

CONTENTS

CHAPTER 1: NONSILICON NTD MATERIALS

Neutron Transmutation Doping of p-Type Czochralski-Grown Gallium Arsenide	1
M. H. Young, A. T. Hunter, R. Baron, O. J. Marsh, H. V. Winston and R. R. Hart	
NTD Germanium: A Novel Material for Low Temperature Bolometers	21
E. E. Haller, N. P. Palaio, M. Rodder, W. L. Hansen, and E. Kreysa	
Reliable Identification of Residual Donors in High Purity Epitaxial Gallium Arsenide by Transmutation Doping	37
M. N. Afsar	
Spallation Neutron Damage in Group IV, III-V and II-VI Semiconductors at 5 K	53
R. C. Birtcher, J. M. Meese, and T. L. Scott	

CHAPTER 2: IRRADIATION TECHNOLOGY

Future Reactor Capacity for the Irradiation of Silicon	83
T. G. G. Smith (Invited)	
An Automatic Controlled, Heavy Water Cooled Facility for Irradiation of Silicon Crystals in the DR 3 Reactor at Risø National Laboratory, Denmark	91
K. Hansen, K. Stendal, K. Andresen, and K. Heydorn	
Irradiation of Single Silicon Crystals with Diameters in the 3- to 5-Inch Range in French Reactors	103
P. Bréant	

The Development of NTD Technology in the Institute of Atomic Energy	115
Cao Yizheng and Gao Jijin	

Measurements of the Gamma Abundance of Silicon-31	127
E. J. Parma, Jr. and R. R. Hart	

Experiences with the Norwegian Research Reactor JEEP II in Neutron Transmutation Doping	139
N. Kaltenborn and O. Malmros	

CHAPTER 3: PRACTICAL UTILIZATION OF NTD MATERIAL

The Development of the Market for Neutron Transmutation Doped Silicon	157
H. Herzer and F. G. Vieweg-Gutberlet (invited)	

Neutron Transmutation Doped Silicon for Power Semiconductor Devices	167
B. J. Baliga (Invited)	

Process Induced Recombination Centres in Neutron Transmutation Doped Silicon and Their Influence on High-Voltage Direct-Current Thyristors	181
D. E. Crees and P. D. Taylor	

A Study of Float-Zoned NTD Silicon Grown in a Hydrogen Ambient	193
Lu Chuengang, Li Yaxin, Sun Chengtai, and Yin Janhua	

Experience with Neutron Transmutation Doped Silicon in the Production of High Power Thyristors	205
A. Alm, G. Fiedler, and M. Mikes	

CHAPTER 4: CHARACTERIZATION OF NTD MATERIAL

Transient Current Spectroscopy of Neutron Irradiated Silicon	225
J. W. Farmer and J. C. Nugent (Invited)	

Calibration of the Photoluminescence Technique for Determination of Phosphorus in Silicon by Neutron Transmutation Doping	241
B. D. Stone, A. D. Henry, P. L. Clem, Jr., L. W. Shive, and S. L. Gunn	

Swirls in Neutron-Transmutation Doped Float-Zoned Silicon . .	251
H. G. Kramer	

Compensation Effects in N.T.D. Indium Doped Silicon	261
B. Pajot and A. Tardella	
Correlation of NTD-Silicon Rod and Slice Resistivity	271
W. M. Wolverton	
CHAPTER 5: NEUTRON DAMAGE AND ANNEALING	
A Detailed Annealing Study of NTD Silicon Utilizing Raman Scattering	287
H. R. Chandrasekhar, M. Chandrasekhar, J. M. Meese, and S. L. Thaler	
Annealing Study of NTD Silicon Doped with Boron	297
J. B. Watson and B. C. Covington	
Annealing Effects of NTD Silicon on High-Power Devices	305
C. K. Chu and J. E. Johnson	
Study of Annealing Behavior and New Donor Formation in Neutron Transmutation Doped Silicon Grown in a Hydrogen Atmosphere	311
Wang Zhengyuan and Lin Lanying	
PARTICIPANTS	327
INDEX	331
