

# 1 Introduction

RICHARD BOLL, Vacuumschmelze GmbH, Hanau, FRG

## Contents

1.1	Introductory Remarks, Historical Background . . . . .	2
1.2	Definition of Magnetic Sensors . . . . .	3
1.3	Magnetic Terms and Units . . . . .	5
1.4	Natural and Technical Magnetic Fields and Their Order of Magnitude . . . . .	6
1.4.1	Natural Magnetic Fields . . . . .	6
1.4.2	Technical Magnetic Fields . . . . .	8
1.5	Soft and Hard Magnetic Materials for Sensors . . . . .	9
1.5.1	Soft Magnetic Materials . . . . .	10
1.5.2	Hard Magnetic Materials . . . . .	13
1.5.3	Mechanical Properties of Magnetic Materials . . . . .	15
1.5.4	Supplementary Remarks . . . . .	16
1.6	Magnetic Noise . . . . .	16
1.6.1	Thermal and Thermomagnetic Noise . . . . .	16
1.6.2	Barkhausen Noise . . . . .	19
1.7	Coil Systems to Produce Definite Magnetic Fields . . . . .	20
1.7.1	Coils for Homogeneous DC Fields up to Approximately 100 A/cm . . . . .	21
1.7.2	Coils for Higher Fields (Electromagnets) . . . . .	23
1.7.3	Superconducting Coils . . . . .	24
1.8	Shielding Magnetic Fields . . . . .	24
1.8.1	General . . . . .	24
1.8.2	Basic Principles of Magnetic Shielding . . . . .	25
1.8.2.1	DC Fields . . . . .	25
1.8.2.2	AC Fields . . . . .	26
1.8.3	Materials for Magnetic Shieldings and Design . . . . .	27
1.9	References . . . . .	29
