| Introduction <i>J. R. Singer</i>  | v   |
| PART I. OPTICAL MASERS  |     |
| Some Applications of Optical and Infrared Masers<br><i>C. H. Townes</i>   | 1   |
| Alkali Vapor Infrared Masers <i>H. Z. Cummins, I. Abella,<br/>O. S. Heavens, N. Knable, and C. H. Townes</i>                            | 3   |
| Optical Maser Oscillations in a Gaseous Discharge<br><i>A. Javan</i>  | 12  |
| Radiative Lifetimes and Collision Transfer Cross Sections<br>of Excited Atomic States <i>W. R. Bennett, Jr.</i>                         | 18  |
| Optical Properties of the Cavity and Output Beam of a<br>Continuous Gas Maser <i>D. R. Herriott</i>                                     | 28  |
| Fine Structure and Properties of Chromium Fluorescence<br>in Aluminum and Magnesium Oxide <i>A. L. Schawlow</i>                         | 44  |
| Stimulated Emission from $\text{CaF}_2 : \text{U}^{+3}$ and $\text{CaF}_2 : \text{Sm}^{+2}$<br><i>P. P. Sorokin and M. J. Stevenson</i> | 50  |
| Fluorescence and Optical Maser Effects in $\text{CaF}_2 : \text{Sm}^{++}$<br><i>C. G. B. Garrett, W. Kaiser, and D. L. Wood</i>         | 65  |
| The Polarization of the Output from a Ruby Optical Maser<br><i>D. F. Nelson and R. J. Collins</i>                                       | 77  |
| Stimulation versus Emission in Ruby Optical Maser<br><i>M. L. Stitch, E. J. Woodbury, and J. H. Morse</i>                               | 79  |
| Infrared Masers Using Rare Earth Ions <i>G. J. Troup</i>  | 83  |
| Optical Maser Action in Ruby <i>T. H. Maiman</i>  | 85  |
| Optical Maser Action in Ruby <i>T. H. Maiman</i>  | 91  |
| PART II. OPTICAL PUMPING: TRANSITIONS IN GASES<br>AND SOLIDS  |     |
| Optical Pumping <i>Jean Brossel</i>   | 93  |
| Quantum Theory of Optical Pumping <i>C. Cohen-Tannoudji</i>   | 95  |
| Wall Coatings of Alkyl-Chloro-Silanes for the Inhibition of<br>Spin Relaxation <i>Carroll O. Alley</i>                                  | 114 |
| Wall Coatings of Alkyl-Chloro-Silanes for the Inhibition of<br>Spin Relaxation <i>Carroll O. Alley</i>                                  | 120 |

|  |  |     |
|--|--|-----|
| <b>Properties of Modulated Light in Double-Resonance Experiments</b>   | <i>G. W. Series</i>                                    | 128 |
| <b>Optical Spectra of Paramagnetic Solids</b>  | <i>W. Low</i>  | 138 |
| <b>Submillimeter Wave Spectroscopy Using a Michelson Interferometer</b>  | <i>H. A. Gebbie</i>                                    | 155 |
| <b>Spectroscopic Observations on Maser Materials</b>   | <i>G. H. Dieke</i>                                     | 164 |
| <b>Microwave Modulation of Light</b>   | <i>P. S. Pershan and N. Bloembergen</i>                | 187 |
| <b>Anti-Stokes Fluorescence as a Cooling Process</b>   | <i>Shaul Yatsiv</i>                                    | 200 |
| <b>Scattering of Resonance Radiation in Ruby</b>   | <i>Irwin Wieder and Lynn R. Sarles</i>                 | 214 |
| <b>Radio Frequency Mixing in Optical Pumping Experiments</b>   | <i>Arnold L. Bloom and William E. Bell</i>             | 224 |
| <b>Optical Detection of Paramagnetic Resonance in the Excited <math>\bar{E}</math> (<math>^2E</math>) State of <math>\text{Cr}^{3+}</math> in <math>\text{Al}_2\text{O}_3</math></b> | <i>S. Geschwind, R. J. Collins, and A. L. Schawlow</i> | 232 |
| <b>Photodetection and Photomixing of Laser Outputs</b>   | <i>A. T. Forrester</i>                                 | 233 |
| <b>The Polarization of <math>2^3S_1</math> Metastable Helium Atoms by Optical Pumping</b>  | <i>L. D. Schearer</i>                                  | 239 |
| <b>On the Intensity Interferometer with Coherence Background</b>   | <i>Hideya Gamo</i>                                     | 252 |
| <b>A Stokes-Shift Light Amplifier</b>  | <i>Dickron Mergerian and Jordan J. Markham</i>         | 267 |
| <b>Xenon Flash Lamp Design</b>   | <i>Harold E. Edgerton</i>                              | 276 |
| <b>The Dynamic Pinch as a High-Intensity Light Source for Optical Maser Pumping</b>  | <i>S. A. Colgate and A. W. Trivelpiece</i>             | 288 |
| <b>Proposed Method for the Enhancement of Optical Pumping Double-Resonance Signals</b>   | <i>E. Lipworth</i>                                     | 293 |
| <b>PART III. INTERACTION OF MOLECULES WITH PHOTONS IN RESONANT STRUCTURES</b>  |  | 297 |
| <b>The Emission, Pulse-Level Inversion, and Modulation of Optical Masers</b>   | <i>J. R. Singer and S. Wang</i>                        | 299 |
| <b>Resonant Modes in a Maser Interferometer</b>  | <i>A. G. Fox and Tingye Li</i>                         | 308 |

