomena and the Preparation of Clean Surfaces	233
Subject Index	265
Author Index	268
