

# CONTENTS

<i>Foreword</i> . . . . .	v
<i>Preface</i> . . . . .	vii
<i>Acknowledgments</i> . . . . .	xi
<b>Chapter 1. Single-Charge Calculations; Linear and Nonlinear Analysis</b> . . . . .	<b>1</b>
1.01 Model . . . . .	2
1.02 Force, Acceleration, Velocity, Displacement . . . . .	3
1.03 Concept of Induced Current . . . . .	6
1.04 Calculation of Induced Current . . . . .	11
1.05 Crossings, Densities, Work, Voltage from Differential Relations . . . . .	14
1.06 Ideal Diode, Emission Limited, Linear Approximations . . . . .	17
References . . . . .	23
<b>Chapter 2. General Linear Analysis, including Space-Charge Fields, with Applications</b> . . . . .	<b>24</b>
2.01 Historical Development . . . . .	24
2.02 Model, Basic Equations, Outline of Method . . . . .	28
2.03 Meaning of the Total Time Derivative, $d/dt$ . . . . .	31
2.04 Kinetic Power, Conservation. . . . .	34
2.05 Static Solutions . . . . .	35
2.06 Dynamic Solutions . . . . .	38
2.07 Summary of Solutions . . . . .	41
2.08 Use of the Space-Charge Factor $\zeta$ ; Plasma Frequency $\omega_p$ . . . . .	43
2.09 Applications to Vacuum and Emission-Limited Diodes . . . . .	48

2.10	Application to Space-Charge-Limited Diode . . . . .	50
2.11	Applications to Multielement Tubes . . . . .	54
2.12	Application to Velocity Jump . . . . .	59
2.13	Equivalence of Llewellyn and Space-Charge Wave Equations. . . . .	60
2.14	Space-Charge Loading of an Output Gap . . . . .	63
	References . . . . .	65
<b>Chapter 3. Stability of Flow; Nonlinear Solution of Multi-</b>		
<b>particle Model . . . . .</b>		<b>68</b>
3.01	Time-Independent Diode Behavior; Classical Solutions . . . . .	69
3.02	An Historical Sketch of the Classical Theory . . . . .	79
3.03	Energy at the Point of Instability . . . . .	81
3.04	Expectation of Time Growth from Linear Analysis . . . . .	86
3.05	Single Sheet Model, Short-Circuited Diode . . . . .	90
3.06	Single Sheet Model, Open-Circuited Diode . . . . .	94
3.07	Single Sheet, Neutralized, Short-Circuited Diode . . . . .	96
3.08	Single Sheet, Neutralized, Open-Circuited Diode: Plasma Propulsion . . . . .	98
3.09	Multiple-Sheet Model . . . . .	101
3.10	Time Response with Increasing Current . . . . .	107
3.11	Detailed Behavior, Short-Circuited Diode . . . . .	108
3.12	Effect of Finite External Resistance . . . . .	116
3.13	Effect of Velocity Distribution . . . . .	118
	References . . . . .	122
<b>Chapter 4. High Velocity Gap: Multicavity Klystron . . . . .</b>		<b>125</b>
4.01	Uniform Field . . . . .	126
4.02	General Field . . . . .	127
4.03	Gap Loading . . . . .	132
4.04	Traveling-Wave, Slow-Wave Gap . . . . .	133
4.05	The Multicavity Klystron . . . . .	136
	References . . . . .	147
<b>Chapter 5. The Crossed-Field Gap . . . . .</b>		<b>148</b>
5.01	Model, Assumptions . . . . .	149
5.02	Equations of Motion . . . . .	150
5.03	Integration of the Equations of Motion . . . . .	151
5.04	Static Solutions . . . . .	152
5.05	Parameters of the Space-Charge-Limited Diode . . . . .	154

5.06	Dynamic Solutions . . . . .	157
5.07	Summary of Solutions . . . . .	160
5.08	Space-Charge Factor $\zeta$ . . . . .	163
5.09	Open-Circuited, Temperature-Limited Diode . . . . .	163
5.10	Open-Circuited, Space-Charge-Limited Diode . . . . .	166
5.11	Open-Circuited, High Initial Velocity Diode . . . . .	168
5.12	Magnetron-Injection Gun . . . . .	170
	References . . . . .	174

## **Chapter 6. Velocity and Current Distributions from Electron Emitters . . . . . 176**

6.01	Conditions at a Thermionic Electron Emitter . . . . .	177
6.02	Time-Independent Diode Solution . . . . .	181
6.03	Shot Noise . . . . .	188
6.04	Shot Noise Diode Current, Temperature-Limited Cathode. . . . .	195
6.05	Velocity Fluctuations Due to Cathode Current Fluctuations . . . . .	198
6.06	Space-Charge-Limited Diode: Introduction . . . . .	200
6.07	Space-Charge-Limited Diode: Multivelocity Calculations . . . . .	203
6.08	Photoemission . . . . .	209
6.09	Secondary Emission . . . . .	220
6.10	Grids; Partition and Induced Grid Noise . . . . .	229
	References . . . . .	232

## **Chapter 7. Transit-Time Effects in Semiconductors . . . . . 236**

	Introduction . . . . .	236
7.01	Simple Static Solution for Space-Charge-Limited Current . . . . .	238
7.02	Model, Basic Equations, Outline of Method . . . . .	240
7.03	Static Solutions . . . . .	243
7.04	Dynamic Solutions . . . . .	245
7.05	Impedance of an Intrinsic <i>pip</i> Diode . . . . .	248
7.06	Space-Charge-Limited Injection Impedance . . . . .	250
7.07	Emitter-Current-Limited Injection . . . . .	254
7.08	Impedance with Majority Carriers in <i>pπp</i> Diode . . . . .	259
	References . . . . .	260
