

# Table of Contents

Preface .....	iii
PART I—GENERAL DISCUSSION	
1. Introduction .....	1
2. Autocovariance Functions and Power Spectra .....	7
3. The Practical Situation .....	9
CONTINUOUS RECORDS OF FINITE LENGTH	
4. Fundamentals .....	11
5. Two Particular Window Pairs .....	14
6. Covariability of Estimates—Basic Result .....	15
7. Covariability of Estimates—Approximate Forms .....	18
8. Variability—Equivalent Widths .....	19
9. Chi-Square—Equivalent Degrees of Freedom .....	21
10. Direct Analog Computation—Graded Data Windows .....	25
11. Distortion, Noise, Heterodyne Filtering and Prewhitenning .....	28
EQUALLY SPACED RECORDS	
12. Aliasing .....	31
13. Transformation and Windows .....	33
14. Variability and Covariability .....	37
15. Prewhitenning .....	39
16. Rejection Filtering and Separation .....	42
17. Smoothing by Groups .....	44
18. Pilot Estimation .....	45
19. Very Low Frequencies .....	47
ANALYSIS IN PRACTICE	
20. Practical Analysis of an Equally Spaced Record .....	50
21. Sample Computing Formulas .....	52
PLANNING FOR MEASUREMENT	
22. Choice of Frequency Response .....	55
23. Duration of Data Required .....	56
24. Amount of Digital Data-Handling Required .....	57
25. Quality of Measurement and Handling .....	57
26. Example A .....	58
27. Example B .....	62
28. Example C .....	63
Appendix A. Fundamental Fourier Techniques	
A.1 Fourier Transformation .....	66
A.2 Some Transform-Pairs .....	68
A.3 Convolution .....	72
A.4 Windows .....	77
A.5 Realistic Pairs from Unrealistic Pairs .....	78
A.6 Some Trigonometric Identities .....	80

## TABLE OF CONTENTS

## PART II—DETAILS AND DERIVATIONS

B.1 Gaussian Processes and Moments.....	83
B.2 Autocovariance Functions and Power Spectra for Perfect Information.....	84
B.3 The Practical Situation.....	88

## DETAILS FOR CONTINUOUS ANALYSIS

B.4 Power Spectrum Estimation from a Continuous Record of Finite Length.....	90
B.5 Particular Pairs of Windows.....	95
B.6 Covariability of Power Density Estimates—Basic Result.....	100
B.7 Covariability of Estimates—Various Approximations.....	103
B.8 Equivalent Widths.....	106
B.9 Equivalent Degrees of Freedom.....	111
B.10 Filtering and Analog Computation.....	112
B.11 Prewhitenning.....	116

## DETAILS FOR EQUI-SPACED ANALYSIS

B.12 Aliasing.....	117
B.13 Transformation and Windows.....	120
B.14 Variability and Covariability.....	124
B.15 and 16 Transversal Filtering.....	125
B.17 Smoothing and Decimation Procedures.....	129
B.18 Modified Pilot Estimation, Cascade Estimation.....	135
B.19 Rejection Near Zero Frequency.....	139
B.20 (Omitted).....	
B.21 Sample Computing Formulas.....	146

## DETAILS FOR PLANNING

B.22 (Omitted).....	
B.23 Duration Requirement Formulas.....	147
B.24 Digital Requirement Formulas.....	149
B.25 (Omitted).....	
B.26 (Omitted).....	
B.27 (Omitted).....	
B.28 Analysis of Example C.....	151

Index of Notations.....	161
Glossary of Terms.....	167
Acknowledgment.....	178
References.....	179
Bibliography.....	180
General Index.....	181
