| 1. Introduction. By J. I. Pankove (With 19 Figures) | 1 |
| 1.1 Characterization of Displays | 1 |
| 1.1.1 Luminance or Brightness | 1 |
| 1.1.2 Color | 3 |
| 1.1.3 Contrast and Gradation | 3 |
| 1.1.4 Directional Visibility | 4 |
| 1.1.5 Driving Power | 4 |
| 1.1.6 Efficiency | 4 |
| 1.1.7 Speed | 5 |
| 1.1.8 Memory and Storage | 5 |
| 1.1.9 Degradation | 5 |
| 1.1.10 Resolution and Size | 5 |
| 1.1.11 Addressability | 6 |
| 1.2 Psychophysical Factors | 6 |
| 1.3 Technical Discussion of Display Devices | 11 |
| 1.3.1 Light-Emitting Diodes—LED | 11 |
| 1.3.2 Plasma Panel | 12 |
| dc Plasma Display | 12 |
| ac Plasma Display | 12 |
| Comparison of ac and dc Plasma Displays | 12 |
| Color Control in Plasma Displays | 13 |
| TV Plasma Panel | 13 |
| 1.3.3 Electroluminescence | 14 |
| dc EL | 14 |
| ac Thin-Film EL | 15 |
| 1.3.4 Incandescent Display | 19 |
| 1.3.5 Cathodoluminescent Displays | 19 |
| 1.3.6 Liquid-Crystal Displays — LCD | 21 |
| 1.3.7 Electrochromic Displays — ECD | 23 |
| 1.3.8 Electrophoretic Displays — EPID | 24 |
| 1.3.9 Electroplating Cell | 24 |
| 1.3.10 Light Valves | 25 |
| Water Jets | 25 |
| Rotating-Balls Displays | 26 |
| Moving Flaps | 26 |
| Suspended Particles | 27 |

| | |

| 1.3.11 Electro-Optic Modulators | 28 |
| 1.4 Applications | 32 |
| References | 32 |
| 2. Light-Emitting Diodes — LEDs. By C. J. Nuese and J. I. Pankove (With 41 Figures) | 35 |
| 2.1 Carrier Excitation | 36 |
| 2.1.1 Photoluminescence | 36 |
| 2.1.2 Cathodoluminescence | 36 |
| 2.1.3 Injection Electroluminescence | 37 |
| p-n Junction | 38 |
| Heterojunction | 41 |
| Schottky Barrier | 41 |
| MIS Structure | 42 |
| 2.2 Recombination Processes | 43 |
| 2.2.1 Band-to-Band Radiative Recombination | 43 |
| 2.2.2 Radiative Recombination via Impurities | 45 |
| 2.2.3 Nonradiative Recombination | 47 |
| 2.3 Materials for LEDs | 51 |
| 2.3.1 Brightness Considerations | 51 |
| 2.3.2 Binary Compounds | 52 |
| III-V Compounds | 54 |
| Silicon Carbide | 58 |
| II-VI Compounds | 59 |
| Chalcopyrites | 60 |
| 2.3.3 Ternary Alloys | 61 |
| 2.3.4 Quaternary Alloys | 64 |
| 2.4 Metallurgical Considerations | 65 |
| 2.4.1 Crystal Defects | 65 |
| 2.4.2 Lattice Mismatch | 69 |
| 2.4.3 Optical Losses | 70 |
| 2.4.4 Series Resistance | 72 |
| 2.4.5 Degradation | 73 |
| 2.5 LED Technology | 74 |
| 2.5.1 Vapor-Phase Epitaxy | 75 |
| 2.5.2 Liquid-Phase Epitaxy | 78 |
| 2.5.3 Impurity Diffusion | 80 |
| 2.5.4 Glow-Discharge Decomposition | 81 |
| 2.5.5 Device Structures | 82 |
| 2.6 Applications | 86 |
| References | 87 |
| 3. AC Plasma Display. By T. N. Criscimagna and P. Pleshko (With 41 Figures) | 91 |
| 3.1 Background Information | 91 |

| | | |
|-------|--|-----|
| 3.1.1 | Historical Evolution | 91 |
| 3.1.2 | Modes of Operation | 94 |
| 3.1.3 | Basic Cell Operation | 95 |
| 3.1.4 | Cell Light Emission | 96 |
| 3.2 | Panel Materials and Processing | 96 |
| 3.2.1 | Substrate | 97 |
| 3.2.2 | Conductors | 98 |
| | a) Thick-Film Conductors | 98 |
| | b) Thin-Film Metallurgy | 99 |
| 3.2.3 | Dielectric Films | 100 |
| | a) Paste Dielectric Deposition | 100 |
| | b) Evaporated Dielectric Deposition | 100 |
| 3.2.4 | Overcoat Materials and Gas Mixtures | 101 |
| | a) Operating Voltage | 101 |
| | b) Stability | 103 |
| 3.2.5 | Seals, Spacers, and Backfill | 105 |
| 3.3 | Voltage-Transfer Characteristics of a Cell | 105 |
| 3.3.1 | Wall Charge and Wall Voltage | 105 |
| 3.3.2 | Stable Discharge Sequences | 107 |
| 3.3.3 | Voltage-Transfer-Characteristic Curve | 110 |
| 3.3.4 | Writing Operation | 111 |
| | a) Minimum Write Voltage | 111 |
| | b) Perfect Write Voltage | 113 |
| | c) Maximum Write Voltage | 113 |
| 3.3.5 | Erase Operation | 113 |
| | a) Minimum Erase Voltage | 114 |
| | b) Perfect Erase Voltage | 115 |
| | c) Maximum Erase Voltage | 115 |
| | d) General Aspects of the Erase Operation | 115 |
| 3.4 | Nonhomogeneous Cell Characteristics in a Panel | 115 |
| 3.4.1 | Cell-to-Cell Interaction | 116 |
| | a) Priming | 116 |
| | b) Effects of Priming Interaction | 117 |
| | c) Wall Voltage Interaction | 118 |
| | d) Dielectric Interaction | 121 |
| 3.4.2 | Physical Parameters and Their Effects | 123 |
| 3.5 | Write, Erase, and Sustain Margins | 126 |
| 3.5.1 | Panel Operating-Voltage Margins | 126 |
| 3.5.2 | Image Test Patterns | 128 |
| | a) Test Patterns and Test Panels | 128 |
| | b) Worst-Case Test Patterns | 128 |
| | c) Worst-Case Test-Pattern Sequences | 129 |
| 3.6 | Drive Waveforms | 130 |
| 3.6.1 | Sustain Waveforms | 130 |
| | a) Non-Return-to-Zero Waveforms | 130 |

