1. PHYSICS OF SCHOTTKY BARRIER JUNCTIONS

M.S. Tyagi

1. Introduction	1
2. Origins of Barrier Height	2
2.1. Schottky–Mott Theory of Ideal Metal–Semiconductor Contact	2
2.2. Modifications to Schottky Theory	8
2.3. Classifications of Metal–Semiconductor Interfaces	11
2.4. Contacts on Reactive Interfaces	12
2.5. Contacts with Surface States and an Insulating Interfacial Layer	13
2.6. Contacts on Vacuum Cleaved Surfaces	17
3. Measurement of Barrier Height	19
3.1. Capacitance–Voltage Measurement	19
3.2. Current–Voltage Measurement	20
3.3. Photoelectric Measurement	21
4. Results of Barrier Height Measurements	21
4.1. Chemically Prepared Surfaces	21
4.2. Vacuum Cleaved Surfaces	23
4.3. Concluding Remarks	24
5. Capacitance–Voltage Characteristics	27
5.1. Electric Field and Potential Distribution in the Depletion Region	27
5.2. Depletion Region Capacitance	29
5.2.1. Ideal Schottky Barrier	29
5.2.2. Effect of Minority Carriers	32
5.2.3. Effect of Interfacial Layer	33
5.2.4. Effect of Deep Traps	34
6. Current–Voltage Characteristics	35
6.1. Transport Mechanisms	35
6.1.1. Diffusion and Thermionic Emission over the Barrier	36
6.1.2. Tunneling through the Barrier	41
6.1.3. Carrier Generation and Recombination in the Junction Depletion Region	44
6.1.4. Minority Carrier Injection	45
6.2. Forward Characteristics	46
6.3. Reverse Characteristics	51
7. Transient Behavior	53

8. Low-Resistance Schottky Barrier Contacts	54
References	56

2. INTERFACE CHEMISTRY AND STRUCTURE OF SCHOTTKY BARRIER FORMATION

R.Z. Bachrach

1. Introduction	61
2. Perspectives on Schottky Barrier Formation	63
2.1. Introduction	63
2.2. Brief Review of Phenomenological Schottky Barrier Data	65
3. The Chemistry and Structure of the Interfacial Layer.	70
3.1. Synopsis of the Layer-by-Layer Evolution	72
3.2. Some Techniques for Studying the Stages of Interface Formation	72
4. Evolution of the Interfacial Layer.	73
4.1. Stage 0: The Clean Semiconductor Surface.	74
4.1.1. Silicon (100) and (111) Surfaces	76
4.1.2. GaAs (110) and GaAs (100) Surfaces	77
4.2. Stage 1: The Dilute Limit ($< 1/2$ Monolayer).	78
4.3. Stage 2: Monolayer Formation—Metal Film Nucleation.	81
4.4. Stage 3: Additional Monolayers and Interdiffusion	82
4.5. Some Specific Characteristics of the Interfacial Layers	84
5. Formation of Interface States	85
5.1. Intrinsic Interface States Derived from the Metal and Semiconductor	86
5.2. Localized Defect and Impurity Related States	87
5.3. Interface States and the Stages of Interface Formation.	90
6. Case Studies of the Chemistry and Structure of Schottky Barrier Formation.	93
6.1. Case Studies of Silicon Schottky Barriers	93
6.1.1. Al, Ag, Cu, and Au Schottky Barriers	93
6.1.2. Silicide–Silicon Interfaces	96
6.2. Case Studies of III–V and II–VI Compound Semiconductor Schottky Barriers.	99
6.2.1. The Ga–Al–As System.	99
6.2.2. The GaAlAs Ternary System with Au Schottky Barriers	104
6.2.3. InP	106
6.2.4. Some II–VI Examples	107
7. Summary	108
References	108

3. FABRICATION AND CHARACTERIZATION OF METAL–SEMICONDUCTOR SCHOTTKY BARRIER JUNCTIONS

B.L.Sharma

1. Introduction	113
2. Selection of Semiconductor Materials	115

3. Metal-Semiconductor Systems	120
3.1. Metal-Silicon Systems	120
3.2. Metal-GaAs Systems	127
3.3. Multilayer Metallization Systems	130
4. Design Considerations	131
5. Fabrication Technology	135
5.1. Surface Processing	136
5.2. Dielectric Film Deposition	137
5.3. Ohmic Contact Formation	137
5.4. Metal Deposition	139
5.5. Other Steps	141
6. Characterization	142
References	148

4. SCHOTTKY-BARRIER-TYPE OPTOELECTRONIC STRUCTURES

Stephen J. Fonash

1. Introduction	161
2. Barrier Formation in Schottky-Barrier-Type Junctions	163
3. Transport in Schottky-Barrier-Type Structures	168
3.1. MS and MIS Structures	168
3.2. SIS Structures	173
4. Schottky-Barrier-Type Optoelectronic Structures	174
4.1. Schottky-Barrier-Type Light-Emitting Structures	174
4.2. Schottky-Barrier-Type Photodiodes	181
4.3. Schottky-Barrier-Type Photovoltaic Devices	185
4.3.1. MS and MIS Photovoltaic Devices	185
4.3.2. SIS Photovoltaic Devices	187
3. Summary	187
References	188

5. SCHOTTKY BARRIER PHOTODIODES

S.C. Gupta and H. Preier

1. Introduction	191
2. General Parameters of Photodiodes	193
2.1. Signal-to-Noise Ratio (S/N)	193
2.2. Noise Equivalent Power (NEP)	193
2.3. Detectivity (D)	194
2.4. Normalized Detectivity (D^*)	194
2.5. Detectivity Normalized Also with Respect to the Field of View (D^{**})	196
2.6. Resistance Area Product	196
2.7. Response Time	200
3. Selection of Materials	203

