I. Noise in Semiconductor Devices

Limiting Noise in Solid State Devices. By A. van der Ziel	2
Generation-Recombination Noise. By R. Müller	13
An Accurate Expression for the Noise Figure of Bipolar Transistors Including Crowding Effect. By J. Caminade, G. Le Gac, and G. Blasquez	26
An Accurate Noise Analysis in MESFET Including Hot Carrier Effects By J. Graffeuil, J.F. Sautereau, G. Blasquez, and P. Rossel	30
Noise in MESFETs in the Range of 1-100 MHz. By A. Sodini, M. Savelli, G. Lecoy, and D. Rigaud	34
On the Influence of the Extended Space Charge Region in Avalanche Photodiodes. By G. Lecoy, C. Maille, D. Ratsira, and R. Alabedra	38
Photon-Counting Statistics of Cathodo-Luminescence Light Emitted by ZnS:Ag. By J. Timmermans and R.J.J. Zijlstra	42
Acoustoelectric Fluctuations in Photoconducting CdS. By P.A. Gielen and R.J.J. Zijlstra	49
Large Signal Low Frequency Noise in Impatt Diodes in the Presence of a Saturation Current. By R. Périchon and E. Constant	56
Physical Sources of Burst Noise. By G. Blasquez and J. Caminade	60
A Burst Noise Model for Integrated Bipolar Transistors with Anomalous I-V Characteristics. By G. Doblinger	64

II. Hot Carrier Noise

Survey of Noise of Hot Carriers: Some Experimental and Theoretical Aspects. By J.P. Nougier	72
Non-Ohmic Transport Fluctuations in Semiconductors. By R.J.J. Zijlstra	90
Monte Carlo Calculation of Non-Steady State Hot Electron Noise in Very Short Channel n-Si and n-GaAs Devices. By J. Zimmermann, Y. Leroy, A. Kaszynski, and B. Carnez	101

Hot Carrier Noise in GaAs Epilayer for FET. By J. Graffeuil, J.F. Sautereau, and J.C. Martin	106
Effect of Hot Carriers on the Thermal Noise of p-Type Silicon and in SCLC Single Injection Diodes. By J.P. Nougier, D. Gasquet, J.C. Vaissiere, and H.R. Bilger	110
Fluctuation Spectra Near the Threshold of a Current Instability By M. Büttiker and H. Thomas	115
 <u>III. 1/f-Noise</u>	
1/f-Noise. By D. Wolf	122
Current Noise in Thick Film Resistors. By T.M. Chen	134
1/f-Noise in Single Injection Diodes. By T.G.M. Kleinpenning	140
1/f-Noise in Hall Voltage. By H.M.J. Vaes and T.G.M. Kleinpenning ...	144
1/f-Noise in Indium Antimonide. By J. Šikula, B. Koktavý, and P. Vašina	148
Bulk 1/f-Noise in MOS Transistors at Low Drain-Source Voltages By L.K.J. Vandamme and A.H. de Kuijper	152
Temperature and Substrate Dependence of 1/f-Noise in Continuous Metal Films. By P. Dutta, P.M. Horn, and J.W. Eberhard	157
Isomorphism of Non-Lorentzian Noises and Phase Transitions of Second Order. By M. Mikulinsky and S. Fishman	160
Variance Noise Simulations. By A. Ambrózy	165
Amplitude Distribution of 1/f-Noise. By P.H. Handel and D. Wolf	169
Low Frequency Noise and Deep Traps in Schottky Barrier Diodes By A.J. Grant, A.M. White, and B. Day	175
Surface Influence on 1/f-Noise in Bipolar Transistors By M. Stoisiak and D. Wolf	181
Noise in a Semiconductor Device Working Under Critical Conditions By D. Berlan, P. Viktorovitch, and G. Kamarinos	187
 <u>IV. Noise in Magnetic Materials</u>	
Magnetization Noise and Power Loss in Magnetic Materials By P. Mazzetti	192
Stationarity and Behaviour of Barkhausen Noise in Magnetic Thin Films By N.J. Wiegman, R. ter Stege, and A.H. de Kuyper	199

Analysis of Soft Magnetic Material by Means of Barkhausen Noise Cross Spectra. By W. Grosse-Nobis and K. Jansen	204
<u>V. Noise in Superconductors and Superconducting Devices</u>	
Noise Limitations of the dc SQUID. By J. Clarke	210
Theory of Flux-Flow Noise in Superconductors. By J.R. Clem	214
Noise in the Flux-Tube Nucleation of the Current-Induced Resistive State of Type-I Superconductors. By K.P. Selig, D.E. Chimenti, and R.P. Huebener	223
On the Time Behavior of Local Flux-Flow Noise in Niobium and Vanadium Foils. By H. Dirks and C. Heiden	229
Cross Correlation Measurements on Moving Vortex Arrays By K. Beckstette and C. Heiden	234
<u>VI. Noise Measuring Techniques</u>	
Noise Thermometry with Conventional Electronics. By L. Storm	240
Noise Thermometry Using Josephson Junctions. By R.J. Soulen, Jr.	249
On the Theory of the Resistive-SQUID-Thermometer. By S.N. Erné	260
Anomalous Noise Automatic Measurements in Driven Ferroelectrics By M. Jannin	266
Determination of Viscoelastic Properties of Some Nematics by Noise Measurements. By D.C. van Eck and R.J.J. Zijlstra	270
<u>VII. Theory</u>	
Instabilities and Fluctuations in Systems Far from Thermodynamic Equilibrium. By H. Thomas	278
Noise in Nonlinear Optics. By A. Stahl	297
Noise Effects in the Locking of Supermodes (Statistical Effects in Laser Modelocking). By H.A. Haus	304
Reconciliation of Photon Noise Statistics and Electron Statistics in a Solid in Equilibrium with the Radiation Field. By K.M. van Vliet, R.J.J. Zijlstra, and N.G. van Kampen	309
Noise Due to Reduction and Multiplication Processes By K.M. van Vliet	314

On the Use of a General Equation for Markov Processes in Linear and Nonlinear Noise Theory. By A.A. Walma	318
Fluctuation of Level-Crossing Time Intervals of Noise. By T. Mimaki and D. Wolf	323
Information, Critical Fluctuations and Phase-Transition-Like Phenomena in Open Nonlinear Chemical Systems. By G. Czajkowski ...	327
Theory of Avalanche Noise. By K.M. van Vliet and L.M. Rucker	333
Index of Contributors	337