|   |     |

| The Confocal Resonator for Millimeter through Optical Wavelength Masers <i>G. D. Boyd</i>   | 318 |
| A Steady-State Theory of the Optical Maser <i>W. G. Wagner and G. Birnbaum</i>  | 328 |
| Control of Fluorescent Pulsations <i>R. W. Hellwarth</i>  | 334 |
| Observations on Oscillation Spikes in Multimode Lasers <i>H. Statz, C. Luck, C. Shafer, and M. Ciftan</i>                                 | 342 |
| Optical Dielectric Waveguides <i>E. Snitzer</i>   | 348 |
| Angular Distribution of Stimulated Emission <i>W. E. Lamb, Jr.</i>  | 370 |
| PART IV. PHONON AND PARAMAGNETIC RESONANCE PHENOMENA 371  |     |
| Cross-Relaxation in Masers <i>N. Bloembergen and P. S. Pershan</i>  | 373 |
| Recent Developments in Spin-Lattice Relaxation <i>J. H. Van Vleck</i>   | 388 |
| Concentration-Dependent Relaxation Times <i>J. C. Gill and R. J. Elliott</i>  | 399 |
| Use of Paramagnetic Resonance to Detect Optical Effects in Solids <i>Reuben S. Title</i>  | 404 |
| Cross-Relaxation Within an Inhomogeneous Resonance Line <i>W. B. Mims</i>   | 411 |
| Temperature Dependence of Raman Relaxation of Chromium (+3) in Magnesium Oxide <i>J. G. Castle, Jr., D. W. Feldman, and P. G. Klemens</i> | 414 |
| Spin-Lattice Relaxation in the ${}^2\Gamma_3({}^2E)$ State of Ruby <i>A. Kiel</i>   | 417 |
| Operation of a CW Push-Pull Solid-State Maser from 48 to 56 kMc/sec <i>David L. Carter</i>  | 426 |
| Direct Interaction of Phonons and Spin Waves <i>E. H. Turner</i>  | 427 |
| Paramagnetic Spectra of $\text{Fe}^{3+}$ and $\text{Cr}^{3+}$ in Monoclinic Tungstates <i>M. Peter, L. G. Van Uitert, and J. B. Mock</i>  | 435 |
| Spin-Wave Spectroscopy <i>Ernst Schlömann</i>   | 437 |
| Detection of Microwave Ultrasonics by Phonon-Photon Double Quantum Transitions <i>N. S. Shiren</i>  | 453 |
| Relaxation of Inhomogeneously Excited Spin Systems <i>R. F. Soohoo</i>  | 455 |

|  |     |
|--|-----|
| <b>PART V. NEW INVESTIGATIONS OF SEMICONDUCTORS</b>  | 463 |
| Cyclotron Resonance Maser <i>Benjamin Lax</i>  | 465 |
| Quantum Detection of Microwave- and Submillimeter-Wave Radiation Based on Electron Tunneling in Superconductors <i>E. Burstein, D. N. Langenberg, and B. N. Taylor</i> | 480 |
| Negative Absorption Coefficient at Indirect Transitions in Semiconductors <i>N. G. Basov, O. N. Krokhin, and Ju. M. Popov</i>  | 496 |
| <b>PART VI. INFORMATION THEORY AND NOISE STUDIES</b>   | 507 |
| Information Capacity of a Communications Channel in the Presence of Quantum Effects <i>J. P. Gordon</i>  | 509 |
| A Quantum-Statistical Treatment of the Channel Capacity of Information Theory <i>G. J. Lasher</i>  | 520 |
| I. Quantum-Mechanical Incoherence and Ordinary Noise.  |     |
| II. Noise in a Coherent Signal Maser Amplifier <i>I. R. Senitzky</i>   | 537 |
| <b>PART VII. MICROWAVE TRANSITIONS</b>   | 541 |
| The Atomic Hydrogen Maser <i>Daniel Kleppner</i>   | 543 |
| Multiple Quantum Effect in a Three-Level Gas Maser <i>Tatsuo Yajima and Koichi Shimoda</i>   | 548 |
| CW Millimeter Wavelength Maser <i>S. Foner, L. R. Momo, J. B. Thaxter, G. S. Heller, and R. M. White</i>   | 553 |
| Gas Beam Masers in the Two-Millimeter-Wavelength Region <i>J. B. Newman</i>  | 566 |
| <b>PART VIII. SOME NEW IDEAS AND ACCOMPLISHMENTS</b>   | 575 |
| Quantum Electronics and Gravitation Experiments <i>J. Weber</i>  | 577 |
| Polarization of Nuclei in Liquids by Contact with a Paramagnetic Solid <i>J. Uebersfeld and J. L. Motchane</i>   | 579 |

|  |      |