3.1. Metal Systems	203
3.2. Semiconducting Materials	204
4. Fabrication Technology	205
5. Techniques for Evaluating Device Parameters	211
5.1. Current–Voltage Characteristics	211
5.2. Capacitance–Voltage Characteristics	211
5.3. Photoelectric Measurements	212
5.4. Electron Beam Induced Current Technique	212
6. Applications	214
7. Conclusions	214
References	215

6. MICROWAVE SCHOTTKY BARRIER DIODES

Y. Anand

1. Introduction	219
2. Diode Design Considerations	220
2.1. Equivalent Circuit	220
2.2. Frequency Conversion	221
2.3. Basic Mixer Diode RF Parameters	221
2.3.1. Conversion Loss Theory	222
2.3.2. Noise–Temperature Ratio	225
2.3.3. Overall Receiver Noise Figure	227
2.3.4. Mixer Noise Temperature	228
2.3.5. RF Impedance	228
2.3.6. IF Impedance	229
2.3.7. Receiver Sensitivity	229
2.3.8. Doppler Shift	229
2.3.9. Typical Doppler Radar System	230
2.4. Basic Detector RF Parameters	230
2.4.1. Video Resistance (R_v)	231
2.4.2. Voltage Sensitivity	232
2.4.3. Current Sensitivity β	232
2.4.4. Minimum Detectable Signal (MDS)	233
2.4.5. Tangential Signal Sensitivity (TSS)	233
2.4.6. Nominal Detectable Signal (NDS)	233
2.4.7. Noise Equivalent Power (NEP)	234
2.4.8. Video Bandwidth	234
2.4.9. Superheterodyne vs. Single Detection	235
2.5. Mixer Configurations	235
2.5.1. Single-Ended Mixer	235
2.5.2. Single-Balanced Mixer	237
2.5.3. Double-Balanced Mixer	237
2.5.4. Image Rejection Mixer	237

2.5.5. Image Enhanced or Image Recovery Mixer	237
3. Properties of Schottky Barrier Diodes	238
3.1. Diode Theory	239
3.2. DC Parameters	240
3.2.1. Junction Capacitance	240
3.2.2. Overlay Capacitance	242
3.2.3. Series Resistance	243
3.2.4. Figure of Merit	244
3.3. Semiconductor Materials	245
3.4. Epitaxial GaAs	245
3.5. Barrier Height Lowering	245
3.6. Fabrication	248
4. Microwave Performance	250
4.1. Mixer Diodes	250
4.2. Detector Diodes	252
5. RF Pulse and CW Burnout	254
5.1. Introduction	254
5.2. Factors Affecting RF Burnout	257
5.3. Experimental Results	259
5.4. Physical Analysis of RF Pulsed Silicon Schottky Barrier Failed Diodes	261
5.5. Physical Analysis of RF Pulsed Millimeter GaAs Schottky Barrier Failed Diodes	263
5.6. Electrostatic Failure of Silicon Schottky Barrier Diodes	265
6. Conclusions	266
References	267

7. METAL-SEMICONDUCTOR FIELD EFFECT TRANSISTORS

James A. Turner

1. Introduction	273
2. Small-Signal FET Theory	274
3. Design Parameters of a Low-Noise Device	277
4. Practical Small-Signal FET Fabrication Techniques	281
4.1. Material Growth Techniques	281
4.2. FET Fabrication Technology	282
5. GaAs Power Field Effect Transistors	284
5.1. Principle of Power FET Operation	285
5.2. Thermal Impedance	286
5.3. Power FET Technology	287
6. Conclusions	290
References	291

8. SCHOTTKY BARRIER GATE CHARGE-COUPLED DEVICES

Dieter K. Schroder

1. Introduction	293
2. Schottky Gate CCDs	298
3. Potential-Charge Relationships	300
3.1. Surface Channel CCD	300
3.2. Bulk Channel CCD	302
3.3. Schottky Gate CCD	305
4. Charge Storage Capacity	311
4.1. Surface Channel CCD	311
4.2. Bulk Channel CCD	312
4.3. Schottky Gate CCD	313
5. Charge Transfer	314
5.1. Charge Transfer Efficiency	314
5.2. Charge Transfer Mechanisms	315
5.2.1. Surface Channel CCD	316
5.2.2. Bulk Channel CCD	318
5.2.3. Schottky Gate CCD	318
6. Input-Output Circuits	319
7. Schottky Gate Heterojunction CCDs	320
8. Experimental Results	326
8.1. High-Frequency Devices	326
8.2. Heterojunction Devices	328
9. Applications	328
<i>Bibliography</i>	330
<i>References</i>	330

9. SCHOTTKY BARRIERS ON AMORPHOUS Si AND THEIR APPLICATIONS

R.J. Nemanich and M.J. Thompson

1. Introduction	335
2. Properties of Amorphous Si	336
2.1. Deposition Methods	336
2.2. Structural Properties	338
2.3. Electronic Properties	340
2.4. Surfaces	343
3. The Schottky Barrier on <i>a</i> -Si:H	344
3.1. Current-Voltage Measurements	346
3.2. Capacitance Measurements	349
3.3. Internal Photoemission	351
4. Interface Kinetics and Its Effect on the Schottky Barrier	352
5. Applications	357
5.1. Drift Mobility	357

CONTENTS

xv

5.2. Deep Level Transient Spectroscopy	359
5.3. Solar Cells	361
5.4. Thin Film Transistors	362
6. Concluding Remarks	364
<i>References</i>	365
<i>Index</i>	367