- b) Symmetrical Return-to Zero Waveforms 131
 - c) Modified Return-to-Zero Waveforms 131
 - d) Distortion in Sustain Waveforms 131
 - 3.6.2 Write Waveforms 132
 - a) Selection States of Cells 132
 - b) Write Waveforms for Selected Cells 132
 - c) Write-Pulse Width and Rise Time 133
 - d) Delayed Position of the Write Pulse 133
 - 3.6.3 Erase Waveforms for Selected Cells 134
- 3.7 Panel Operating Drive Systems 135
 - 3.7.1 Sustain Drive 135
 - 3.7.2 Half-Select Pulses 135
 - 3.7.3 Half-Select Cancellation Pulses 137
 - 3.7.4 Full-Select Pulses 139
 - 3.7.5 Panel Drive Systems 139
 - a) Diode-Matrix Drive Array System 140
 - b) Active Circuit Driver System 142
 - c) Integration of the Sustain and the Selection Functions . 145
- 3.8 Panel Limitations and Extensibility 146
 - 3.8.1 Resolution 146
 - 3.8.2 Color 147
 - 3.8.3 Image 148
- 3.9 Summary 149
- References 149

4. Liquid-Crystal Displays, LCD. By D. J. Channin and A. Sussman
(With 10 Figures) 151

- 4.1 Background Information 151
- 4.2 Device Physics 152
 - 4.2.1 Nematic LCD 152
 - 4.2.2 Field-Effect LCD 153
 - 4.2.3 Electrohydrodynamic LCD 157
 - 4.2.4 Optical Characteristics of LCD 159
- 4.3 Large-Scale Displays 160
 - 4.3.1 Addressing Techniques for Large-Scale Displays 160
 - Multiplexing 160
 - Switching-Device Arrays 162
 - Photoconductive Light Valves 163
 - Thermally Addressed Light Valves 164
 - 4.3.2 Multiplexing Theory 165
- 4.4 Device Performance 168
 - 4.4.1 Dynamic Scattering 169
 - 4.4.2 Twisted-Nematic Field-Effect Display 171
- 4.5 Manufacturing Technology 177

| 4.6 Final Comments | 178 |
| References | 178 |
| 5. Electrochromic Displays Based on WO₃ | |
| By B. W. Faughan and R. S. Crandall (With 9 Figures) | 181 |
| 5.1 Background Information | 181 |
| 5.1.1 Electrochromic Displays | 181 |
| 5.1.2 Historical Outline | 182 |
| 5.1.3 Nature of EC in WO ₃ | 184 |
| 5.2 Principles of Electrochromism in WO ₃ | 185 |
| 5.2.1 Basic Phenomenon of the EC Effect in WO ₃ | 185 |
| 5.2.2 Dynamics of Coloring and Bleaching | 186 |
| 5.2.3 Optical Properties | 191 |
| Experiment | 191 |
| Model for the Optical Transition | 192 |
| 5.3 Material Preparation and Characterization | 193 |
| 5.3.1 Preparation | 193 |
| 5.3.2 Film Characterization | 195 |
| 5.4 Device Technology | 196 |
| 5.4.1 Introductory Remarks | 196 |
| 5.4.2 Liquid-Solid Devices | 197 |
| 5.4.3 All-Solid State Devices | 198 |
| 5.5 Device Performance | 199 |
| 5.5.1 General Considerations | 199 |
| 5.5.2 Switching Speed | 202 |
| 5.5.3 Constant-Current Operation | 203 |
| 5.5.4 Power Requirements | 203 |
| 5.5.5 Device Lifetime and Degradation Mechanism | 204 |
| 5.6 Conclusions | 207 |
| Appendix A | 208 |
| References | 210 |
| 6. Electrophoretic Displays. By A. L. Dalisa (With 16 Figures) | 213 |
| 6.1 Principles of Operation | 214 |
| 6.1.1 General Characteristics | 214 |
| 6.1.2 Electrical Addressing of EPID Devices | 217 |
| 6.2 Device Technology | 219 |
| 6.2.1 Colloidal-Suspension Technology | 219 |
| 6.2.2 Device Design | 222 |
| 6.2.3 Device Fabrication | 223 |
| 6.3 Device Performance | 224 |
| 6.3.1 Optical Characteristics | 225 |
| 6.3.2 Electrical Characteristics | 227 |
| 6.3.3 Matrix-Addressed Devices | 228 |
