

CONTENTS

Part I THIN FILM INTEGRATED DEVICE TECHNOLOGY

Chapter 1	Thin Film Formation Techniques and Electronic Mechanisms	3
	Newton Schwartz	
	1-1 <i>Methods of forming and shaping films, 9</i>	
	1-2 <i>Basic electronic processes, 30</i>	
Chapter 2	Thin Film Materials and Fabrication Methods	48
	Newton Schwartz	
	2-1 <i>Substrates, 48</i>	
	2-2 <i>Resistor materials and fabrication methods, 60</i>	
	2-3 <i>Capacitor materials and fabrication methods, 82</i>	
Chapter 3	Design of Thin Film Resistors and Capacitors	100
	W. H. Orr	
	3-1 <i>Thin film resistors, 101</i>	
	3-2 <i>Thin film capacitors, 149</i>	

Chapter 4	Thin Film Conductors, Distributed Components, and Circuit Layout	174
	W. H. Orr	
	4-1 <i>Conducting films</i> , 174	
	4-2 <i>Distributed film components</i> , 184	
	4-3 <i>Thin film circuit layout</i> , 208	
	4-4 <i>Hybrid integrated circuits</i> , 223	
 Part II SEMICONDUCTOR INTEGRATED CIRCUIT DEVICE TECHNOLOGY 		
Chapter 5	Semiconductor Device Theory	233
	M. C. Waltz	
	5-1 <i>Semiconductor physics</i> , 234	
	5-2 <i>The p-n junction theory</i> , 250	
	5-3 <i>Bipolar transistor theory</i> , 267	
	5-4 <i>Unipolar transistor theory</i> , 288	
Chapter 6	Design of Semiconductor Integrated Circuits	296
	M. C. Waltz	
	6-1 <i>Some characteristics of semiconductor integrated circuits</i> , 297	
	6-2 <i>Isolation techniques</i> , 299	
	6-3 <i>Fabrication of monolithic silicon integrated circuits</i> , 305	
	6-4 <i>Design of silicon integrated circuit elements</i> , 316	
	6-5 <i>Integrated circuit layout</i> , 344	
	6-6 <i>Circuit tolerances and costs</i> , 347	
Chapter 7	Device Encapsulation and Evaluation	355
	F. L. Howland and C. H. Zierdt	
	7-1 <i>Encapsulation of integrated circuits</i> , 356	
	7-2 <i>Thermal design of semiconductor device structures</i> , 362	
	7-3 <i>Stress analysis of semiconductor device structures</i> , 383	
	7-4 <i>Device evaluation and application analysis</i> , 397	
	7-5 <i>Stress testing</i> , 400	
	7-6 <i>Quality control of devices for production</i> , 420	
	7-7 <i>Integrated circuit reliability</i> , 432	

Part III CONTACT AND CONNECTION TECHNOLOGY

Chapter 8 Principles of Conduction Through Electrical Contacts	439
H. N. Wagar	
8-1 <i>Introduction to closed contact problems</i> , 440	
8-2 <i>Properties of a clean contact</i> , 445	
8-3 <i>Conduction properties of contact films</i> , 464	
8-4 <i>Practical considerations in contact usage</i> , 484	
Chapter 9 Performance Principles of Switching Contacts	500
H. N. Wagar	
9-1 <i>Electrical breakdown in switching contacts</i> , 501	
9-2 <i>Erosion of contacts</i> , 563	
9-3 <i>Mechanical phenomena</i> , 572	
9-4 <i>Design for contact reliability</i> , 580	
9-5 <i>Sealed contacts</i> , 586	
Chapter 10 Semipermanent and Permanent Pressure Connections	595
R. H. Van Horn	
10-1 <i>Plug-in connections</i> , 596	
10-2 <i>Screw connections</i> , 622	
10-3 <i>Solderless wrapped connections</i> , 624	
10-4 <i>Crimped connections</i> , 637	
10-5 <i>Pierce-and-pressure connections</i> , 640	
Chapter 11 Bonded and Welded Connections	655
A. Coucoulas, G. E. Kleinedler, and R. H. Van Horn	
11-1 <i>Factors that affect joining</i> , 656	
11-2 <i>Alloy bonding</i> , 659	
11-3 <i>Solid-phase bonding</i> , 673	
11-4 <i>Fusion welding</i> , 693	
11-5 <i>Connection evaluation</i> , 701	
Appendix A Principal Symbols and Units for Volume III	707
Index	721
